Community Health Needs Assessment

May 15, 2024

Allentown Community Health Improvement Project Timeline

Two of the MAPP assessments are Quantitative (CHSA & LPHSA) and two are Qualitative (CTSA & FOCA).

The Forces of Change Assessment, Local Public Health System Assessment and Community Themes & Strengths Assessment were completed in two parts with participant's input collected via on-line survey between the sessions.

Project Approach

A **Community Health Needs Assessment (CHNA)** determines the individual and community health of an area through a structured framework. In this assessment we used the **Mobilizing for Action through Planning & Partnership (MAPP)** framework.

- **Purpose of MAPP:** To assess the environment related to public health and well-being using local resources with input from local health systems, community-based organizations, community advocates, and others.

This process consisted of four assessments:

- 1) **Community Health Status Assessment** or snapshot of health and social factors in the City of Allentown;
- 2) **Forces of Change**, or qualitative brainstorming of Forces and underlying Trends impacting health status;
- 3) **Local Public Health System Assessment** or rank of Public Health using the 10 Essential Public Health Services;
- 4) **Community Themes and Strengths Assessment**, or integration of Residents surveyed on health, focus group input, and the results of the two local health networks health assessments.

The City then ranks priorities based on MAPP findings, leading to strategies around priority areas, forming the **Community Health Improvement Plan (CHIP)**.

Community Health Status Assessment (CHSA) – Assessment 1

Forces of Change Assessment (FOCA) – Assessment 2

FORCES ARE A BROAD ALL-ENCOMPASSING CATEGORY THAT INCLUDES TRENDS, EVENTS, AND FACTORS.

Trends are patterns over time such as migration in and out of a community or growing disillusionment with government.

Factors are elements such as a community's large ethnic population, an urban setting, or a jurisdiction's proximity to a major waterway that impact trends.

Events are one-time occurrences such as a hospital closure, a natural disaster, the passage of new legislation or a major event (i.e. COVID).

FORCES WERE GROUPED INTO THE EIGHT CATEGORIES DEFINED BELOW

Social: A social issue is a problem that reduces the quality of life of people.

Economic: An economic issue relates to scarce resources in light of needs.

Political: A political issue involves government or politics but can cross into social or economic issues.

Technology: Technological issues involve improvements in processes that increase productivity such as Internet connectivity or a digital divide.

Environmental: Issues where human activity impacts the environment and environmental factors that affect human health.

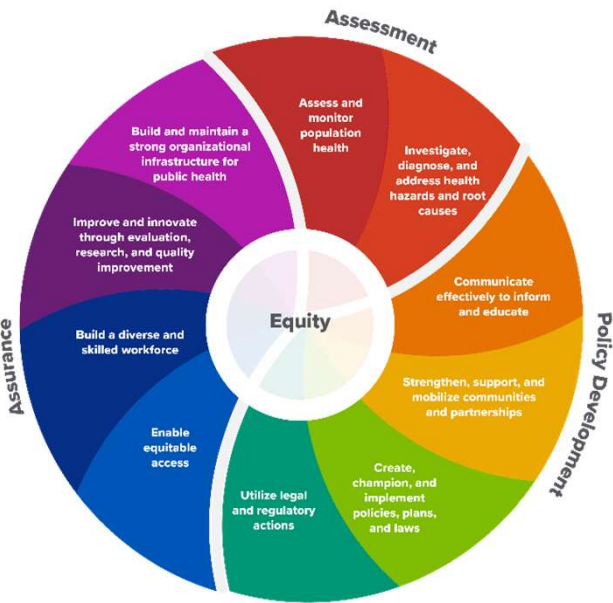

Scientific/Health: Biophysical impact on an individual and the community at large.

Legal: Legal issues are based on the current practice of law.

Ethical: Ethical issues define issues of right and wrong (may differ from legal).

Local Public Health System Assessment (LPHSA) – Assessment 3

Methodology

| EPHS Functions | EPHS Service | DESCRIPTION | 2023 SCORE | RANK |
|---|--------------|---|--------------------------|-----------------|
| Assessment: 59% -- Significant | 1 | Assessment and monitor population health | 49% | 6 th |
| | 2 | Investigate, diagnose, and address health hazards and root causes | 66% | 1 st |
| Policy Development: 51% -- Significant | 3 | Communicate effectively to inform and educate | 55% | 3 rd |
| | 4 | Strengthen, support, and mobilize communities and partnerships | 53% | 4 th |
| | 5 | Create, champion, and implement policies, plans, and laws | 46% | 8 th |
| | 6 | Utilize legal and regulatory actions | 53% | 4 th |
| Assure: 49% -- Moderate | 7 | Enable equitable access | 57% | 2 nd |
| | 8 | Build a diverse and skilled workforce | 48% | 7 th |
| | 9 | Improve and innovate through evaluation, research, and quality improvement | 51% | 5 th |
| | 10 | Build and maintain a strong organizational infrastructure for public health | 41% | 9 th |
| OVERALL | | | 52% - Significant | |

Community Participation

1,137+ Touches

Key Informant Interviews

10 Key Informant Interviews were conducted with input from:

- City Leaders
- Allentown Health Bureau

Resident Surveys

715 Resident Surveys or 186% of the target of 384 has been achieved.

Total Responses that agreed to participate: 830

Responses that did not want to participate: 15

Do not live in Allentown: 100

Total responses that live in the City of Allentown: 725

Focus Groups

126 Participants in 10 focus groups

- *Homeless*
- *Food Pantry*
- *Pave the Road PA*
- *LGBTQIA+*
- *Syrian Food Pantry*
- *Charter School*
- *Muhlenberg College*
- *Grandparents as parents*
- *Library Area Neighborhood Association*
- *Ripple Community Center*

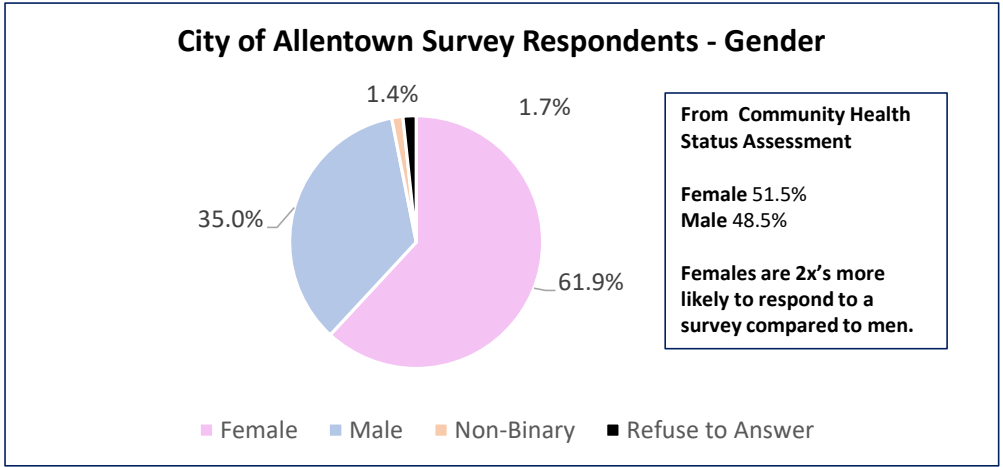

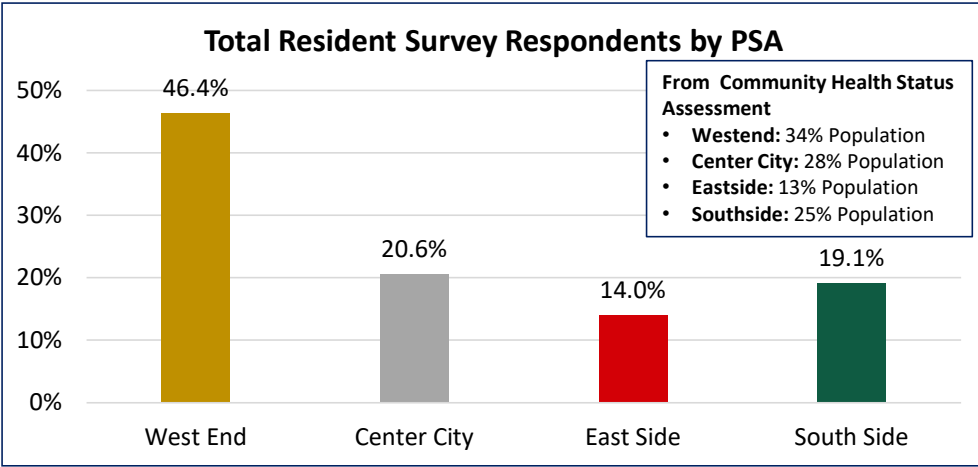

Participants in MAPP

- **CHSA:** 48 participants from 30 agencies
- **FOCA:** 41 participants from 29 agencies
- **LPHSA:** 36 participants from 35 agencies with 26 in Part 2 from 20 agencies.
 - 35 LPHSA Survey Respondents
- **CTSA:**
 - Part 1 – 55 Participants
 - Part 2 – 45 Participants

Community Resident Input

725 Resident Survey

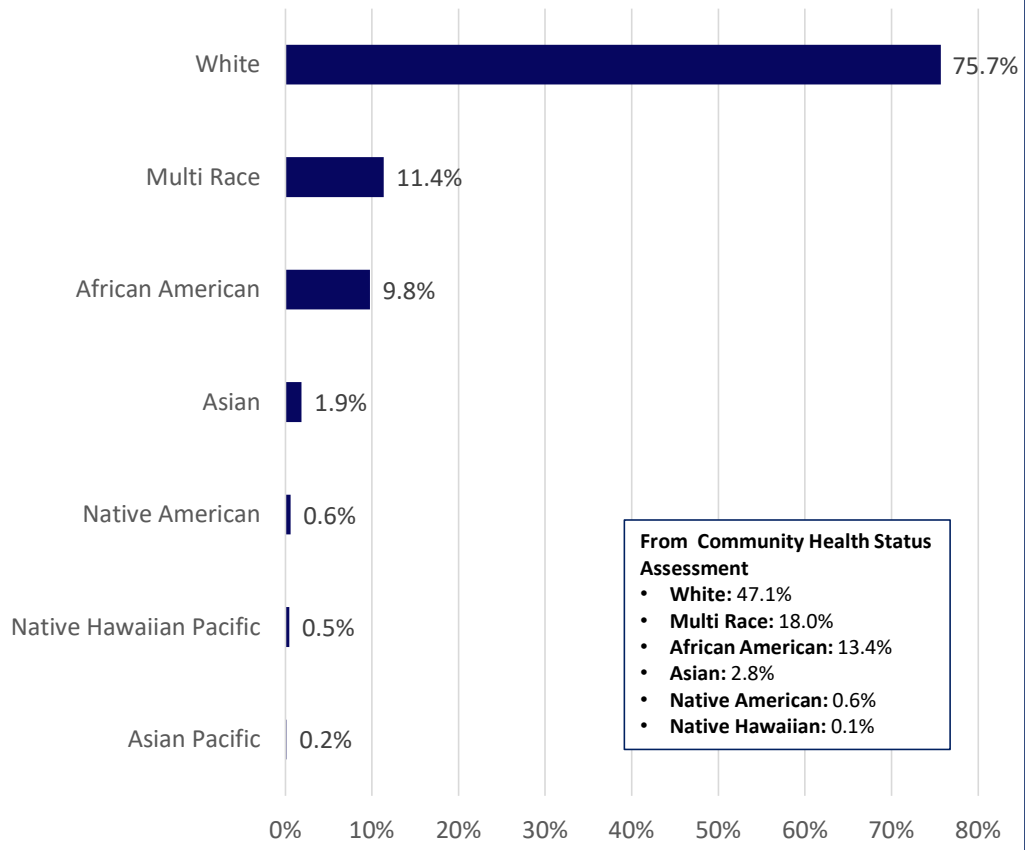

DEMOGRAPHICS: Race/ Ethnicity of Survey Respondents

Community Resident Input

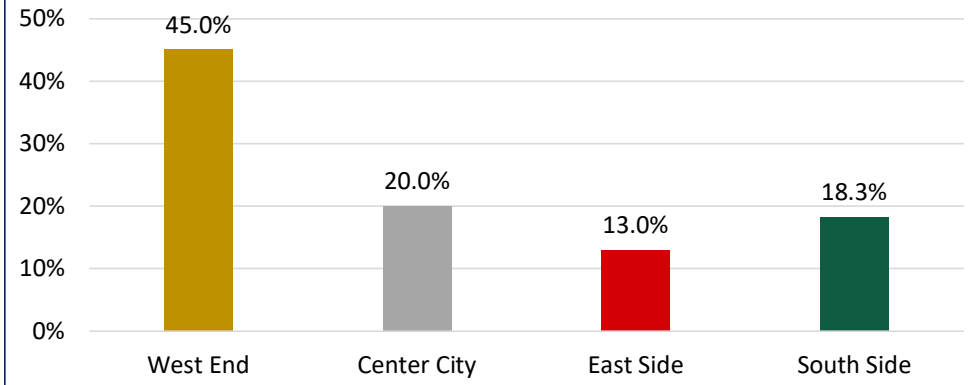

City of Allentown Survey Respondents - Race

From Community Health Status Assessment

- White: 47.1%
- Multi Race: 18.0%
- African American: 13.4%
- Asian: 2.8%
- Native American: 0.6%
- Native Hawaiian: 0.1%

Hispanic Survey Respondents by PSA

Other Languages Spoken at Home – Survey Respondents

Top 5 languages spoken at home:

- Spanish: 85.0%
- Arabic: 2.8%
- German: 1.9%
- French: 1.4%
- Korean: 0.9%

Community Health Needs Assessment Findings by Assessment

| COMMUNITY HEALTH STATUS ASSESSMENT | FORCES OF CHANGE ASSESSMENT | COMMUNITY THEMES AND STRENGTHS ASSESSMENT | TWO REGIONAL HEALTH NETWORKS |
|--|--|---|--|
| Access to Care: Health Care Workforce | Economic - Affordable housing | Homelessness | <ol style="list-style-type: none"> 1. Access to Care 2. Chronic Disease Prevention 3. Mental and Behavioral Health 4. COVID-19 |
| Environmental Health: Air Pollution | Social - Poverty and its impact on families and older adults | Lack of affordable housing | Mental Health Prevention & Education School-Based Behavioral Health |
| Behavioral Health: Substance Use & Opioid | Technology - Not having access to the internet | Need for higher paying jobs | |
| Social Determinants of Health: Homelessness, Housing | Political - Polarization | Substance Use | |
| Social Determinants of Health: Upward Economic Mobility | Scientific/Health - High-stress situation/ lifestyles | Violence/ Crime | |
| Social Determinants of Health: Employment with long commutes to better-paying jobs | Legal - Systemic racism | School safety, access to services | |
| Social Determinants of Health: Isolation & Loneliness | Ethical - Treatment of lumping together groups by issues such as race, ethics, addiction | Discrimination | |
| Social Determinants of Health: Violence | Ethical - Lack of feeling connected/ welcomed/ included | Available, affordable health care | |
| | Ethical -Continued stigma | Food access | |
| | Social - Affordable Housing | Air pollution/ quality | |

Prioritization Process and Determination

1

Loneliness & Social Isolation: Associated with increased mortality risk from various causes, including cardiovascular disease, cancer, respiratory illness, and mental health challenges; impacting Youth & elderly, White males 45 years+ that are unemployed, Low-Income residents, African-Americans and Hispanics, and Veterans.

2

Safe, Stable & Affordable Housing: Poor-quality housing is linked to negative health outcomes, such as chronic diseases, injuries, and mental health issues impacting Low-Income residents, African-Americans and Hispanics, Seniors.

3

Upward Economic Mobility: Economic disparities and financial insecurity impact health outcomes and lifespan, particularly among low-income residents, African Americans and Hispanics, Seniors. Lack of access to resources for wealth acquisition and education correlates with decreased health and well-being.

Community Health Improvement Plan (CHIP) Process

Schedule a CHIP Action Team meeting every two weeks for up to 3 meetings with an estimated 3-5 teams per priority.

Assist in identifying community partners to play a role in improving each priority indicator.

Determine Goals, Objectives, Action Steps, Performance Metrics, Evidence-based Interventions, and Outcomes for each Priority Area.

The CHIP action plan will be finalized in June 2024.
