CITY CLERK

- What department or bureau is this bill originating from?
This bill originates from the Department of Community and Economic Development's Bureau of Building Standards & Safety. This bill calls to amend ordinances 270-26 Definitions and 270-31 Building Fees for the adoption of plan review to be performed by our newly budgeted Building Code Professionals. It will also clear up some of the language in the ordinance and include the addition of a "Temporary Certificate of Occupancy" (TCO).

- Summary and facts of the bill.
Our current ordinance requires all plans to be reviewed by a 3rd party review company prior to submission. Contractors, developers and residents thus pay a fee to a 3rd party and then pay the City a fee for an in-house review of these same plans. This legislation will eliminate the need for prior 3rd party review and allow the constituent the option of allowing the City to conduct the entire review.

- Purpose – Please include the following in your explanation:
 - a. What does the bill do? What are the specific goals or tasks the bill seeks to accomplish?
This legislation authorizes the City to amend ordinance 270-31 Building Fees to adopt a fee schedule to include plan review. The new fee schedule will include both the cost to conduct initial reviews or secondary reviews for plans that have been reviewed by a 3rd party. This bill will also add the cost for a TCO which previously had not been permitted in our ordinance.

 - b. What are the benefits of doing this?
The new option to have the plans reviewed directly by the City will save money to constituents and provide better customer service. It will also provide the City with a new source of revenue. Plans reviewed by the same staff that conduct the inspections, will provide more project knowledge to the inspector and provide an overall better inspection process for both the inspector and the contractor.

 - c. How does this bill relate to the City's vision/mission/priorities?
This bill supports the mission to provide safe spaces to live, work and play. Inspectors who perform reviews will have a more thorough knowledge of the project, materials approved for use and the existing condition of the property. This will in turn, provide for a more accurate inspection, reducing errors during construction.

- Financial Impact – Please include the following in your explanation:
 - a. Cost (initial and ongoing)
The cost to the City was the new position upgrades during the 2024 budget process. The building and trade inspectors were changed to Building Code Professionals which anticipated the adoption of in house plan reviews.

- Priority status – Are there any deadlines to be aware of?

This bill has a high priority status as the revenue from this service was accounted for in the 2024 budget.

- Why should Council unanimously support this bill? This ordinance will provide better customer service, more accurate reviews and inspections and will result in reduced errors.
