## **Executive Summary**

With the possibility of the loss of state funding for the current Public Safety Answering Points (PSAPs – otherwise known as 9-1-1 centers) operated by the cities of Allentown and Bethlehem, and the prospect of either consolidation or regionalization of those PSAPs with those operated by Lehigh and Northampton Counties, MCM Consulting Group, Inc. (MCM) was contracted by the four municipalities to review the operations of each PSAP and develop recommendations for either consolidation or regionalization for them. During this study, it was found that exact “item-by-item” and “operation-by-operation” comparisons of all of the PSAPs’ was not possible, as all of the PSAPs have slightly different approaches to operations. They function within different protocols and policies, and operate in different manners in terms of staffing, budget and administration. MCM made every effort to make comparisons of PSAP operations, budgets, staffing, etc. as sound as possible. MCM conducted this study under the premise that the documentation and other information provided by the PSAPs was accurate, and the answers given by the interviewees were factual.

Consolidation or regionalization of PSAPs will certainly reduce the amount of calls being transferred between PSAPs, and thereby reduce the likelihood of dropped or misdirected calls, while theoretically improving response times. It is important to understand that consolidation or regionalization can result in cost savings, but will often have upfront costs in terms of integrating systems such as Computer Aided Dispatch (CAD), Radio and Customer Premise Equipment (CPE 9-1-1 systems), and facility, infrastructure and connectivity expenditures. MCM believes that after the initial upfront costs are managed, cost savings can be realized through consolidation and regionalization of the four PSAPs in the Lehigh Valley in terms of the elimination of redundant systems and annual maintenance costs for those systems. The municipalities should request that costs associated with consolidation and regionalization are covered by the “15% Interconnectivity” funds in the 9-1-1 account managed by the Pennsylvania Emergency Management Agency (PEMA). It is MCM’s opinion that consolidations and regionalization in the Lehigh Valley are projects that are in line with the legislative intention of the funds set aside for “Interconnectivity”.

Recommended staffing levels, facility uses and potential costs savings resulting from consolidation and regionalization are reviewed in the body of this report. After careful consideration of the data collected during this study, visits to all four existing PSAPs along with a potential new site, and review of the current systems and infrastructure of the PSAPs, MCM is offering four main recommendations for the 9-1-1 systems in the Lehigh Valley:

1. The long-term goal for the cities of Allentown and Bethlehem and the counties of Lehigh and Northampton should be to consolidate into one regional Lehigh Valley PSAP. Maximum

cost savings in terms of capital outlay, maintenance and personnel costs can be realized through all four PSAP joining together into one.

2. Since it is not expected that a regional facility would be ready for operation by June 30, 2019 (when funding for Allentown's and Bethlehem's PSAP is expected to stop), consolidation of Allentown and Lehigh County's PSAPs at the current Lehigh County PSAP, and consolidation of Bethlehem and Northampton County's PSAPs at the current Northampton County PSAP are recommended as intermediary measures.
3. An oversight board should be established with representatives from all four PSAPs and municipalities. The board would be responsible for developing the operational and logistical plans for the consolidation of the city and county PSAPs, eventual regionalization of the all of the PSAPs, and development of an authority for governance of a regional PSAP.
4. Recommended time frames for the activities that are detailed in the body of this report are given. The recommendations are broken down into short term (0 – 6 months), medium term (6 months to two years), and long term (years three and four).

The consolidations and regionalization of PSAPs is an undertaking that must be conducted with thorough planning, attention to detail and input from all of the involved parties, as the end result must be the development of a system or systems that provides the same level, if not an increased, of service and public safety that is being provided today by the four PSAPs in the Lehigh Valley. MCM is pleased to submit this report detailing the findings of the assessment and recommendations for the future of 9-1-1 service in the Lehigh Valley.

*The remainder of this page left intentionally blank.*

## **Introduction**

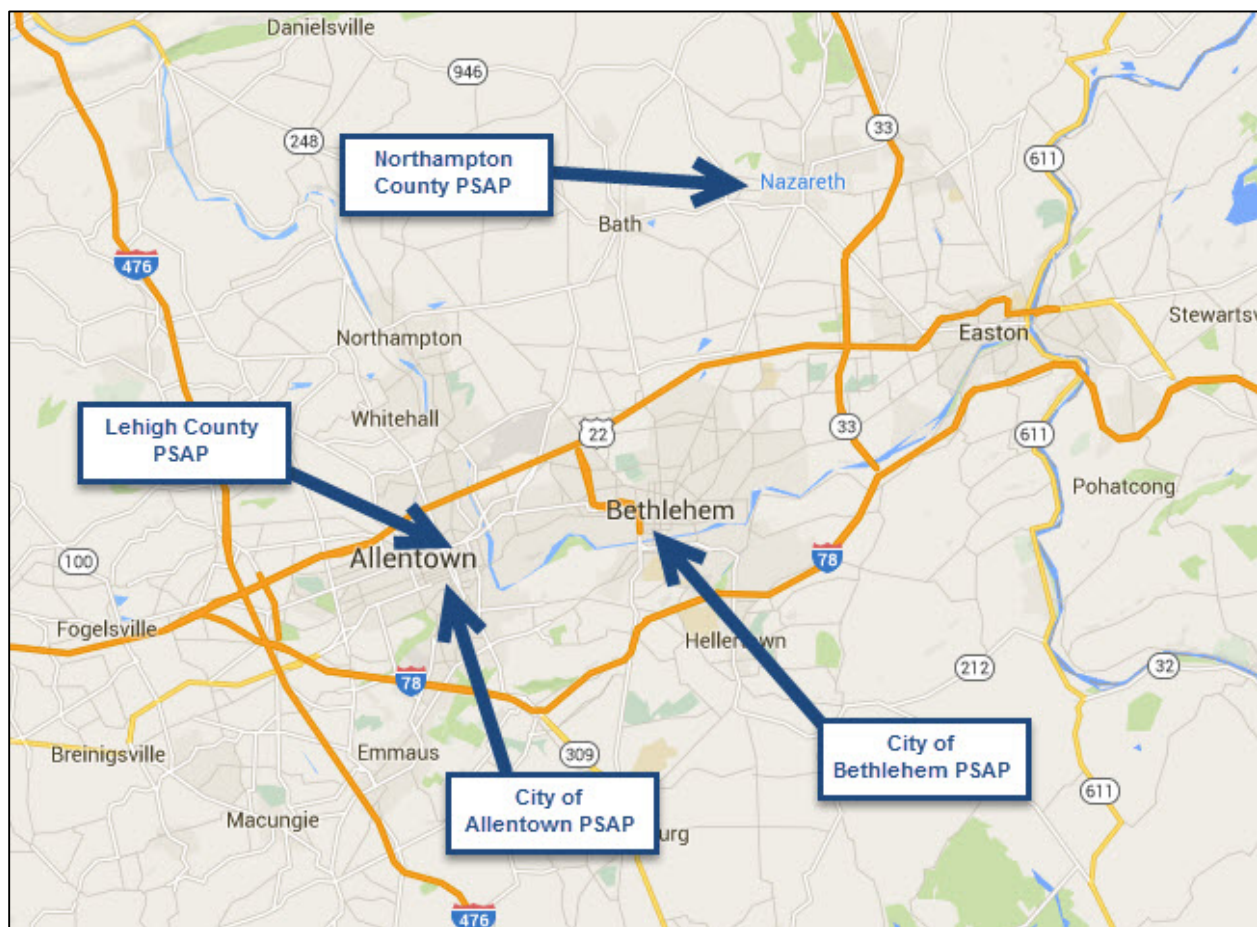

The cities of Allentown and Bethlehem in east-central Pennsylvania each operate their own Public Safety Answering Points (PSAPs), commonly known as 9-1-1 centers. The PSAPs are two of the sixty-nine PSAPs in Pennsylvania that are recognized by the Pennsylvania Emergency Management Agency (PEMA). Allentown and Bethlehem are the only cities in Pennsylvania that operate state-recognized PSAPs. The remaining sixty-seven PSAPs are operated by their respective counties. Both city PSAPs have approved Triennial E9-1-1 plans and receive funding from PEMA, as authorized by Chapter 53 of Title 35 of the Pennsylvania Consolidated Statutes. The funding that is received by the PSAPs is used for their respective yearly operating costs. However, the funding received from PEMA does not fully cover all of the operational costs that each PSAP has, and funds from each cities' general fund must be used to cover the balance of the PSAPs' budgets.

The technology that was historically available at the advent of 9-1-1 systems necessitated that each PSAP that was developed operate with their own equipment in a "stand alone" environment. That is no longer the case. With the evolution of 9-1-1, communications and dispatch technology, states and local governments have begun to pursue the concept of regional shared services or consolidation. Pennsylvania is no different. Along with the advances in technology, an austere fiscal environment has prompted the state to prioritize consolidation and regionalization efforts among the PSAPs in the state. With the cities of Allentown and Bethlehem being contiguous, residing in counties that operate their own PSAPs, and being the only cities that operate recognized PSAPs, they stand out to the state legislature as prime entities for regionalization or consolidation. As such, the legislature has unofficially advised the cities that they will not receive state funding for their PSAPs after the sunset of Chapter 53 of Title 35, which is slated for June 30, 2019.

Because of this, Allentown and Bethlehem considered undertaking a study to analyze their operations and develop a plan for moving forward. Together with Lehigh and Northampton Counties (Allentown is located in Lehigh County, and Bethlehem is split between Lehigh and Northampton Counties), the cities contracted with MCM Consulting Group, Inc. (MCM), based in McMurray, Pennsylvania, to conduct a needs assessment and develop recommendations for regionalization or consolidation of the four PSAPs. The study would review current operations and systems of each PSAP, and make recommendations for city/county consolidations and a regional Lehigh Valley PSAP, which would provide call-taking, dispatch and ancillary services for all four entities. It makes sense for the cities and counties to work together to look at the future of 9-1-1 in the Lehigh Valley, not only because of the close proximity of each other, the potential cost savings for each, but also since there are existing established regional projects, including the Lehigh Valley International Airport, the Lehigh Valley Economic Development

Corporation, the Lehigh County Authority (water and sewer), The visitors bureau (Discover Lehigh Valley), and the sharing of the current 9-1-1 switch between Allentown and Northampton County.

**It should be noted that the cities are not being required to cease operating their own PSAPs after June 30, 2019, but the lack of state of funding will significantly impact the budgets of both, and is highly likely to result in tax increases in order to offset the loss of revenue. It is up to both cities individually to decide how they want to proceed in terms of the operations of their PSAPs.**

*Figure 1 - Map showing the locations of the four PSAPs.*

---

### **Statement from the Pennsylvania Emergency Management Agency**

MCM staff had several discussions with staff at the Pennsylvania Emergency Management Agency (PEMA) with regard to this project. MCM requested that the agency provide a statement in reference to the project, and that the statement include PEMA's position on regionalization and/or consolidation of the PSAPs, along with the use of the 15% state 9-1-1 "Interconnectivity" funding for the PSAPs to carry out any recommendations that the study produces (e.g. will the funds be allowed to be used for infrastructure development, moving costs, equipment procurement, building renovation or construction, etc.). MCM considered it important that the PSAPs were aware of state funding availability before moving forward with consolidations or regionalization. Despite several requests, a statement was not provided by PEMA before this final report was completed.

### **Methodology**

The project began with a kick-off meeting on September 4, 2015. MCM staff assigned to the project all have had extensive experience in 9-1-1 systems and operations, and/or communications equipment design and engineering. A project team was put together with representatives from the four PSAPs. The team included:

Michael D. Hilbert, ENP  
Superintendent of Communications  
E911/Technical Services  
1304 Fairview Street  
Allentown, PA 18102

Robert J. Haffner  
Director 9-1-1  
Bethlehem Police Department  
10 E. Church Street  
Bethlehem, PA 18018

Laurie R. Bailey, MPA, ENP  
9-1-1 / Communications Director  
County of Lehigh 9-1-1  
640 W Hamilton St, 10th Floor  
Allentown, PA 18101

Todd Weaver, ENP  
Acting Director  
Northampton County  
Emergency Management Services  
100 Gracedale Ave, Nazareth, PA 18064

Ronald C. Hulsizer, ENP  
Deputy Director for 9-1-1  
Northampton County  
Emergency Management Services  
100 Gracedale Ave, Nazareth, PA 18064

A project schedule was developed, and the project team reviewed the project process outlined in the Statement of Work (SOW), and definitions for consolidation and regionalization were established so that interview participants would have common terminology to respond to. The definitions developed and utilized throughout the project were:

**Consolidation** – The consolidation of the two city PSAPs into their respective county PSAPs (Allentown consolidated into Lehigh County’s PSAP and Bethlehem consolidated into Northampton County’s PSAP). This would reduce the number of PSAPs from four to two.

**Regionalization** – The combining of all four PSAPs (Allentown, Bethlehem, Lehigh and Northampton) into one regional “Lehigh Valley” PSAP.

MCM developed interview questions, which were reviewed and revised by the project team. Interviews of key individuals identified by the cities of Allentown, and Bethlehem and the counties of Lehigh and Northampton were conducted. A summary of the interview responses begins on page 19 of this report and a compilation of all of the interview responses can be found in Appendix A.

MCM conducted site visits to all of the PSAPs to review and inventory call-taking, 9-1-1 and communications equipment. The equipment was analyzed for longevity, interoperability and capability for consolidated and/or regional operations. MCM also visited the Wilson Kramer facility in the City of Bethlehem. The Wilson Kramer facility is a former United States Army Reserve center located on the north side of the city, near the Lehigh Valley International Airport, at the intersection of Airport Road and Avenue A. The current facility is a 30,000 square foot building which sits on 7.5 acres. The City of Bethlehem acquired the facility with the understanding that it would be used for some type of public safety purpose. The city had previous discussions with the City of Allentown along with Lehigh and Northampton Counties in regards to using the facility as a regional emergency management/9-1-1 center. No final decisions have been made on the use of the facility.

MCM conducted a review and analysis of the PSAPs current operations, based upon information and documentation provided by the PSAPs including:

- Current triennial plans
- Regional shared services assessment reports
- Wireless funding applications
- Wireless reconciliations
- Previous and current year budgets
- Current staffing levels for each PSAP

- 
- Current call management comparison (call takers/dispatchers, etc.)
  - Call volume levels broken down by hour
  - Field units dispatched/interfaced with
  - Current 9-1-1 center equipment
  - Comprehensive services provided by each PSAP
  - Floor plans of the county PSAPs
  - Current expenditures including:
    - 9-1-1 center equipment cost
    - 9-1-1 center equipment maintenance costs
    - LEC costs
    - Utilities cost
    - Personnel cost
    - Building maintenance costs
    - Ancillary services cost

MCM requested that architects from the EADS Group Inc., an engineering, architecture and design firm that has experience in the design, construction and renovation of 9-1-1 centers, visit the two county PSAPs along with the Wilson/Kramer facility and complete a space study. The space study, along with the results of the operations analysis were used to develop the recommendations outlined in this report.

### **Background Information/Demographics**

#### **City of Allentown**

The City of Allentown is a city of the third class located in eastern Lehigh County. According to the United States Census Bureau, the city had a 2010 population of 119,032, with an estimated 2014 population of 119,104. The city has a land area of 17.55 square miles.

The City of Allentown's PSAP is located at 1304 Fairview Street. The first level of the facility houses the PSAP, equipment room and associated offices. The lower level of the facility houses the city's radio maintenance center. The radio maintenance falls under the purview of the Bureau of Communications, which also operates the PSAP. The PSAP has nine operating positions, with a normal staffing of 5 telecommunicators and a supervisor. Its minimum staffing is four telecommunicators plus a supervisor. Access to the PSAP is controlled.

The PSAP Customer Premise Equipment (CPE) – the 9-1-1 operating system - is a 9-position Airbus DS (Cassidian) Vesta 4.3.1.521 geo-diverse CPE solution with two deployable Command

Posts. Being a geo-diverse system, the switch (controller) has two sides which can reside in different locations to ensure redundancy. Side A of the switch is at the Allentown PSAP while side B of the switch is at the Northampton County PSAP. Sharing of a switch between PSAPs saves on capital costs and ongoing maintenance costs, and can be considered a first step in regionalization of equipment.

The city's radio system consists of a single site 9-channel 800MHz trunked Harris radio system. It was installed in 2000, with the software upgraded in 2009 and encryption added in 2011. The system utilizes 9 – GE/Harris MASTRIII stations (non P25), with 65 public works and public safety talk groups. It is controlled by a 7 position GE/Harris C3 Maestro console which was updated in 2009. The radio system also has 11 conventional interfaces for tone remote control. In addition, the city has a VHF backup system with a MASTR IV transmitter and receiver voting at the PP&L Tower building in downtown Allentown, and at the city's East Side facility for interoperability with Lehigh County's radio system. The city utilizes an Eventide NexLog 840 - 48 channel analog logging recorder for recording of phone calls and radio traffic. The city's PSAP does not have any room for expansion at its current facility.

The City of Allentown's PSAP answered a total of 95,715 9-1-1 calls, 178,663 10-digit/non-emergency calls and dispatched 156,680 incidents in 2015.

*Figure 2 – City of Allentown PSAP*

*Figure 3 – City of Allentown PSAP*

### City of Bethlehem

The City of Bethlehem is a city of the third class that is split between eastern Lehigh and western Northampton Counties. According to the United States Census Bureau, the city had a 2010 population of 74,982 with an estimated 2014 population of 75,135. Approximately 25% of the population resides within the Lehigh County portion of the city, with the rest residing within the Northampton County portion. The city has a land area of 19.10 square miles.

The City of Bethlehem's PSAP is located at 10 East Church Street, within the city's police department. The police department operates the PSAP. The PSAP has seven operating positions, and its minimum staffing is four telecommunicators during the day and evening hours and three telecommunicators at night. Access to the PSAP is controlled.

The PSAP CPE is a 7-position Cassidian Vesta Pallas system purchased in 2006. The city has had discussions with Allentown and Northampton County about joining their geo-diverse Airbus system as a remote. This is currently planned to take place in the first half of 2016.

For its radio system, the city uses a 3-site, 6-channel 800MHz Motorola Astro P25 Trunked Simulcast Digital radio system installed in 2008, but have signed a contract to upgrade to P25 IP, to be completed by April 2016. The radio infrastructure is Motorola GTR8000 based, with the sites interconnected by redundant fiber at city hall, East Mountain, and the city's radio shop. Microwave connectivity is being added to back up the fiber. Additionally, the city has 800MHz analog Quantar stations at the sites as a backup to the trunked system. The radio consoles at the PSAP are Motorola MCC7500 consoles, controlling 75 talk groups. In addition, there are 5 console positions at the radio shop as a backup center. Bethlehem has also had talks with Allentown about sharing the Motorola radio switch, which according to Motorola, is compatible with the newer Harris subscriber equipment in use in Allentown. Bethlehem has a NICELOG DLR logging recorder capable of recording 23 simultaneous voice calls from the radio system, and records phone traffic and CAD screen captures. The city's PSAP does not any room for expansion at its current facility.

The PSAP answered a total of 44,151 9-1-1 calls, 155,207 10-digit/non-emergency calls and dispatched 75,078 incidents in 2015.

*Figure 4 – City of Bethlehem PSAP*

*The remainder of this page left intentionally blank.*

*Figure 5 – City of Bethlehem PSAP*

### Lehigh County

Lehigh County is a county of the third class in east-central Pennsylvania. It is surrounded by the counties of Carbon, Schuylkill, Berks, Montgomery, Bucks and Northampton counties. According to the United States Census Bureau, the county had a 2010 population of 349,497, with an estimated 2014 population of 357,823. For the purposes of this study, subtracting the population of Allentown and 25% of the population of Bethlehem gives the county an approximate 2014 population of 219,936. The county has a land area of 345.17 square miles.

The Lehigh County PSAP is located on the 10<sup>th</sup> floor of 640 West Hamilton Street in Allentown. The equipment room for the PSAP is located on the 9<sup>th</sup> floor of the building. The PSAP has sixteen operating positions, and its minimum staffing is seven telecommunicators plus a supervisor during the day and evening hours, and six telecommunicators plus a supervisor at night. The building is owned by the county and access to the PSAP is controlled. The county's emergency management office and emergency operations center is located on the 8<sup>th</sup> floor of the building. The first floor of the building houses a restaurant, and various businesses occupy the other floors of the building.

The PSAP's CPE is a 16-position Cassidian Meridian switch which is nearing end-of-life and must be replaced. The county has also had discussions with Allentown and Northampton County about joining their geo-diverse Airbus system as a remote. There is no date currently set for this to take place.

Lehigh County's radio system is primarily a mixed simulcast/conventional 11 site VHF system consisting of TAIT simulcast stations and QUANTAR conventional channels. It is connected by a redundant microwave system in a north/south loop configuration updated as of 2012, with one site connected by fiber, and one site connected by an unlicensed microwave hop. The county also has a 5-site 75MHz-linked 'multicast' VHF/UHF paging system. Dispatching is done by a 2009 Zetron ACOM console, with 16 positions in the 9-1-1 center and 2 more in the training room. The county has a NICE NLR2000 logging recorder, purchased in 2009.

The County of Lehigh's PSAP, although it has available console positions at its current location, does not have room for expansion on the floor of the building that is located on without moving offices, conference and ancillary rooms to another floor.

The PSAP answered a total of 90,011 9-1-1 calls, 190,604 10-digit/non-emergency calls and dispatched 134,145 incidents in 2015.

*Figure 6 – Lehigh County PSAP*

*Figure 7 – Lehigh County PSAP*

### Northampton County

Northampton County is a county of the third class in east-central Pennsylvania. It is surrounded by the counties of Monroe, Lehigh and Bucks County in Pennsylvania, and New Jersey on its eastern border. According to the United States Census Bureau, the county had a 2010 population of 297,735, with an estimated 2014 population of 300,654. For the purposes of this study, subtracting 75% of the population of Bethlehem gives the county an approximate 2014 population of 244,402. The county has a land area of 369.67 square miles.

The Northampton County PSAP is located in the county's emergency management services facility at 100 Gracedale Avenue, just west of the Borough of Nazareth, in the center of the county. The PSAP has fourteen operating positions, and its normal staffing is nine telecommunicators plus a supervisor. Its minimum staffing is seven telecommunicators plus a supervisor. The county's emergency management office and emergency operations center are co-located in the facility. The building is owned by the county and access to the PSAP is controlled.

The PSAP's CPE switch is common with the Allentown Airbus DS Vesta geo-diverse system, with 14 operating positions, and 5 deployable Command Post positions.

For its radio system, Northampton County utilizes a ‘grandfathered’ 500MHz, 11 site, 30 channel - Harris conventional analog simulcast radio system with receiver voting, using a hybrid MASTRIII/MASTR V radio infrastructure. The sites are all interconnected by a redundant 100MB/s minimum fiber ring network from Service Electric. The future of this radio system is in jeopardy due to the FCC possibly recalling the 500MHz spectrum for use with digital broadcast systems (DTV). The radio system is controlled by a Moducom 15 - position console, with the position PCs recently upgraded (2015). The county utilizes a NICE Perform version 3.2 model logging recorder, purchased in 2010. The PSAP has space available to add more consoles by rearranging the current layout of the existing consoles. There is also land available for expansion of the PSAP. A plan for expansion of the PSAP and emergency management operations was developed in 2013 but did not move forward. The estimated price of the expansion at the time was \$2.64 million.

The PSAP answered a total of 101,821 9-1-1 calls, 295,221 10-digit/non-emergency calls and dispatched 213,088 incidents in 2015.

*Figure 8 – Northampton County PSAP*

*Figure 9 – Northampton County PSAP*

### **Call and Dispatch Summary**

| <b>2015 Call and Dispatch Totals</b> |                          |  |                         |
|--------------------------------------|--------------------------|--|-------------------------|
| <b>PSAP</b>                          | <b>Total 9-1-1 Calls</b> | <b>Total 10-Digit/Non-emergency Calls (Inbound and Outbound)</b> | <b>Total Dispatches</b> |
| Allentown                            | 95,715                   | 178,663  | 156,680                 |
| Bethlehem                            | 44,151                   | 155,207  | 75,078                  |
| Lehigh                               | 90,011                   | 190,604  | 134,145                 |
| Northampton                          | 101,821                  | 295,221  | 213,088                 |
| <b>Totals -</b>                      | <b>331,698</b>           | <b>826,812</b>   | <b>578,991</b>          |

*Figure 10 – 2015 Call and Dispatch Totals*

In addition to taking telephonic 9-1-1 calls, all four PSAPs accept text-to-911 messages via the GEM 9-1-1 web portal product from TCS. The number of text-to-911 messages received was not reported.

### **Ancillary Services**

All of the PSAPs in the Lehigh Valley, similar to all the PSAPs in Pennsylvania, provide ancillary services to departments outside of the 9-1-1 purview. In addition to being the day time communications services for many county and city departments, all of the PSAPs provide after-

hours contact services for many county, city and outside agencies. An overview of the ancillary services provided by the PSAPs, as collected during the interviews, is below.

### City of Allentown

Along with call-taking and dispatching for emergency services, the Allentown PSAP receives call for and dispatches the Allentown Parking Authority, Animal Control, and Public Works for the city. The PSAP also monitors the 154 video cameras throughout the city, 8 video feeds from the PennDOT camera network and 4 video feeds from Muhlenburg College. The police and fire department both commented on the increased public safety that the monitoring of the cameras provides to the citizens of Allentown. The PSAP uses the cameras for supplementary information gathering when an incident is received. The PSAP has used cameras to obtain more information than callers can provide about an incident, and used that information to dispatch the appropriate levels of response to the incident. The PSAP has also observed illegal activity taking place on camera and dispatched law enforcement, which has resulted in successful outcomes. This type of operation is a level of Next Generation 9-1-1, which involves getting data to PSAPs in ways that had not been previously possible. Newer CAD systems can have camera systems integrated into them as a layer on their mapping systems, allowing for video images to be brought up quickly if there is a camera near the location of the reported incident. The camera system can also be used as an evidence source for law enforcement and the fire department.

The PSAP provides Knox Box information, hazardous materials information and pre-plans to emergency responders via mobile data terminals. It receives parking complaints and dispatches the Parking Authority, monitors alarms for city facilities and takes after hours reports for the Lehigh County Authority. The PSAP also provides notification services for hazardous materials teams, dive team and the ERT team.

### City of Bethlehem

Along with call-taking and dispatching for emergency services, the Bethlehem PSAP receives call for and dispatches the city public works department and parking authority, and handles calls on snow emergency lines during the winter. The PSAP also monitors and dispatches for school district security, and handle calls for Moravian College public safety and Lehigh University police. The PSAP logs arrest warrants, which are tied into the city's CAD system, so if a person's name comes up on any kind of incident in the CAD system, if there is an outstanding arrest warrant for that person, the dispatcher will be notified.

The PSAP operates a mobile communications unit that is used for dispatching on the scene of special events that are held in the city and for DUI checkpoints operated by the Bethlehem Police Department. Like the Allentown PSAP, the Bethlehem PSAP monitors the law enforcement

cameras located throughout the city and housing authority cameras, as well as the cameras at Lehigh University. The PSAP also interfaces with the Northampton and Lehigh Counties' District Attorney's Offices and Coroner's Office, Juvenile and Adult Probation Offices, Sheriffs' Offices, the counties' prisons, Domestic Relations Offices, and the counties' roads and bridges departments. In addition, the PSAP interfaces with state agencies such as: PennDOT, Pennsylvania Fish Commission, Pennsylvania Game Commission, Pennsylvania Department of Forestry, Pennsylvania Department of Environmental Protection, and the Pennsylvania Bureau of Mines.

### Lehigh County

The Lehigh County PSAP is the after-hours contact for all county departments, including the coroner's office, adult and juvenile probation, children and youth, district attorney's office, magistrates and sheriff's department. The PSAP also answers after-hours calls for municipal police departments that do not operate on a 24-hour basis. In addition, the PSAP monitors alarms from banks and hospitals. The PSAP will also interface with municipal public works departments when calls are received for snow removal, trees down, stop light issues, and other municipal public works issues, and will dispatch appropriate public works departments when necessary. The PSAP interfaces with the Pennsylvania State Police Troop M barracks for law enforcement issues.

### Northampton County

The Northampton County PSAP is the after-hours contact for county departments including: children and youth, adult and juvenile probation, and sheriff's office. It is the main contact for the county coroner's office. The PSAP keeps a listing of issued dog licenses and the animal shelter has the PSAP's number on their telephone voice system for after-hours contact. The PSAP will contact the SPCA as necessary and dispatches the Lehigh Valley County Animal Response Team (CART) for the whole Lehigh Valley. Warrants are maintained by the PSAP, and municipal police departments will forward their administrative phone lines to the PSAP after hours. The PSAP is also responsible for tracking of prison transports, as well as Sheriff, Constable, and Magistrate notifications along with DUI Center notifications and call outs. The PSAP routinely interfaces with the Pennsylvania State Police Troop M barracks for law enforcement issues. Building security and video systems, and critical infrastructure are monitored at the PSAP.

The PSAP will interface with municipal public works departments when calls are received for snow removal, trees down, stop light issues, and other municipal public works issues, and will dispatch appropriate public works departments when necessary. Occasionally the PSAP will receive alarms for municipal sewer and water systems. The staff will call out Easton fire

department and police department personnel if they are needed for a large incident. In addition, the PSAP will answer calls for the City of Easton's Block Watch program, and similar programs in other large municipalities.

The PSAP interfaces with a lot of state agencies for 9-1-1 and emergency management purposes, including PennDOT, PEMA and the Department of Environmental Protection (DEP). Staff advised that they conduct a lot of situational awareness, notifications and resource management. Emergency Alerting System (EAS) messages are sent from the PSAP as needed, along with reverse notifications for public information. The PSAPs 9-1-1 shift supervisors serve as the county's emergency operations center (EOC) watch officer when the EOC is at level 4, which makes them responsible for initiating, reporting and updating PEMA through Knowledge Center software. It was reported that forty to fifty percent of the work that the PSAP staff performs is contacting other agencies and referring callers to other local and county agencies.

### **Interviews Summary**

In order to obtain needed information and get an understanding of the issues and concerns regarding consolidation and regionalization, MCM conducted interviews with staff and elected officials from the cities of Allentown and Bethlehem, and Lehigh and Northampton Counties, along with field users from the two cities. The interviews were conducted from October 14, 2015 through November 5, 2015. The face-to-face interview sessions were very productive in terms of gathering detailed, specific information directly from PSAP personnel, elected and appointed officials, as well as field users. The participants were eager to provide as much information as possible as they understood the importance of the outcome of this project as it relates to providing 9-1-1 and other services to the resident and visitors of the Lehigh Valley.

The questions used to collect data from the participants were developed by MCM and reviewed and revised by the project team. The questions were designed to collect information on: the services provided by the PSAPs, the perspectives of the interviewees on the benefits, concerns and considerations of regionalization and consolidation; the current systems, infrastructure and space capabilities of each PSAP; the governance and funding of a consolidated or regional PSAP; and the impact of consolidation or regionalization on the citizens and agencies in the Lehigh Valley.

Twenty-nine questions were used for the interviews. Not all of the questions were applicable to each interviewee. The questions were grouped into five categories, depending on the role of the person being interviewed: PSAP coordinators, PSAP staff, elected and appointed officials, field personnel and human resources directors. The project group reviewed and approved the categories. Not all respondents had answers for all of the questions that were asked of them.

---

The full list of questions utilized for the interviews is listed below:

1. Name
2. What is your current role? (This may be answered by the interviewer)
3. What services does the PSAP provide for your department/agency?
4. Do you have any experience with any type or form of regionalization or consolidation practices?
5. Have you thought about the future of your organization and how a regionalization or consolidation of services could benefit your community?
6. Do you believe regionalization or consolidation should be considered?
7. From your perspective, do you feel there are benefits of regionalization and/or consolidation?
8. What obstacles and challenges to a regionalization or consolidation effort can be expected?
9. From your perspective, do you believe there are any negative effects that will result in considering any regionalization or consolidation efforts?
10. Does consolidation make sense for your area from a service level, political, technological and financial perspective?
11. What do you see as the goals for any regionalization or consolidation? (Reduce costs, improve efficiency, etc.)
12. In your opinion, does your PSAP have the resources available to effectively operate into the future?
13. Is the current infrastructure (equipment, technology, connectivity) able to be maintained long term?
14. Does your PSAP have room for expansion and possess the capability of assuming higher call volumes and dispatching services?
15. Are calls frequently being transferred among or between agencies?
16. Would consolidation reduce or eliminate the transfer of 9-1-1 calls between agencies and improve response times and lower liability?
17. Do multiple agency responses that are coordinated between and among multiple dispatch centers?
18. Would consolidation improve incident coordination and interoperability?
19. In considering of a regionalization or consolidation of services, do you have any strong reservations or concerns?
20. What in your opinion are the most important considerations that need to be made when considering either regionalization or consolidation?
21. Other than call taking and dispatching, what other services do your telecommunicators provide?
22. If consolidation occurs, do you think that one of existing PSAP can fill the facility needs or is construction required?

23. Is there government land available if a new facility is necessary?
24. Does your PSAP take non-emergency seven-digit calls for other agencies? Are there services offered for other governmental operations and not-for-profit agencies?
25. If a consolidation occurs, how do you foresee governance and funding of the consolidated PSAP operating?
26. What impact do you believe a consolidation/regionalization will have on the services provided to the citizens?
27. Have you considered how your organization would provide services and responsibilities currently managed by your 9-1-1 center, that may not be provided in a consolidated or regional environment?
28. Have you considered how your organization would provide services and responsibilities in a consolidated or regional environment that are currently performed by another 9-1-1 center that may not be provided by your 9-1-1 center today?
29. Any other comments?

MCM staff members interviewed 41 individuals, as listed below:

City of Allentown

Parking Authority Executive Director  
Mayor  
Lead Dispatcher  
Superintendent of Communications  
City of Allentown EMS Operations Manager  
Interim Director of Public Works  
Police Chief  
Fire Chief  
City Human Resources Director

Lehigh County

Director of Emergency Services  
Dispatch Supervisors (3)  
Dispatcher  
9-1-1 CAD Coordinator  
9-1-1 Operations/Training Coordinator  
9-1-1/Communications Director  
County Human Resources Director  
Director of General Services  
Lehigh County Commissioner

---

City of Bethlehem

Fire Chief  
Police Chief  
Deputy Police Chief  
Mayor  
9-1-1 Supervisor  
EMS Director  
City Council President  
Director of Budget and Finance  
Business Administrator  
Director of Communications

Northampton County

County Executive  
Director of Administration  
County Human Resources Director  
PSAP Coordinator and Director  
9-1-1 Quality Assurance Manager  
9-1-1 Operations & Training Manager  
9-1-1 Shift Supervisor  
Systems Manager  
Dispatcher and Union President  
Deputy Director for 9-1-1  
County Council President

All of the respondents cooperated fully and were thoughtful in their responses to the questions. In undertakings such as this, because of their varied roles, backgrounds and experiences, there is always a challenge to take the input of the participants and develop a consensus as to their preferences and approaches to the future of 9-1-1 service in the Lehigh Valley.

There were a number of common themes that emerged during the interviews.

A concern that was stated most frequently from the representatives of all four entities was that the current level of service that is being provided to the citizenry must be maintained at the same if not an improved level. Almost all of the interviewees stressed the importance of this. And it was generally noted that a high service must be visible to the public as well as the staff. City residents may believe they are losing services if the city PSAPs are absorbed by the counties, and

the county residents may think that the extra work load placed upon the county staff will impact the services that they are currently being provided. The field agencies in the cities stressed that the cities' PSAPs are integral parts of their operations, and any loss in the level of service from their PSAPs would be detrimental to their operations, and would possibly result in higher costs if the cities would need to have those service provided by another city department or entity.

Cost savings through regionalization or consolidation was a common thread throughout the interviews also. It is expected that by combining services, savings will be realized through lower maintenance costs, bulk purchasing, the elimination of backup facilities, decreased duplication of services, and the possible reduction of overall staffing.

With the uncertainty of what the future holds, there was understandably a large concern voiced about the security of the jobs for those that are currently employed by the four entities. This concern was high among PSAPs staff members. Staff members were concerned that competent, experienced staff would lose their jobs due to elimination of positions during consolidation or regionalization, or that staff may be lost over resistance to change or having to learn new protocols, service requirements and areas. Along with this, there were concerns about how union integration would take place. The cities of Allentown, Bethlehem and the County of Northampton are union shops, while Lehigh County is not. Uncertainty over maintenance of current salary and seniority levels was a common thread. In addition, it was noted by several interviewees that the potential for a longer training period for new hires, and retraining for current employees would be needed as new or unfamiliar protocols, departments, units and standard operating procedures may need to be learned. A bigger learning curve was expected, and there was concern about the level of service that would be provided as that learning curve was being negotiated by current employees.

The availability and need for sufficient space was discussed during the interview process. Very few of the interviewees fully believed that they currently have enough space to house a regional facility that would combine the four PSAPs. Northampton and Lehigh Counties and the City of Bethlehem all noted that they own land that would be available for either expansion of their current facilities or construction of new facilities. Lehigh County officials expressed belief that their current facility would be able would easily be able to handle the additional staff needed to absorb the City of Allentown's PSAP, and possibly a large regional center. The PSAP staff, however, had concerns about the ability of the current space to hold more staff, citing current lack of sufficient ancillary space and facilities (including bathroom facilities and break rooms), and potential noise issues. The staff also had concerns about the location of the current facility. They expressed issues about the security of the building with public access to the lower floors. Several staff members citing safety concerns related to parking and having to walk to the building from the parking garage through the downtown area, especially at night.

Northampton County staff noted that their facility currently had room to handle increased staffing, and that there was room for expansion of the building at the current site if necessary. The City of Bethlehem representatives advised that the city has a centrally-located, former U.S. Army Reserve Center (the Wilson Kramer facility) that was available to be renovated for a consolidated or regional PSAP.

The overall concept of what should be the end result (consolidation or regionalization) varied among the interviewees. Several did not want to see any change from the current operations, but understood that something must be done in the future. For the most part, the county representatives favored a consolidation approach, with the cities either combining with or being absorbed by the counties, while the city representatives favored a regional approach, with all four PSAPs eventually being combined into one large, regional PSAP. Some county staff were not opposed to the idea of a regional PSAP, but were concerned about moving in that direction too quickly. There were also concerns about dispatching for such a large geographic area, and the possibility of errors inherent with that. A few county representatives, however, believed that there were several advantages to a large regional PSAP, including creating more opportunities and a greater career track for staff members in a larger organization.

A question that was commonly broached by the interviewees was the issue of how different dispatch protocols would be integrated. Would PSAP personnel need to learn new protocols, or would they be changed, resulting in field units needing to adapt? Unit numbering was also raised as an issue. Some of the interviewees noted that there is duplication of some unit numbering that will need to be addressed in order to avoid confusion and errors once a consolidation or regionalization is undertaken.

Governance structure was discussed during the interviews, and the concepts of what should be put into place varied. Thoughts ranged from total county control to joint supervision. Mentioned several times was the notion of an authority or board to oversee the consolidated or regionalized PSAPs. Several representatives stated that it is crucial for the state and PEMA to provide guidance on this issue as, well as funding for the whole process. The belief was, that since the legislature was forcing either consolidation or regionalization to take place, that the state should cover all costs associated with carrying it out.

The need for a comprehensive plan and a well-thought-out process for any consolidation or regionalization was stressed by several interviewees. Any changes to the current operations that are rushed are believed by the respondents to be a recipe for problems and errors, which would jeopardize public safety.

Several interviewees believed that consolidation and/or regionalization could lead to more efficient and effective operations by the PSAPs. It was anticipated that cutting down on call transfers along with combined dispatching would result in time savings, fewer dispatch errors or issues and streamlined operations.

This a summary of the main themes that were repeated during the interview process. A compilation of all of the interview responses can be found in Appendix A. The responses are categorized by city/county, but are not listed in any specific order that correlates them to any specific interviewee.

*The remainder of this page left intentionally blank.*

## Staffing Analysis

### Understaffing

While it may seem to be common sense, and frequently suggested that, lives are put at risk if communications center staffing is not adequate. Staffing a 9-1-1 center is a serious business.

Various forms of media have reported that 9-1-1 centers operate twenty-four hours a day, 365 days a year often times requiring telecommunicators to work mandatory overtime.

There are 9-1-1 centers across our country that have been forced to defend themselves through legal proceedings due to errors or omissions that have occurred often times due to various staffing issues which include lack of adequate staffing.

Best practices for 9-1-1 centers continue to evolve and *must* focus on staffing. The focus typically is centered on the number of calls a center must process, the amount of time it takes to process the calls and the amount of time it takes a dispatcher to perform all other functions.

A frequent analysis will help to avoid being the center of negative media coverage, legal action and aid to avoid an incident that undermines public confidence in your 9-1-1 center operations.

The purpose of this staffing study is to provide an analysis of the current staffing levels and to suggest the number of telecommunicators needed for either a consolidation or regionalization of services with the intent to anticipate and avoid potential pitfalls.

### Change Management

In consideration of the impending decisions forthcoming with regard to either a consolidation or regionalization the time is now to manage change. For reference, a number of best practices for change management for personnel can be found in Appendix B.

## *Human Capital*

As the field of human resources continues to advance, gone are the days of referring to the employees of an organization as: personnel.

While history continues to serve as a guide, advances have made it possible for us to understand that whatever it was that got us to where we are today is no longer sufficient to keep us there.

As you read through the forthcoming recommendations please remember your number one asset, your human capital.

You could take away all of the equipment necessary for your PSAP and you could rebuild it, however, without your human capital, you are left with nothing.

---

## *Staffing Overview*

Each Public Safety Answering Point (PSAP) was asked to submit staffing requirements for each of their facilities. While there are various tools to provide for a broad analysis of the staffing trends, MCM is of the opinion that the best evidence for how a PSAP is staffed is to utilize the historical staffing trends for each PSAP.

With the requirements established by the Pennsylvania Emergency Management Agency (PEMA), 4 PA code chapter 120d. 9-1-1 performance review and quality assurance standards as well as the broad spectrum of information available to the 9-1-1 coordinators, the historical staffing for each PSAP was used for the purpose of this analysis.

Each PSAP leader from all four PSAP's provided historical and projected anticipated leave which included but was not limited to:

- Average vacation and holiday leave
- Average Personal leave
- Average Training leave
- Average military, FMLA leave, etc.
- Average Lunch breaks
- Average other activities – meetings, light duty, special assignments etc.

After lengthy discussions the PSAP leaders recommended a total of **1680** available hours should be used for the APCO RETAINS formula out of a total of 2080 hours worked assuming a 40-hour work week for this staffing analysis.

In an effort to substantiate the historical staffing levels for each PSAP, MCM referenced the Association for Public Safety Communications Officials (APCO), Project Retains, Staffing Workbook, August 2005. This resource has become a credible source of information for PSAPs worldwide. The workbook is the result of research facilitated by the University of Denver Research Institute.

Sample APCO Retains formula:

- A.  $12 \text{ positions} \times 24 \text{ hours per day} \times 7 \text{ days per week} \times 52 \text{ weeks} = 104,832 \text{ hours per year requiring coverage}$
- B.  $1680 \text{ net available work hours per telecommunicator (assuming 2,080 potential work hours less 400 hours of unavailable time for sick leave, vacation, breaks/meal, and personal days).}$
- C.  $104,832 \div 1,680 = 62.4 \text{ rounded (62) Full-time telecommunicators.}$

This formula was applied to each PSAP's staffing levels.

### Allentown

Allentown typically staffs their PSAP with an average of five (5) telecommunicators per shift.

- $5 \text{ positions} \times 24 \text{ hours per day} \times 7 \text{ days per week} \times 52 \text{ weeks} = 43,680$
- $1680 \text{ net available work hours per telecommunicator (assuming 2,080 potential work hours less 400 hours of unavailable time for sick leave, vacation, breaks/meal, and personal days).}$

$43,680 \div 1,680 = 26 \text{ full-time telecommunicators}$

| PSAP      | Total Full-time Telecommunicators | APCO RETAINS Recommended Full-time |
|-----------|-----------------------------------|------------------------------------|
| Allentown | 24                                | 26                                 |

Figure 11 – Recommended Staffing Level for the City of Allentown's PSAP

As indicated, the APCO RETAINS formula suggests a total of 26 telecommunicators would be needed to adequately staff the PSAP. Allentown has reported that at the time of this study they employed 24 full-time telecommunicators, 5 full-time shift supervisors, plus an Operations Manager.

For calendar year 2014, Allentown processed a total of 277,686 calls, an average of 761 calls per day. Considering it takes 15 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 50.7 for an average of 6.33 calls per hour.

For calendar year 2015, Allentown processed a total of 274,378 calls, an average of 751 calls per day. Considering it takes 15 telecommunicators per day to staff the 9-1-1 center, the average

number of calls a telecommunicator would handle in an 8-hour period would be 50.1 for an average of 6.26 calls per hour per telecommunicator.

| PSAP      | Year | Total Calls | Average per day | Average for dispatcher 8hrs | Average per hour |
|-----------|------|-------------|-----------------|-----------------------------|------------------|
| Allentown | 2014 | 277,686     | 761             | 50.7                        | 6.33             |
| Allentown | 2015 | 274,378     | 751             | 50.1                        | 6.26             |

*Figure 12 – Call Breakdown for the City of Allentown’s PSAP*

### Bethlehem

Bethlehem typically staffs their PSAP with an average of 4 telecommunicators per shift. Typically, four (4) on day shift and afternoon and three on midnight (average 3.6, rounded to four (4)).

- 4 positions x 24 hours per day x 7 days per week x 52 weeks = 34,944
- 1680 net available work hours per telecommunicator (assuming 2,080 potential work hours less 400 hours of unavailable time for sick leave, vacation, breaks/meal, and personal days).

$34,944 \div 1,680 = 20.8$  (rounded to: 21) 21 full-time telecommunicators

As indicated, the APCO RETAINS formula suggests a total of 21 telecommunicators would be needed to adequately staff the PSAP. Bethlehem has reported that at the time of this study they employed 16 full-time, seven (7) part-time telecommunicators and four (4) supervisors.

| PSAP      | Total Full-time | Total Part-time | Total Supervisors | APCO RETAINS Recommended Full-time |
|-----------|-----------------|-----------------|-------------------|------------------------------------|
| Bethlehem | 16              | 7               | 4                 | 21                                 |

*Figure 13 – Recommended Staffing Level for the City of Bethlehem’s PSAP*

For calendar year 2014, Bethlehem processed a total of 204,092 calls, an average of 559 calls per day. Considering it takes 11 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 50.8 for an average of 6.35 calls per hour.

For calendar year 2015, Bethlehem processed a total of 199,358 calls, an average of 546 calls per day. Considering it takes 11 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 49.6 for an average of 6.20 calls per hour per telecommunicator.

| PSAP      | Year | Total Calls | Average per day | Average for dispatcher 8hrs | Average per hour |
|-----------|------|-------------|-----------------|-----------------------------|------------------|
| Bethlehem | 2014 | 204,092     | 559             | 50.8                        | 6.35             |
| Bethlehem | 2015 | 199,358     | 546             | 49.6                        | 6.20             |

*Figure 14 – Call Breakdown for the City of Bethlehem’s PSAP*

### Lehigh

Lehigh typically staffs their PSAP with an average of 7 telecommunicators per shift. Typically, four (7) on day shift and afternoon and six (6) on midnight (average 6.6 rounded to seven (7)).

- 7 positions x 24 hours per day x 7 days per week x 52 weeks = 61,152
- 1680 net available work hours per telecommunicator (assuming 2,080 potential work hours less 400 hours of unavailable time for sick leave, vacation, breaks/meal, and personal days).

$61,152 \div 1,680 = 36.4$  (rounded to: 36) 36 full-time telecommunicators

As indicated, the APCO RETAINS formula suggests a total of 36 telecommunicators would be needed to adequately staff the PSAP. Lehigh has reported that at the time of this study they employed 28 full-time, five (5) part-time telecommunicators and five (5) supervisors.

| PSAP   | Total Full-time | Total Part-time | Total Supervisors | APCO RETAINS Recommended Full-time |
|--------|-----------------|-----------------|-------------------|------------------------------------|
| Lehigh | 28              | 5               | 5                 | 36                                 |

*Figure 15 – Recommended Staffing Level for the Lehigh County PSAP*

For calendar year 2014, Lehigh processed a total of 348,247 calls, an average of 954 calls per day. Considering it takes 21 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 45.4 for an average of 5.67 calls per hour.

For calendar year 2015, Lehigh processed a total of 335,949 calls, an average of 920 calls per day. Considering it takes 21 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 43.8 for an average of 5.47 calls per hour.

| PSAP   | Year | Total Calls | Average per day | Average for dispatcher 8hrs | Average per hour |
|--------|------|-------------|-----------------|-----------------------------|------------------|
| Lehigh | 2014 | 348,247     | 954             | 45.4                        | 5.67             |
| Lehigh | 2015 | 335,949     | 920             | 43.8                        | 5.47             |

*Figure 16 – Call Breakdown for the Lehigh County PSAP*

### Northampton

Northampton typically staffs their PSAP with an average of 8 telecommunicators per shift.

- 8 positions x 24 hours per day x 7 days per week x 52 weeks = 69,888
- 1680 net available work hours per telecommunicator (assuming 2,080 potential work hours less 400 hours of unavailable time for sick leave, vacation, breaks/meal, and personal days).

$69,888 \div 1,680 = 41.6$  (rounded to: 42) 42 full-time telecommunicators

As indicated, the APCO RETAINS formula suggests a total of 42 telecommunicators would be needed to adequately staff the PSAP. Northampton has reported that at the time of this study they employed 44 full-time and six (6) supervisors.

| PSAP        | Total Full-time | Total Part-time | Total Supervisors | APCO RETAINS Recommended Full-time |
|-------------|-----------------|-----------------|-------------------|------------------------------------|
| Northampton | 44              | 0               | 6                 | 42                                 |

*Figure 17 – Recommended Staffing Level for the Northampton County PSAP*

For calendar year 2014, Northampton processed a total of 407,721 calls, an average of 1,117 calls per day. Considering it takes 24 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 46.5 for an average of 5.82 calls per hour.

For calendar year 2015, Northampton processed a total of 398,325 calls, an average of 1,091 calls per day. Considering it takes 24 telecommunicators per day to staff the 9-1-1 center, the average number of calls a telecommunicator would handle in an 8-hour period would be 45.4 for an average of 5.68 calls per hour.

| PSAP        | Year | Total Calls | Average per day | Average for dispatcher 8hrs | Average per hour |
|-------------|------|-------------|-----------------|-----------------------------|------------------|
| Northampton | 2014 | 407,721     | 1,117           | 46.5                        | 5.82             |
| Northampton | 2015 | 398,325     | 1,091           | 45.4                        | 5.68             |

*Figure 18 - Call Breakdown for the Northampton County PSAP*

Current Staffing levels all PSAP's:

| County      | Total Full-time | Total Part-time | Total Supervisors | APCO RETAINS Recommended Full-time |
|-------------|-----------------|-----------------|-------------------|------------------------------------|
| Allentown   | 24              |                 | 5                 | 26                                 |
| Bethlehem   | 16              | 7               | 4                 | 21                                 |
| Lehigh      | 28              | 5               | 5                 | 36                                 |
| Northampton | 44              |                 | 6                 | 42                                 |

*Figure 19 – Current and Recommended Staffing Levels*

Call volumes for all PSAP's

| PSAP        | Year | Total Calls | Average per day | Average for dispatcher 8hrs | Average per hour |
|-------------|------|-------------|-----------------|-----------------------------|------------------|
| Allentown   | 2014 | 277,686     | 761             | 50.7                        | 6.33             |
| Allentown   | 2015 | 274,378     | 751             | 50.1                        | 6.26             |
| Bethlehem   | 2014 | 204,092     | 559             | 50.8                        | 6.35             |
| Bethlehem   | 2015 | 199,358     | 546             | 49.6                        | 6.35             |
| Lehigh      | 2014 | 348,247     | 954             | 45.4                        | 5.67             |
| Lehigh      | 2015 | 335,949     | 920             | 43.8                        | 5.47             |
| Northampton | 2014 | 407,721     | 1,117           | 46.5                        | 5.82             |
| Northampton | 2015 | 398,325     | 1,091           | 45.4                        | 5.68             |

*Figure 20 – 2014 and 2015 Call Volume Levels by PSAP*

Based on the call volume analysis, the average calls per hour for all dispatchers is 5.99 calls per hour, rounded to 6.

Overall, it is the opinion of MCM that all four PSAP's are managed effectively with the analysis substantiating the historical staffing models for each PSAP are valid.

### Number of PSAP Positions staffed per shift

| Number of PSAP Positions Staffed Per Shift |          |           |          |         |          |                    |
|--|----------|-----------|----------|---------|----------|--------------------|
| PSAP                                       | Daylight | Afternoon | Midnight | Average | Rounded  | Consoles Available |
| Allentown                                  | 5        | 5         | 5        | 5       | <b>5</b> | 6                  |
| Bethlehem                                  | 4        | 4         | 3        | 3.6     | <b>4</b> | 7                  |
| Lehigh                                     | 7        | 7         | 6        | 6.6     | <b>7</b> | 16                 |
| Northampton                                | 8        | 8         | 8        | 8       | <b>8</b> | 14                 |
| <b>Totals</b>                              | 24       | 24        | 22       | 23.2    | 24       |                    |

### Consolidation or Regionalization recommendations

The potential scenarios consisting of a consolidation or regionalization approach require a specific number of telecommunicators to meet the minimum staffing levels. The forthcoming recommendations are specific to the number of telecommunicators needed to staff the various options for either a regionalization or consolidation approach.

As stated previously it is evident that all PSAP's have been managed effectively, in regards to staffing levels, based on the analysis regarding the staffing levels and call volumes.

In addition, further evaluations must be facilitated to determine the number of positions needed to predict the growth each PSAP may experience after a consolidation or regionalization approach - for example, the number of PSAP positions that will be needed to handle an influx of a higher call volume during times of bad weather and/or a large scale community event that would require additional staff to operate the PSAP.

For a regionalization of all four PSAPs, the minimum number of full-time staff required to staff the organization would be 125 full-time telecommunicators. The number of minimum PSAP positions needed to operate would be 24.

| Minimum number of telecommunicators needed to staff the PSAP |                                    |
|--|------------------------------------|
| PSAP   | APCO RETAINS Recommended Full-time |
| <b>Regionalization</b>                                       | 125                                |

*Figure 22 – Regionalization Staffing: Allentown, Bethlehem, Lehigh and Northampton*

| Number of PSAP Positions needed per shift |          |           |          |         |         |
|---|----------|-----------|----------|---------|---------|
| PSAP                                      | Daylight | Afternoon | Midnight | Average | Rounded |
| <b>Regionalization</b>                    | 24       | 24        | 22       | 23.2    | 24      |

*Figure 23 – Shift Staffing for Regionalization*

For a consolidation between the city of Allentown and Lehigh County, the minimum number of full-time staff required to staff the organization would be 62 full-time telecommunicators. The number of minimum PSAP positions needed to operate would be 12.

| Minimum number of telecommunicators needed to staff the PSAP |                                    |
|--|------------------------------------|
| PSAP   | APCO RETAINS Recommended Full-time |
| <b>Consolidation A</b>                                       | 62                                 |

*Figure 24 - Consolidation A Staffing: Allentown and Lehigh*

| Number of PSAP Positions needed per shift |          |           |          |         |         |
|---|----------|-----------|----------|---------|---------|
| PSAP                                      | Daylight | Afternoon | Midnight | Average | Rounded |
| <b>Consolidation A</b>                    | 12       | 12        | 11       | 11.6    | 12      |

*Figure 25 - Consolidation A Shift Staffing: Allentown and Lehigh*

For a consolidation between the city of Bethlehem and Northampton County, the minimum number of full-time staff required to staff the organization would be 63 full-time telecommunicators. The number of minimum PSAP positions needed to operate would be 12.

| Minimum number of telecommunicators needed to staff the PSAP |                                    |
|--|------------------------------------|
| PSAP   | APCO RETAINS Recommended Full-time |
| <b>Consolidation B</b>                                       | 63                                 |

- Association for Public Safety Communications Officials (APCO), Project Retains, Staffing Workbook, August 2005. <http://www.apcointl.com>
- NENA PSAP Staffing Survey Report, created under the auspices of the NENA SWAT initiative by L. Robert Kimball & Associates and 9-1-1 SME Consulting. Includes the results of a survey of 70 PSAPs, serving populations less than 140,000 and a staffing formula worksheet. Available at: <http://www.nena.org>

Staffing and Retention Toolkit, available on the APCO website. Built as a companion to the Effective Practices Guide, the Toolkit contains three compartments: Staffing, Retention, and Survey. These tools are designed to make it easy for managers to either plug in their numbers or collect the data needed to assess employee satisfaction, calculate retention rates over time, and estimate staffing needs. The tools are free but registration is required. Follow the links to 9-1-1 Available at: <http://www.apcointl.com>

## Financial Analysis

As a part of the study, MCM reviewed financial documentation provided by the PSAPs including 2014 and 2015 budgets, regional shared services assessments, annual reports to PEMA, funding applications to PEMA, and triennial PSAP plans. The intent of the review was to determine current expenditures per PSAP along with potential cost savings. As noted in the beginning of this report, exact “item-by-item” comparisons of all of the PSAPs’ financial documentation was not possible as not all budgeted line items were consistent across all four PSAPs’ documentation. Multiple items may be listed as one line item on one PSAP’s budget, while they were listed individually on another’s. MCM made every effort to make comparisons of the budgets and other documentation as sound as possible.

### Budgets

| PSAP            | 2014 Budget            | 2015 Budget         |
|-----------------|------------------------|---------------------|
| Allentown       | \$3,369,688.00         | \$3,165,958         |
| Bethlehem       | \$4,510,000.00         | \$4,685,000         |
| Lehigh          | \$4,027,718.00         | \$3,499,991         |
| Northampton     | \$5,114,600.00         | \$5,245,900         |
| <b>Totals -</b> | <b>\$17,022,006.00</b> | <b>\$16,596,849</b> |

*Figure 28 – 2014 & 2015 PSAP Budgets*

### Non-Personnel Costs

MCM first reviewed the non-personnel costs reported by the PSAPs. The focus was on recurring expenses in excess of \$4,000 that did not need to be duplicated in a consolidated or regional setting. These expenses were mainly maintenance costs for equipment such as CAD, CPE and radio systems.

The following is a breakdown of the items reviewed:

#### CAD

CAD maintenance was one of the few categories that each PSAP had a common budget line item for. The average cost was **\$61,156.94**. The high was \$92,711.00 in Lehigh and the low was \$29,586.00 in Bethlehem. It should be noted some of these costs include hardware maintenance as well as software maintenance.

### Consoles

Three agencies reported console maintenance for an average of **\$73,160.30**. The high was \$80,465.48 in Northampton County and the low was \$67,405.43 in Lehigh County.

### CPE

All four agencies reported CPE maintenance costs for an average of **\$89,158.13**. The high was \$112,260.00 in Northampton County and the low was \$63,311.58 in Lehigh County.

### EMD

The average cost of the EMD program maintenance (ProQA et al) was **\$4,995.75**.

### GIS

Three agencies reported GIS costs at an average of **\$4,066.67**.

### Microwave

Two agencies reported microwave costs at an average of **\$30,742.40**

### Radio

The average radio maintenance costs were **\$135,035.00**. The high was \$220,310.70 in Northampton County and the low was \$48,000.00 in Bethlehem.

### Recorder

Three agencies reported recorder maintenance costs at an average of **\$36,924.86**

### Tower Rental

Lehigh County reported tower leases of \$7,200.00 annually and Northampton County reported tower leases of \$445,699.32.

### UPS

The average reported UPS maintenance costs were **\$6,075.75**.

### Telephone

Because of the diversity in the way each agency broke down their costs, the averages here are only shown as wireline and wireless (this distinction was needed prior to the passage of Act 12

of 2015). A complete breakdown can be found on the table below. These numbers include 9-1-1, ALI, RTLs, admin and any other related cost.

Wireline Average - \$103,662.43

Wireless Average - \$32,076.00

As noted above, the table below shows non-personnel expenditures that averaged more than \$4,000 annually. These numbers are based on the documentation provided.

| Description                     | Allentown           | Bethlehem           | Lehigh              | Northampton           | TOTAL                 | Average             |
|---------------------------------|---------------------|---------------------|---------------------|-----------------------|-----------------------|---------------------|
| CAD Maintenance                 | \$64,806.60         | \$29,586.00         | \$92,771.00         | \$57,464.14           | \$244,627.74          | \$61,156.94         |
| Computers - Software            |                     | \$17,763.00         |                     |                       | \$17,763.00           | \$17,763.00         |
| Connectivity                    | \$7,195.68          |                     |                     | \$171,060.00          | \$178,255.68          | \$89,127.84         |
| Console Maintenance             | \$0.00              | \$71,610.00         | \$67,405.43         | \$80,465.48           | \$219,480.91          | \$73,160.30         |
| CPE Maintenance                 | \$63,311.58         | \$86,098.00         | \$94,962.95         | \$112,260.00          | \$356,632.53          | \$89,158.13         |
| Generator Repair/Maint          | \$1,265.00          | \$847.92            | \$496.00            | \$11,980.80           | \$14,589.72           | \$3,647.43          |
| GIS                             | \$0.00              | \$5,950.00          | \$5,200.00          | \$1,050.00            | \$12,200.00           | \$4,066.67          |
| Information Technology Services |                     |                     | \$12,317.76         |                       | \$12,317.76           | \$12,317.76         |
| Internet                        |                     |                     |                     | \$3,300.00            | \$3,300.00            | \$3,300.00          |
| Language Line                   | \$4,800.00          | \$2,231.76          | \$240.00            | \$612.00              | \$7,883.76            | \$1,970.94          |
| Microwave Maintenance           |                     | \$20,958.00         | \$40,526.80         |                       | \$61,484.80           | \$30,742.40         |

| <b>Totals -</b>                 | <b>\$394,523.46</b> | <b>\$406,663.14</b> | <b>\$724,548.00</b> | <b>\$1,305,374.44</b> | <b>\$2,831,109.04</b> | <b>\$707,777.26</b> |

\* Allentown Radio Maintenance based on projected costs of new system, not yet in place.

Figure 29 – Non-Personnel costs

---

## Personnel Costs

### Telecommunicators (call-takers and dispatchers)

Salary and benefit costs savings for telecommunicators was not calculated as the staffing analysis indicated that the total number of full time telecommunicators needed for consolidated PSAPs or a regional PSAP was less than the number of current full time telecommunicators at all four PSAPs combined. In addition, with the staff of three out of the four PSAPs belonging to collective bargaining units, the eventual salaries that would be agreed upon in future contract negotiations would be purely speculative until such time that the negotiations are completed.

### Administrative Personnel

In estimating the cost savings for administrative personnel for consolidations and regionalization, the current administrative positions at each PSAP were reviewed, and comparisons were made as closely as possible, as all of the PSAPs do not have the same positions listed, or may have similar job responsibilities placed under different titles. Positions at each PSAP were compared and are listed in the charts below in relation to consolidations of Allentown and Lehigh County PSAPs (Consolidation A), Bethlehem and Northampton County PSAPs (Consolidation B), and regionalization of all four PSAPs. Highest salaries for comparable positions were used for the cost savings calculations.

### Consolidation A - Allentown and Lehigh County

In consideration of the consolidation of Allentown and Lehigh County's PSAPs, Allentown has seven administrative positions listed while Lehigh has three positions listed. However, three of the positions listed on Allentown's budget are employees that work in the city's radio maintenance facility, and are only minimally funded by 9-1-1 revenue. In addition, only 80% of the superintendent of communications' salary is funded by 9-1-1 revenue. The amount of salary covered by 9-1-1 revenue was used in the comparisons. Neither Allentown nor Lehigh County have a deputy director or clerical staff listed on their budgets.

*The remainder of this page left intentionally blank.*

| Position                | Salary              |                     |
|-------------------------|---------------------|---------------------|
|                         | Allentown           | Lehigh              |
| Director/Superintendent | \$60,327.20         | \$74,680.86         |
| Deputy Director 9-1-1   |                     |                     |
| Operations & Training   | \$54,422.71         | \$61,551.30         |
| Quality Assurance       |                     |                     |
| IT Systems Manager      | \$10,162.08         |                     |
| IT Technician           | \$10,441.24         |                     |
| IT Inventory Control    | \$4,551.07          |                     |
| Administrative/Clerical |                     |                     |
| CAD/Radio Coordinator   |                     | \$61,551.30         |
| <b>Totals -</b>         | <b>\$139,904.30</b> | <b>\$197,783.46</b> |

*Figure 30 – Allentown and Lehigh County current administrative positions and salaries*

In this consolidation scenario, the IT Systems Manager, IT Technician, and IT Inventory Control positions with the city of Allentown would not be part of the consolidation as it is assumed that they would continue with the city's radio maintenance facility. One director is considered in this calculation, although, with an increase in staff and operations in consolidating the two PSAPs, a deputy director position could be considered. Potential cost savings are shown below in figure 30.

| Position  | Salary              |
|---|---------------------|
| Director/Superintendent   | \$74,680.00         |
| Deputy Director 9-1-1   |                     |
| Operations & Training   | \$61,551.30         |
| Quality Assurance   |                     |
| IT Systems Manager  |                     |
| IT Technician   |                     |
| IT Inventory Control  |                     |
| Administrative/Clerical   |                     |
| CAD/Radio Coordinator   | \$61,551.30         |
| <b>Administrative Total -</b>                                     | <b>\$197,783.46</b> |
|   |                     |
| Current Combined Salary Expense -                                 | \$337,687.76        |
|   |                     |
| <b>Potential Cost Savings in Yearly Administrative Salaries -</b> | <b>\$139,904.30</b> |

*Figure 31 – Potential Cost Savings in Administrative Cost Salaries – Consolidation A*

### Consolidation B – Bethlehem and Northampton County

In consideration of the consolidation of Bethlehem and Northampton County's PSAPs, Bethlehem has only three administrative positions listed in their documentation. Northampton County has six, however they do not list the director in the 9-1-1 funding. As with consolidation A, the highest figures were used for the purposes of the calculations. The combined staffing includes one of each position currently staffed, including a deputy director.

| Position                | Salary              |                     |
|-------------------------|---------------------|---------------------|
|                         | Bethlehem           | Northampton         |
| Director/Superintendent | \$72,327.06         | **                  |
| Deputy Director 9-1-1   |                     | \$63,640.30         |
| Operations & Training   |                     | \$58,042.40         |
| Quality Assurance       | \$58,441.71         | \$58,042.40         |
| IT Systems Manager      |                     | \$60,652.80         |
| IT Technician           | \$69,170.22         | \$52,832.42         |
| Administrative/Clerical |                     | \$42,336.00         |
| <b>Totals -</b>         | <b>\$199,938.99</b> | <b>\$335,546.32</b> |

*Figure 32 - Bethlehem and Northampton County current administrative positions and salaries*

*\*\* Northampton County has an overall department director, but his salary is not paid with 9-1-1 funds and was therefore not included in these calculations.*

For this consolidation scenario, potential cost savings are shown below in figure 33.

| Position  | Salary              |
|---|---------------------|
| Director/Superintendent   | \$72,327.06         |
| Deputy Director 9-1-1   | \$63,640.30         |
| Operations & Training   | \$58,042.40         |
| Quality Assurance   | \$58,441.71         |
| IT Systems Manager  | \$60,652.80         |
| IT Technician   | \$69,170.22         |
| Administrative/Clerical   | \$42,336.00         |
| <b>Administrative Total -</b>                                     | <b>\$424,610.49</b> |
|   |                     |
| <b>Current Combined Salary Expense -</b>                          | <b>\$535,485.31</b> |
|   |                     |
| <b>Potential Cost Savings in Yearly Administrative Salaries -</b> | <b>\$110,874.82</b> |

*Figure 33 – Potential Cost Savings in Administrative Cost Salaries – Consolidation B*

As evidenced by the comparison of the staffed positions between the four PSAPs, operations are handled in diverse ways. For example, Allentown, Bethlehem and Northampton County all have in-house IT positions, while Lehigh County has a line item budgeted for IT Services. Additionally, Bethlehem and Northampton County have dedicated, budgeted positions for quality assurance while Allentown and Lehigh County do not. However, since quality assurance is mandated by 4 PA Code Chapter 120d, it is expected that it is being undertaken by both PSAPs, but is performed by someone in another staff position.

#### Regionalization – Allentown, Bethlehem, Lehigh County and Northampton County

In consideration of regionalization of all four PSAPs into one regional Lehigh Valley PSAP, the highest figures were used for the purposes of the calculations. With exception of the Allentown IT Inventory Control positions, all (similar) titles have been merged into the combined staff. For purposes of this calculation, each position is filled with one staff member, except for quality assurance, which is considered with two due to the large amount of quality assurance that would need to be completed in a PSAP with such a large expected call volume, (the amount of quality assurance required by current regulation is tied to the call volume that a PSAP receives). Consideration was not given to the potential impacts of collective bargaining negotiations between the PSAPs and their respective unions in regard to management positions that may fall under the union contracts.

| Position                                       | Allentown           | Bethlehem           | Lehigh              | Northampton         |
|--|---------------------|---------------------|---------------------|---------------------|
| Director/Superintendent                        | \$60,327.20         | \$72,327.06         | \$74,680.86         | **                  |
| Deputy Director 9-1-1                          |                     |                     |                     | \$63,640.30         |
| Operations & Training                          | \$54,422.71         |                     | \$61,551.30         | \$58,042.40         |
| Quality Assurance                              |                     | \$58,441.71         |                     | \$58,042.40         |
| IT Systems Manager                             | \$10,162.08         |                     |                     | \$60,652.80         |
| IT Technician                                  | \$10,441.24         | \$69,170.22         |                     | \$52,832.42         |
| IT Inventory Control                           | \$4,551.07          |                     |                     |                     |
| Administrative/Clerical                        |                     |                     |                     | \$42,336.00         |
| CAD/Radio Coordinator                          |                     |                     | \$61,551.30         |                     |
|  |                     |                     |                     |                     |
| <b>Totals -</b>                                | <b>\$139,904.30</b> | <b>\$199,938.99</b> | <b>\$197,783.46</b> | <b>\$335,546.32</b> |
|  |                     |                     |                     |                     |
| <b>Current Combined Administrative Total -</b> |                     |                     | <b>\$873,173.07</b> |                     |

*Figure 34 – Current Administrative Positions and Salaries*

*\*\* Northampton County has an overall department director, but his salary is not paid with 9-1-1 funds and was therefore not included in these calculations.*

For this regionalization scenario, potential cost savings are shown below in figure 35.

| Position  | Number Staffed | Salary              |
|---|----------------|---------------------|
| Director/Superintendent   | 1              | \$74,680.86         |
| Deputy Director 9-1-1   | 1              | \$63,640.30         |
| Operations & Training   | 1              | \$61,551.30         |
| Quality Assurance   | 2              | \$58,441.71         |
| IT Systems Manager  | 1              | \$60,652.80         |
| IT Technician   | 1              | \$69,170.22         |
| Administrative/Clerical   | 1              | \$42,336.00         |
| CAD/Radio Coordinator   | 1              | \$61,551.30         |
| <b>Total -</b>  |                | <b>\$550,466.20</b> |
|   |                |                     |
| <b>Current Combined Administrative Total -</b>                    |                | <b>\$873,173.07</b> |
|   |                |                     |
| <b>Potential Cost Savings in Yearly Administrative Salaries -</b> |                | <b>\$322,706.87</b> |

*Figure 35 – Potential Cost Savings in Yearly Administrative Salaries*

### **Space Study**

In order to determine the feasibility of utilizing the current PSAPs for future consolidation and regionalization purposes, MCM conducted site visits to all of the PSAPs. The PSAPs currently operated by the cities of Allentown and Bethlehem do not have room for expansion and were not considered viable options for consolidation or regionalization. MCM requested that architectures from the EADS Architects, an engineering, architecture and design firm that has experience in the design, construction and renovation of 9-1-1 centers, visit the two county PSAPs along with the Wilson-Kramer facility and give recommendations from their perspective as to the feasibility of use of the facilities for consolidated and regional PSAPs. EADS was not tasked with design or cost estimates of any renovations or construction deemed necessary, as this was not part of the overall MCM contract. The review by EADS, along with the results of the operations analysis were used to develop the recommendations outlined in this report. The recommendations from the EADS Group is below:

*For: MCM Consulting Group, Inc.*

*By: EADS Architects, Inc.*

*Task: Initial Considerations for the County of Lehigh, City of Allentown, County of Northampton and City of Bethlehem*

### *Introduction*

*For the purpose of these considerations and based on the potential loss of 9-1-1 funding to the cities of Allentown and Bethlehem if consolidation with the counties of Lehigh and Northampton, respectively, is not achieved within the next three (3) years, it shall be assumed these municipalities will agree to a consolidation plan. The further task of the planning process is the consideration of consolidating and reorganizing the services of all four municipalities into one 9-1-1 center, hereafter referred to as “regionalization”. It is our opinion that until it is determined that the ultimate solution for the highest level of service and the best investment (both in the initial construction cost and the future operational and maintenance costs) is regionalization, the initial change or “short term solution” will be to consolidate Allentown with Lehigh County and Bethlehem with Northampton County.*

*It is understood that consolidation of facilities will affect the current staffing levels for call takers/dispatchers, administrative and support positions/staffing, operational procedures and space allocation. Resolutions of these issues will involve much consideration and perhaps compromise between all of the subject municipalities. For these considerations, the staffing recommendations presented in the Staffing Analysis section of this report will be utilized.*

*Finally, the finite costs to facilitate consolidation/regionalization options would require the determination of a final staffing plan and significant design and cost analysis. Therefore, opinions are expressed herein, and these are based on initial observations made at the facilities of the Lehigh County 9-1-1 Center, the Northampton County Emergency Operations Center and at the so called Wilson-Kramer Building.*

### *Consolidation A – Allentown and Lehigh County*

*Consolidation of the Allentown and Lehigh County 9-1-1 services should occur at the Lehigh County facility, 640 West Hamilton Street, Allentown, PA. This will be difficult to achieve based on the recommended staffing level and the available existing space, but manageable and cost effective as a short term solution. Simply stated, we do not recommend moving to and renovating an existing building or constructing a new facility if regionalization is the “long term solution”.*

*The current 9-1-1 center, administrative and support offices, break room, etc. are located on the 10th Floor. The communications and server rooms are located on the 9th floor. With some reorganization and changes/upgrades in position furnishings and equipment, the current 9-1-1 center should be able to accommodate the additional call taker/dispatcher and supervisory staff. More restrooms, lockers, office and storage space will be required. On a short term basis, this space could be taken from some other location within the building.*

#### Consolidation B – Bethlehem and Northampton County

*The Northampton County facility, at 100 Gracedale Avenue, Nazareth, PA, is considered to be adequate to accommodate consolidation with the Bethlehem services with minimal changes to the physical plant. The 9-1-1 center is able to accept the additional positions and furnishings. Administrative and support staff offices may require some reorganization, but, in the short term, no significant reconstruction should be required.*

#### Regionalization

*The process of regionalization will include the development of a physical plant of sufficient size to accommodate the regional staffing and facilities to provide the required level of service. This could be achieved through the renovation and adaptive reuse of an existing building, renovations and additions to an existing 9-1-1 center building, and through the construction of a new facility. For the purposes of this study, the following options were considered:*

- *Renovations to the Wilson-Kramer Building (former Army Reserve Center) - Based on a preliminary tour of the building, it is our opinion that the building is in very poor condition, has environmental problems (probable asbestos containing materials, lead based paint and mold were observed), and would be very difficult and costly to create the spaces required for a regional facility. The roof and much of the roof deck will need to be replaced. The facility does not meet current building codes, is not handicap accessible (ADA) and will require significant reconstruction to meet the energy code. All interior finishes, mechanical, electrical and plumbing systems will need to be replaced. Short of extensive design work and cost analysis, it is our opinion that it will cost about the same to renovate this building as will new construction. Further, a renovated building will not have the flexibility to provide for all programming needs and therefore will require modification of the program to fit the existing built constraints.*
- *Additions and Renovations to the Northampton County Emergency Operations Center - The existing facility is in good to excellent condition. Not only is it of sufficient size to accommodate Consolidation B with minimal improvements, it was designed for future*

*expansion. Further, the existing floor plan and site will allow additional and/or alternative additions and modifications to facilitate service as the regional facility.*

- *New construction on the Wilson-Kramer site or another regional development site – It is our opinion that additions and modifications to the Northampton County facility should be thoroughly investigated before new facility construction is considered. This is because of the condition of the existing facility, the opportunities for expansion and the probable significant cost savings as compared to new construction.*

Due to the lack of space at the current Allentown and Bethlehem PSAPs, those facilities are not recommended for future consolidation or regionalization use. Lehigh County's PSAP as it is currently configured, is able to be used as a consolidated PSAP. Due to the limited space at the Lehigh County PSAP, along with concerns over public access to the site, safety of the staff and the location in general, that facility is not recommended for future use as a regional facility. Officials from Lehigh County noted that other floors of the facility would be available for use in an expanded PSAP, but MCM does not recommend splitting a PSAP between two floors of a building, and even if that would be considered, the issues of location and access still need to be considered. Northampton County's PSAP is well configured for use as a consolidated PSAP, and can easily be expanded in order to accommodate a regional facility. Expansion plans developed in 2013 were estimated to cost roughly \$2.6 million dollars. Although this expansion was not planned with a regional facility in mind, the plans could easily be modified for such a use at relatively minor additional cost to the original design. Building design for a new facility was not within the scope of MCM's contract for this project.

The Wilson Kramer facility, although it is centrally located in the footprint of the two counties and has good access with U.S. Route 22 nearby, and is very close to a network operating center (NOC) for Service Electric (a prominent fiber provider in the region), is not recommended for use as a regional PSAP for the reasons noted above in the EADS Architects report. In addition, the costs for construction of a new, similar sized facility at the location is estimated to be in the range of \$6 to \$7.5 million dollars. If state funding would be available to cover construction costs, this facility could be considered, however, at this point, PEMA has not provided guidance on the use of the dedicated 15% 9-1-1 "Interconnectivity" funds.

## **Recommendations**

After reviewing and analyzing all of the information provided, the responses to the multiple interviews, considering costs savings, conferring with architects on space requirements, and based on the information contained in this report, MCM provides the following recommendations for the future of 9-1-1 systems and services in the Lehigh Valley:

1. The long-term goal for the cities of Allentown and Bethlehem and the counties of Lehigh and Northampton should be to consolidate into one regional Lehigh Valley PSAP (regionalization). Maximum cost savings in terms of capital outlay, maintenance and personnel costs can be realized through all four PSAP joining together into one. This consolidation into one regional PSAP would make the Lehigh Valley the fourth largest PSAP, in terms of population served, in Pennsylvania (behind Philadelphia, Allegheny and Montgomery Counties). The review of the current PSAPs finds that Northampton County's current PSAP is the best option in terms of location, available space and cost of needed expansion/renovations. It is not expected that this will happen within a four-year time frame, but it should be a goal to accomplish the regionalization within five to seven years.
2. An oversight board should be established with representatives from all four PSAPs and municipalities. The board would be responsible for developing the operational and logistical plans for the consolidation of the city and county PSAPs, eventual regionalization of the all of the PSAPs, and development of an authority for governance of a regional PSAP by the four municipal governments. The board would also be responsible for developing inter-municipal agreements for cost sharing of resources that are turned over to the consolidated authority. The board would need to work together to address issues such as: how staffing will be integrated, including union membership issues; the integration of current protocols for operational areas that meet the needs of the counties and the cities; recommendations and oversight of needed infrastructure work, including, but not limited to fiber/microwave connectivity, trunk routing, console upgrades, and planning for any needed renovations/construction for consolidations and eventual regionalization.
3. Since it is not expected that a regional facility would be ready for operation by June 30, 2019 (when funding for Allentown's and Bethlehem's PSAP is expected to stop), consolidation of Allentown and Lehigh County's PSAPs at the current Lehigh County PSAP, and consolidation of Bethlehem and Northampton County's PSAPs at the current Northampton County PSAP are recommended as intermediary measures. Although it is technically possible for a regional PSAP to be constructed and the necessary infrastructure to be put in place within three years, it is doubtful that the integration of protocols, systems and needed training would be able to be done in that time frame. With a large undertaking such as a regional PSAP in the Lehigh Valley, with public safety as the main priority, it is recommended that the planning for it is done methodically and not rushed.

For consolidation of the centers it is expected that current radio systems would continue to be used, as planning for, designing and engineering new radio systems is a lengthy and

tremendously expensive undertaking. Use of the systems would probably need to be continued for some time even under a regional PSAP.

- a. For the consolidation of Allentown's PSAP with Lehigh County at the current Lehigh County PSAP, it is recommended that Allentown's newer CPE switch that is currently shared with Northampton County be utilized. Although Lehigh's PSAP currently has enough console positions to allow for the extra staff needed, the CPE and consoles at Lehigh are due for replacement and should be upgraded to work with Allentown's Airbus DS Vesta 4.3.1.521 geo-diverse CPE. This upgrade should be paid for out of PEMA's interoperability money. Lehigh's telephony trunks would need to be rerouted through to run through Allentown's switch to the PSAP. Half of Northampton's trunks are running through this switch and moving it to Lehigh's facility does not make financial sense, since it is recommended that the end result is a regional facility not using Lehigh's current center. Keeping the switch at Allentown's facility will maintain geo-diversity and redundancy. Connection back to Allentown's facility would made be for their radio system and the CPE switch. It is noted that this will come as a cost to the City of Allentown in the form of needed cooling, backup power, UPS and the restricted use of the facility for other purposes.

Lehigh County has an extensive redundant loop microwave network between the center and their remote sites. Allentown has a T1 lines between its PSAP and the PP&L building which houses its only site. A fiber or copper T1 connection to the Lehigh County PSAP would allow for Lehigh to connect into the Allentown GE EDACS system. However, there may need to be some kind of CSSI to enable direct connectivity between Lehigh's ACOM and the GE/Harris console that Allentown is using to avoid using a control station interface.

Current ancillary services that are provided by both PSAPs should continue to be maintained. The Allentown PSAP provides valuable services to the other city departments and agencies, and if those services are not maintained, the city would need to establish a new communications/dispatch center to take over those services, which would limit the amount of cost savings that would be realized with a consolidation. MCM believes that it is imperative that the monitoring of the city's camera system remains at the PSAP after a consolidation and then regionalization takes place. The system is a valuable public safety tool, a step in the Next Generation 9-1-1 process and belongs as a tool available to law enforcement dispatchers. Fiber connectivity is recommended for transmission of the video feeds to Lehigh County's PSAP for the consolidation scenario and then

to Northampton County for the eventual regional scenario. It is recommended that the City of Allentown's radio maintenance facility remain as a city operation.

- b. For the consolidation of Bethlehem's PSAP with Northampton County at the current Northampton County PSAP, it is recommended that the CPE switch that is currently in use at Northampton County (and shared with the city of Allentown) be utilized. The CPE and consoles will not need to be upgraded. The PSAP currently has sufficient console positions to allow for the extra staff needed (based on minimum staffing numbers), but three to four new consoles should be added to accommodate normal staffing levels and overflow during emergency situations. The PSAP has more than sufficient space to allow for additional consoles with some rearranging of the current layout.

Northampton County utilizes a redundant fiber ring (supplied by Service Electric) between all of their radio sites (except one spread spectrum link to one site). Bethlehem utilizes a fiber ring to connect to their remote sites, with an 80GHz microwave link to the radio maintenance facility (one of their three sites) and an 11GHz link to South Mtn. as a redundancy to the fiber. Since fiber is prevalent and readily available in this area, MCM recommends a fiber connection between the two centers. Although the Northampton County's PSAP radio console has been kept up-to-date and the position PCs upgraded in 2015, it is an older Moducom, while Bethlehem's console is a newer Motorola MCC7500. Upgrading and expanding the MCC7500 to encompass Northampton's dispatch positions and channels should be explored.

Current ancillary services that are provided by both PSAPs should continue to be maintained. Similar to the Allentown PSAP, Bethlehem's PSAP provides valuable services to the other city departments and agencies, and if those services are not maintained, the city would need to establish a new communications/dispatch center to take over those services, which would limit the amount of cost savings that would be realized with a consolidation. Again, as with Allentown, MCM believes that it is imperative that the monitoring of Bethlehem's camera system remains at the PSAP after a consolidation and then regionalization takes place. The system is a valuable public safety tool, a step in the Next Generation 9-1-1 process and belongs as a tool available to law enforcement dispatchers.

#### 4. Time Frame Recommendations:

- a. Short Term - 0 months to 6 months

- i. Establishment of the Oversight Board.
  - ii. Begin planning of integration of the city PSAPs into the county PSAPs for the consolidation phase
- b. Medium Term - 6 months through year 2
  - i. Required infrastructure work for consolidation completed.
  - ii. Call-taking and dispatch consoles rearranged and purchased as necessary; radio systems connected.
  - iii. Training of staff on the revised protocols and standard operating procedures that have been developed by the oversight board.
  - iv. Staffing and union negotiations finalized.
  - v. Integration of the city PSAPs into the county PSAPs starting by the end of the 2<sup>nd</sup> year.
  - vi. Continuation of planning for eventual regionalization of all of the PSAPs into one facility.
- c. Long Term - Years 3 to 4
  - i. Physical integration of the city PSAPs into the county PSAPs completed by year three.
  - ii. Development of an Authority for governance of a regional PSAP by the four municipal governments finalized by Oversight Board including Inter-governmental Agreements for cost sharing of resources that are turned over to the regional Authority.
  - iii. Definitive plans for the construction/renovation of a Lehigh Valley Regional PSAP at the Northampton County PSAP developed and finalized.

In regards to a regional PSAP, concerns were raised during the interview portion of this study about dispatching for such a large geographic area and population. However, as noted above, three other PSAPs in Pennsylvania currently serve populations that are larger than what a regional Lehigh Valley PSAP would serve. In addition, Allegheny County has a land mass of 730.08 square miles, which is larger than the combined mass of Lehigh and Northampton Counties, with a population that is almost double that of the Lehigh Valley. Allegheny County answers roughly one million 9-1-1 calls per year, about triple the combined 9-1-1 calls received in 2015 by the four PSAPs in this study. Allegheny County utilizes dedicated call-takers, and operates their PSAP in three zones for dispatching purposes: North County, South County, and the City of Pittsburgh. The county staffs their PSAP with a minimum of 55 telecommunicators

on duty per shift, with a maximum of 63 per shift. They have a totals staff of 262 employees. Allegheny County's operation leaves no doubt that one PSAP can successfully handle an area the size and population of the Lehigh Valley, both technically and operationally.

## Potential Cost Savings

As stated throughout this report, there are many factors that will affect the exact cost savings realized in consolidations of PSAPs in the Lehigh Valley and the eventual development of a regional PSAP. The examples given in this report are provided to show that cost savings can be realized if consolidation and regionalization are undertaken.

**Equipment** - In taking consolidations A and B together as presented, the City of Allentown would not have recorder maintenance, which would have a two-year cost savings of \$14,420.00, and no CAD maintenance for a two year savings of \$129,613.20. Lehigh County would have no CPE Maintenance which would have a two-year savings of \$189,925.90. The City of Bethlehem would have no CPE maintenance which would have a two-year savings of \$172,196, and no recorder maintenance which would have a two-year savings of \$54,600. Combined, these items would add up to a two-year savings total of \$560,755.10.

| Item Description     | Lehigh              |                    |                     |                     | Northampton         |                    |                     |                     |
|----------------------|---------------------|--------------------|---------------------|---------------------|---------------------|--------------------|---------------------|---------------------|
|                      | Current Total Cost  | Cost per seat      |                     |                     | Current Total Cost  | Cost per seat      |                     |                     |
|                      |                     | Current 16         | 24                  | 30                  |                     | Current 14         | 24                  | 30                  |
| CAD Maintenance      | \$92,771.00         | \$5,798.19         | \$139,156.50        | \$173,945.63        | \$57,464.14         | \$4,104.58         | \$98,509.95         | \$123,137.44        |
| Console Maintenance  | \$67,405.43         | \$4,212.84         | \$101,108.15        | \$126,385.18        | \$80,465.48         | \$5,747.53         | \$137,940.82        | \$172,426.03        |
| CPE Maintenance      | \$94,962.95         | \$5,935.18         | \$142,444.43        | \$178,055.53        | \$112,260.00        | \$8,018.57         | \$192,445.71        | \$240,557.14        |
| Recorder Maintenance | \$76,264.57         | \$4,766.54         | \$114,396.86        | \$142,996.07        | \$0.00              | \$0.00             | \$0.00              | \$0.00              |
| <b>SUB TOTAL -</b>   | <b>\$331,403.95</b> | <b>\$20,712.75</b> | <b>\$497,105.93</b> | <b>\$621,382.41</b> | <b>\$250,189.62</b> | <b>\$17,870.68</b> | <b>\$428,896.48</b> | <b>\$536,120.61</b> |

Figure 36 – Maintenance Costs for Lehigh and Northampton Counties' PSAPs

| Description          | Allentown           |                    |                     |                     | Bethlehem           |                    |                     |                     |

|                      |                     | Current 9          | 24                  | 30                  |                     | Current 7          | 24                  | 30                  |
| CAD Maintenance      | \$64,806.60         | \$7,200.73         | \$172,817.60        | \$216,022.00        | \$29,586.00         | \$4,226.57         | \$101,437.71        | \$126,797.14        |
| Console Maintenance  | \$0.00              | \$0.00             | \$0.00              | \$0.00              | \$71,610.00         | \$10,230.00        | \$245,520.00        | \$306,900.00        |
| CPE Maintenance      | \$63,311.58         | \$7,034.62         | \$168,830.88        | \$211,038.60        | \$86,098.00         | \$12,299.71        | \$295,193.14        | \$368,991.43        |
| Recorder Maintenance | \$7,210.00          | \$801.11           | \$19,226.67         | \$24,033.33         | \$27,300.00         | \$3,900.00         | \$93,600.00         | \$117,000.00        |
| <b>SUB TOTAL -</b>   | <b>\$135,328.18</b> | <b>\$15,036.46</b> | <b>\$360,875.15</b> | <b>\$451,093.93</b> | <b>\$214,594.00</b> | <b>\$30,656.29</b> | <b>\$735,750.86</b> | <b>\$919,688.57</b> |

Figure 37 – Maintenance Costs for Allentown and Bethlehem's PSAPs.

The cost savings are calculated based solely on the reported current costs by the PSAPs and straight consolidations of the PSAPs. They do not take into account any decisions to change out equipment (for example if Northampton County would opt to utilize Bethlehem's new CAD system), or any new negotiations on maintenance contracts for consolidated PSAPs or a regional facility. Also, further cost savings could be realized by combining maintenance contracts under a new authority. For example, even though it is expected that the PSAP will maintain their current radio systems for some time, there are some disparities between current contracts. For example, Northampton County's radio system maintenance contract is reported to be \$220,310.70 per year while Lehigh County's is \$172,955.30 per year. Allentown's radio maintenance will reportedly cost \$98,874.00 per year for a planned system upgrade, and Bethlehem's radio maintenance contract is listed as \$48,000.00 per year. Substantial cost savings would be expected if a single contract was negotiated for all four systems.

**Personnel** - As shown in the "Personnel Costs" section of this report, costs savings can be realized in consolidated and regionalized PSAPs through the elimination of duplicated positions. However, as stated in the "Staffing Analysis" section of this report, human capital is the most important part of any PSAP operation. During the time that this study was conducted MCM found that all of the PSAPs in the Lehigh Valley had dedicated, well-qualified and highly trained personnel working in their operations. The recommended oversight board and authority should carefully review the current staff of all of the PSAPs and judiciously select staff (especially administrative staff) that they feel has the best qualifications and qualities to lead 9-1-1 operations for the Lehigh Valley into the future. Consideration should be giving to allowing positions to be eliminated over time through attrition and retirements.

The staffing review for consolidation A showed that there could be potential personnel costs savings of \$139,904.30 per year, or a two-year savings of \$279,808.60. The staffing review for consolidation B showed that there could be potential personnel cost savings of \$110,874.82 per year, or a two-year savings of \$221,749.64. Combined, the potential personnel cost savings for consolidations in the Lehigh Valley would be \$501,558.24 over a two year period. The staffing review of regionalization showed that there could be a potential personnel cost savings of \$322,706.87 per year. Five-year savings on personnel costs for a regional PSAP over the current four-PSAP system would potentially be over \$1.6 million dollars.

## **Potential Funding**

As noted several times in this report, it is recommended that the costs necessary for the consolidation and eventual regionalization of the PSAPs, including the construction/renovations necessary for the Northampton County PSAP should be funded by the state's "Interconnectivity" funds which are to be distributed by PEMA with input from the state's 9-1-1 Advisory Board. Because the loss of funding for the city PSAPs has been unofficially directed by the state

legislature, it is appropriate that funds needed above the current levels of 9-1-1 appropriations are provided for from the state fund to maintain the high level of service that all of the PSAPs in the Lehigh Valley currently provide. This should be done without impacting the operating funds due to the other PSAPs in the state, and MCM believes that the “Interconnectivity” funds are the appropriate source.

The four PSAPs receive operating funds from PEMA as outlined by Act 12 of 2015. The funds are currently being disbursed according to an interim funding formula. PEMA, with input from the state 9-1-1 Advisory Board, is required to develop a definitive funding formula within 18 months of the passage of the act. This formula has not been provided to the PSAPs yet, so speculation of future funding of consolidated/regional PSAPs can only be based on the current interim formula. The interim formula is based on the PSAPs’ previous wireline and VoIP revenue along with their average reportable average costs for the past five years. The amount of funds available for distribution under the interim formula is dependent upon the amount of fees remitted to the state, so previous amounts received are not necessarily indicative of future funding. However, for purposes of estimating revenue for consolidation and regionalization, the January payments received by the four PSAPs under the interim formula is used.

| PSAP  | January 2016 PEMA<br>Funding Payment |
|---|--------------------------------------|
| Allentown   | \$663,472.18                         |
| Bethlehem   | \$615,608.13                         |
| Lehigh  | \$959,966.70                         |
| Northampton   | \$1,329,572.58                       |
|   |                                      |
| <b>Total Quarterly Payment</b>                          | <b>\$3,568,619.59</b>                |
|   |                                      |
| <b>Total Possible Yearly Funding for Regional PSAP*</b> | <b>\$14,274,478.34</b>               |

*Figure 38 – Possible yearly state funding for a regional PSAP*

*\*Estimated if state 9-1-1 revenues remain at current levels and the funding amounts per PSAP do not vary substantially under the definitive funding formula developed by PEMA.*

With the potential costs savings that can be realized through consolidations and regionalization discussed in this report, it is conceivable that state 9-1-1 funding could fully fund the yearly operational costs of a regional PSAP with very little or no need for county or city general fund contributions.

The combined 2015 budgets for the four PSAPs in the Lehigh Valley was \$16,596,849. For comparison, the PSAP in neighboring Bucks County, with a population 626,685 and a land mass of 604.31 square miles, has a 2016 budget of \$14,829,700.00. The PSAP normally staffs 20 to

25 telecommunicators per shift, which is in line with the recommendations that the Project Retains calculations gave for a regional Lehigh Valley PSAP. Montgomery County, to the south of Lehigh County, with a population of 816,857 and a land mass of 483.04 square miles, has 2016 budget of \$15,823,544.

# **Lehigh Valley 9-1-1 Analysis & Strategic Plan**

## **Appendix A**

### **Compiled Interview Responses**

## **City of Allentown Compiled Interview Responses**

1. What services does the PSAP provide for your department/agency?

- Call taking, dispatching, animal control, parking, servicing radio equipment (they are first line support), city surveillance cameras.
- Day to day operations, calling in for towing issues. Throughout the day for issues on the street. Call for officers to take care of issues. Comm center is figured in with our operations, involved in operational meetings, involved with snow storm planning. I don't believe that a scaled down emergency center will be able to handle all the requests that we have. They are the liaison to all of the agencies in the city. They are our communications for the city and all of its departments and agencies. We use them for documentation. We will still need a communications system for us in the city. Will there be an agreement that there will be dedicated employees to handle all of our traffic (in a consolidation).
- Will we have five people dedicated to us for snow storms and towing, etc.? We will still need a service to contact after hours contacts, on-call personnel (311?), which I believe will still cost the city. What will the agreement say? Will the county provide these services? It is a combined mindset that says what is needed and what is going to happen. It has to be very clear as to what the dispatchers will do or not do (in a consolidation).
- They are an evidence source with the camera system. They are our lifeline for outside agencies. They are our communications hub, they do our NFIRS entry for us. They store our special circumstance material – hazmat preplans and Knox box information. They will advise on SARA facilities and preplans (send to MDTs), they offer interoperability between other city agencies.
- Parking, we are very dependent on the services provided by the PSAP.
- Dispatch Emergency and non-emergency calls, all communications, Pager notifications for service and specialty teams such as Haz-mat, Ops Team, Dive Team, ERT Team etc.

2. Do you have any experience with any type or form of regionalization or consolidation practices?

- No.
- The Water Authority.
- Yes – a fire department within the county – it fell apart. Consolidation – you are always consolidated for cost savings.

- Firsthand – no.
- Yes, working with the Chamber of Commerce with the mergers and acquisitions of various organizations.
- No.
- As an observer, not directly involved.
- Yes – major regionalization with the water and sewer with the county. Merged small business law pool in regional. EDC chamber into a regional chamber.
- No.

3. Have you thought about the future of your organization and how a regionalization or consolidation of services could benefit your community?

- In a perfect world we would prefer to stay stand-alone. I would prefer one (four PSAP) Regional PSAP instead of the city just being absorbed by the county.
- It would be my hope that since we really have no choice – that the citizens would get at least the same level of service if not a better level of service.
- No, just leave us alone, our response times are efficient/effective and I don't see what good it would do besides saving money.
- Yes – it depends if we combine into one center. It makes sense as long as the state puts the money into it. If we just combine into the counties there could be problems. Both counties are dysfunctional. They have biases against the cities and the cities may not get the proper attention and they may not allocate the resources in place to handle the volume and changes. I would like to see one PSAP which would have to be a governing body with input from all four PSAPs.

4. Do you believe regionalization or consolidation should be considered?

- No.
- No.
- Should be considered but done must the right way. Not every square peg can fit into a square hole. It needs to be done right. We need to have the same level of service. Must be done in a step by step process. We should have cost savings but it has to work correctly.
- No.
- I understand that efforts are needed to remain cost efficient.
- No.
- First thought, I would like to see Allentown remain. I feel they are large enough and they should stay as they are.
- We have no choice.

5. From your perspective, do you feel there are benefits of regionalization and/or consolidation?

- I really don't see any benefits to consolidation. The PSAP's crew is great and provide great service. Regionalization can offer benefits in more modern technology cost savings.
- Could be a benefit of working together, some services could be shared – but it could be tough.
- Cost savings.
- Both cities have proven that we are progressive and responsive to our communities and citizens, and are equal to or ahead of the other PSAPs from the technology standpoint. This is unfair and politically motivated.
- There could be potential benefits when considering cost effectiveness.
- No benefit.
- Cost savings only, could reduce duplication of services.
- No, I see no negatives or positives. Comm center entity would no longer be on our organization chart. Less employees for me to deal with.

6. What obstacles and challenges to a regionalization or consolidation effort can be expected?

- I think the first is to get the county to realize that the consolidation is not the only focus. Our citizens expect effective and efficient service and may not be on board with a change - they would need to be educated as to why. We would need to figure out how to provide the support services that our communication center provides now. We do not want see any loss of services.
- Coming up with an agreement that everyone is ok with.
- Will we have the same level of input into communications operations as we do now? Career vs volunteer department. Cost of radio systems. We are doing inspections and have some enforcement duties. We do have county units coming in for mutual aid after second alarm or special call – trucks, air units, etc. We also run out of the city.
- The biggest obstacle is getting the counties to understand the needs of an urban department and the types of incident that we run and the services that we provide.
- The dispatchers having the knowledge of the street names, neighborhoods and demographics of the current jurisdiction maintained as well as the current efficiency of the operations. Would a consolidation or regionalization dispatch parking complaints? We are dependent on the current services and if the services were taken

- away would have to discover a way to re-build or find a way to duplicate the services provided in order to maintain the efficiency of the department.
- Depends on how they do it, leave Allentown here, they don't know what we do.
  - EMS may be asked to do more with less services from the 9-1-1 Center - moving trucks around would be difficult if they got bigger.
  - It depends: into the county – the lack of technology, the lack of understanding of the city system, the amount of timing to handle the city issues and knowledge and overall lack of will to handle the city issues. Several commissioners regularly vote against city issues even though they live in the city, and city issues are sometimes ignored.
  - I would view or employees as simply being laid off. They would be able to put in for positions within the city. They might be able to bump other city employees if they have the skills and seniority. With the budget they might not be able to absorb the employees. Some may lose their jobs.

7. From your perspective, do you believe there are any negative effects that will result in considering any regionalization or consolidation efforts?

- I'm very concerned about amount of time between call and dispatch. Currently we are getting info even before the call is dispatched. I'm very concerned about delay in dispatching time. The camera surveillance (monitoring by the PSAP) is a great asset – they will dispatch from incidents seen on it without calls being received - we can't lose it. The city has a person at the PSAP that is a call taker but also monitors the cameras.
- Level of service - no. Understanding all of our protocols by the comm center is very important. I'm concerned that if someone else is doing the work and doesn't know the protocols that things will be missed or delayed.
- Loss of level of service
- A little bit of animosity when it comes down to the line guys as far as how dispatching is done. There will be a learning curve - it must be done right with training.
- Perception on the part of the citizens that they are losing something – that will need to be overcome. If the level of service cannot be equaled or improved upon, the citizens are losing out. The city has been providing 9-1-1 since 1973 and paid for it out of taxpayer money for twenty years. And the citizens are expecting the same level of service.
- The biggest negative with a bigger or larger organization is that it may not be able to maintain the same level of efficiency as presently demonstrated by the staff at the PSAP.

- PSAP's may be required to do more with less. Presently the EMS Dispatcher has access to a range of tools and provides a high level of service, but I'd be concerned that if there is a change, perhaps it will be difficult to provide the same level of service as presently evident.
- A larger center (4 PSAPs) - the only negatives would be to setting up a structure that has its own separate board with input from all municipalities. Similar to water authority and airport. If not set up properly it can be a hurdle. If done right it could be a model for success.
- Not from my perspective.

8. Does consolidation make sense for your area from a service level, political, technological and financial perspective?

- Consolidation (city absorbed by the county) absolutely not – still will have a financial burden for the city. Regionalization could have financial savings but I still have concerns about that.
- Probably financially, but from a service point of view I don't think it is worthwhile. Regionalization of technology should have been looked at. Our service is great here – we don't want to lose that.
- Life safety/public safety – consolidation may help bring the county up to the level of service that we have.
- Service level – only if the level remains the same or is greater.
- Political – out of my arena. Seamless should be the goal = seamless to the citizens
- Technological – absolutely.
- Financial – no - questionable if there is a saving up front (shared regional services make more sense than a consolidation (capital and ongoing savings)).
- Want to keep the current License Plate Recognition (LPR) technology available. Could this be considered as joint technology? All calls are dispatched by the comms center, they have historical information, vast resources, warrant information and can provide directions etc. In addition to the previously listed services. They also facilitate radio repairs, programming etc., which is a very valuable process. Will this continue?
- No idea.
- The possibility of more radio coverage issues - presently there are only 2 locations that are known with poor coverage. I'm concerned that it may get worse in the future. I think one PSAP for the whole area would be best.

9. What do you see as the goals for any regionalization or consolidation? (reduce costs, improve efficiency, etc.)
- I think the ultimate goal is to provide the most effective and efficient service. Expanding upon our technology and service that we are providing in order to give the best service to our citizens. Better integration and interoperability.
  - Administration would need to understand that we need to have the proper communications.
  - Cost reduction. If it's done professionally we will be able to iron out issues and not let egos get in the way.
  - Same technologies would be helpful.
  - The goal is upgrade technology, reduce ongoing repetitive maintenance and service costs, and to provide a seamless level of service back to the community so they don't even recognize that there has been a change.
  - Be sure that whatever the end result is, it is as efficient as the current offering.
  - In a perfect world dispatching services should stay the same.
  - Separate authority – I think setting up infrastructure and HR departments, etc. I think you will have cost savings – if the state inputs funding we will have better technology and can take the best of the best people from all four and have a great operation. Reduce costs for all. Technology will need to be able to handle large number of calls. Same challenges as Allegheny County.
10. In your opinion, does your PSAP have the resources available to effectively operate into the future?
- As it stands now, yes, as long as the funding remains.
  - From what I see, yes. Operations are happening. We are getting what we need from them now at a very high level of service.
  - I think so. They are continually upgrading technology as finances permit. We are running into the problem of how our radios are fed – we are having a lot of dead zones with all of the new buildings that are being built.
  - Yes.
  - Not certain.
11. Is the current infrastructure (equipment, technology, connectivity) able to be maintained long term?
- Yes.

12. Does your PSAP have room for expansion and possess the capability of assuming higher call volumes and dispatching services?
- No for expansion, but we could take more calls with nine total positions. Our normal staffing is 4 telecommunicators and a supervisor to 5 and a supervisor.
  - Depends on how they do it.
13. Are calls frequently being transferred among or between agencies?
- Not frequently.
  - Yes.
14. Would consolidation reduce or eliminate the transfer of 911 calls between agencies and improve response times and lower liability?
- Minimal, if at all.
15. Do multiple agency responses that are coordinated between and among multiple dispatch centers?
- Rare that it happens but we do have agreements for assistance.
  - On an emergency basis though PEIRS
  - Maybe on initial dispatch and response instructions.
  - EMS runs a lot of mutual aid out of the city or are bringing in mutual aid. They call the county and request – the county's boxes are built into the city's CAD.
  - Yes.
16. Would consolidation improve incident coordination and interoperability?
- The city PSAP is a command and control facility.
  - Yes because you are going to one center – but it doesn't really happen that often.
  - Yes it would have to – in theory because we would be sitting in the same room.

- If structured and would have access to more support, could have better services. Currently only Bethlehem and Allentown have Parking Authorities.
- It depends on how it is done.
- Uncertain. With existing MCI plans it would be challenging but may have potential to become more efficient.

17. In considering of a regionalization or consolidation of services, do you have any strong reservations or concerns?

- I do. Call turn-around is excellent currently. There still will be a financial impact to the city (if the city does not have a PSAP). Putting officers and citizens at risk with delayed responses and not having the personal connection between the dispatchers and the officers that we have now. Our call volume will be a burden on them as opposed to the city volume. And there is a much different type of call volume than the county is used too, shootings, drugs. My concern is to make sure that my staff is safe and that the citizens are safe. I have concerns that this will be an issue if the county takes over for the city. We don't want to change how our dispatching operates. Where this facility will be located is a concern. The Comm center falls under the police center. The comm center does the radio (maintenance) work for police fire and ems. They are funded 10% from 9-1-1 funding.
- We need to maintain the same level of service that we are getting now. We currently meet every Wednesday to discuss any issues and get them resolved.
- Level of service, input of our needs. We want to make sure that our needs are represented at the level that our needs are at compared to the other departments.
- Levels of service with the amount of call volume that we have, not only to the citizens but to the other city departments.
- Governance – has to be an equal share of governance among all four entities. There is a concern of the cities falling by the wayside.
- I could not imagine having better service. We want to keep the same level.
- Every agency's needs must be considered, commonality may be a challenge.
- No.

18. What in your opinion are the most important considerations that need to be made when considering either regionalization or consolidation?

- We want to maintain the same level of service.

- Level of service, dedicated staff for our operations - what the level of service is going to be (in a consolidation/regionalization)? We need to have something in house if we can't get the same level of service. If we need more staff, Mike (Hilbert) will call them in – will that be handled the same way? We are large and growing and I'm afraid that the new center will be understaffed.
- See above (#17). There needs to be similar unit typing throughout the county.
- Financial is a consideration but it is a mandate. There needs to be an efficient and effective operations that is providing today's services, that continues into the future can be maintained through political changes.
- Don't want to lose the benefits of "safety", no higher call volumes. All about offering safety, dispatchers know who needs help simply by the tone of voices.
- Who is in charge? What works for a city squad may not work for a rural service. I have confidence that when a unit is out the dispatchers do a great job at keeping track of them.
- What is the entity that would be managing the structure? If the management does not go into the county there would be a new management structure (authority or board and will it need a new HR department and finance department). How is it financed? There will be more bureaucracy and the employees would be employed by the authority, unless there is some type of hands-off agreement. Union shop versus non-union shop – issues with this? Plus different union representation at this time between the union shops. New organization could start out non-union and then if may get unionized. Would a board would need to be put in place first? Then create job descriptions, policies, salary levels, etc. You would have IGA. Forming an authority and an IGA should not be an issue between the four entities. Until it is established and funded, the other questions take a back seat.

19. Other than call taking and dispatching, what other services do your telecommunicators provide?

- Already answered.

20. If consolidation occurs, do you think that one of existing PSAP can fill the facility needs or is construction required?

- I don't think any can handle all four in one facility.

21. Is there government land available if a new facility is necessary?
- The Wilson Kramer facility.
22. Does your PSAP take non-emergency seven-digit calls for other agencies? Are there services offered for other governmental operations and not-for-profit agencies?
- No. (water authority but only from city residents).
23. If a consolidation occurs, how do you foresee governance and funding of the consolidated PSAP operating?
- Governance has to be equal across the board. The funding has to go to the regional operation – no fiduciary or money going to the counties and then funneled to the region.
24. What impact do you believe a consolidation/regionalization will have on the services provided to the citizens?
- I believe there is an issue as far as time delays. Seconds count.
  - They are proud that the services are provided by the city. There may be people that complain about still be taxed at the same level and not getting the level of service that they are used to. Will my taxes go down?
  - I think (speculation) there is going to be a year or two learning curve on how we operate. Response times could be delayed. We need to be at the door for our ISO rating within 4 minutes to maintain our ISO rating. There could be an impact on business and insurance costs if rating goes down.
  - If done correctly there should be no impact. Has the potential to delay responses and affect the public's perception of the first responders. Potential for liability increases, safety of the officer out on the street.
  - For those that pay city and county taxes, they may realize some efficiencies by re-allocating some resources, but we need to maintain an operationally and sound process.
  - The 2 cities may lose out. They are urban environments, I anticipate there would be delays.

- Response times, the ability to handle the significant increase in volume. Ability to interface with city departments. Could keep the center to use as camera monitoring facility but that would increase response times by having to make another phone call.
- Would want them to continue to do what the PSAP does now – yes, but that would be a political issue. If they don't the cost savings diminish and the consolidation doesn't have a financial benefit. Can we have an Allentown pod – that could work.
- Airport Road and Avenue A – the Wilson Kramer building in the city of Bethlehem. Could it be built in phases, using pods? Can we do that in four years?

25. Have you considered how your organization would provide services and responsibilities currently managed by your 9-1-1 Center that may not be provided in a consolidated or regional environment?

- We've thought about it a lot but don't know how we are going to do it. It is a big concern.
- Not looked at that. We need to have the service that is being provided currently.
- Tech services would need to be kept (they are not funded by 911). Monitoring of cameras is important. Pre arrival information is so important – we can stage differently, respond differently, fire – vs. smoke showing as seen on the cameras by the PSAP.
- No concrete considerations at this time. We are evaluating the impact.

26. Any other comments?

- PEMA promised at a meeting that they will fund it (consolidation – and mentioned \$15 million) and that it is their priority.
- There are ways of working together and saving money – shared CPE for instance.
- Level of service and input at the table on operations.
- The mayor said it – we've been given a bad bunch of lemons and we don't like it but we need to make the best out of it that we can – we need to maintain the level of service that we currently offer.
- Need to find a way to everyone else's opinion.
- Allentown is the 3rd largest city in PA. The current PSAP staff is aware of the compliance needs of the organizations they serve.
- There is a history of consolidation in the region. Chamber, visitors bureau, EDEC, airport. A new organization with a new board with representation from all would not be a big problem.

- Just combining the cities with the counties I think is a mistake. I don't think they are ready to handle it.
- Set up a new organization with a new management structure. I don't think moving from a city/county PSAP and then a combined 4 PSAP center would work. The counties would not want to move forward after they have absorbed the cities.
- A regionalized approach can succeed – we put the professionals in charge and leave the politics out of it. Get the funding, we can have a model facility. If it is just rammed together it will fail.
- No other thoughts – if there are fair benefits and a competitive salary package a union could probably be avoided. PSAPS staff are covered by Union benefits – the city does pay into the benefits package.
- I think the cleanest way to go would be the cities being absorbed by the counties. The counties already have their HR and other departments and policies set up.

## **City of Bethlehem Compiled Interview Responses**

1. What services does the PSAP provide for your department/agency?

- Call Taking and Dispatching
- Cameras
- Housing authority cameras
- Lehigh university cameras
- Non-emergency calls
- Warrants – logging warrants and will attach that warrant into CAD screens for the person's name.
- Information services
- Specialized channels for specialized units
- Special events in the city (music fest, marathon, etc.)
- Mobile comm unit – they will dispatch for the events, DUI checkpoints
- Alcohol patrols at universities
- They will prioritize calls and dispatch them out, relaying information from cameras from incident scene
- They are familiar with the city and the officers. Know local establishments.
- EMD and pre-arrival instructions
- Call taking and dispatching.
- Recordings
- Med patches
- New world CAD will be able to export data into EMS reporting.
- Admin assistant is in charge of billing and can check into CAD for data (insurance information, etc.)
- Provide updates from police on scene, etc. really on the ball with this, very helpful.
- Camera system – provide some updates (MVAs, accidents) Fire departments can provide drivers for ambulance if crews need to split or if both medics need to be in back.
- MDTs in the vehicles and can view dispatcher notes. Especially if they enter something that they don't want to air over the radio. They can also see call histories.
- Instant messaging capability from call center to MDT units.
- Hydrant locations, mayday protocols, SARA Title III information, knox boxes, contacting building owners.

2. Do you have any experience with any type or form of regionalization or consolidation practices?

- In a prior role acquired another utility as water and sewer director, added municipalities on the system and allocated costs back to the entities. EIT consolidation between municipalities.
- Yes in fact with the water and sewer authority. Not anything with 911.
- Regional task forces and federal task forces.

- No.
- No.
- Yes – with public works and water authority.
- Bomb and Hazmat team for the county

3. Have you thought about the future of your organization and how a regionalization or consolidation of services could benefit your community?

- I can only imagine that there are efficiencies in capital equipment and operating expenses based on city financial pressures, I'm interested in see cost reduction without any degradation in the service offered to citizens.
- Cost savings – financially. Revenues are in question. Capital and maintenance along with personnel costs.
- Yes – I think it would be exciting if we were joining as one, staff would be excited for that but not for being absorbed by the county.
- Interoperability and situational awareness.
- We must provide the same high level of service as today. We need to maintain the use of the camera system.
- 

4. Do you believe regionalization or consolidation should be considered?

- Yes.
- Yes I think everything should be studied. Have all of the options laid on the table will be helpful including paying for it ourselves.
- I think it should be considered as long as the same level and type of services are offered. Would like to see a satellite station if the county absorbed the city.
- We would like to keep our employees and our rules and regulations.
- First step county/city and then the second step would be down the line would be the counties absorbing. Keeping our degree of services as a satellite with county being main dispatch center.
- Yes.
- Our center runs very functionally, others may seems more advanced but it think we are better off, cameras, city knowledge, functionally I think we run smoother than the county but I understand that it has to be done financially.
- Regionalization – four PSAPs into one.
- Yes.
- Yes, regionalization should take priority.

5. From your perspective, do you feel there are benefits of regionalization and/or consolidation?

- There could be, my biggest concern operationally is the interface between the event in the field that may not be documented on a record management systems I hoping the here is interest to link the event and the record systemically through one system (preferably New World). If we take that interface lightly and disconnect it, that would be a really, really bad thing. We don't want to have to pay for a new one. The element of regional consistency of operations has merit. If the cities have to compromise their method of operation, that's a bad thing.
- Cost savings on capital and maintenance costs, some minor cost creases in the beginning. The state wants to see regionalization.
- Yes – staffing – larger pool to pull from if there is cross training. Cross training was tried before but didn't come about.
- It would be better if it would be consolidated into one 4 PSAP center. However, since everyone does things differently, it will be a big learning curve. Better staffing if we are all together.
- Interoperability.
- Cost savings, leverage with capital purchases and maintenance agreements.
- Yes, we have a history of doing this, but will it save money.
- Duplication of services should be eliminated.
- More cost effective.

6. What obstacles and challenges to a regionalization or consolidation effort can be expected?

- The wide variety of interest to pursue integration. I see fewer job, exactly who is going to be placed into those jobs will be interesting. Union issues with employees will be an issue – labor. How will the radio system be worked out – our city departments utilize the radio system. Municipal authority does have a seven digit 24 hour call in center. What is the regional facility going to be? Wilson Kramer facility probably needs about a million to get ready plus operating costs. Would be ok if funding is available for the facility – must be used for public safety.
- Bethlehem has always had their own system and the resident like that and have a level of comfort with that. People are going to be nervous about giving there 911 service. Changing how the cameras are covered is a concern. How do we pay for that? I don't think other people are going to see the benefits of giving up our service. People look at 911 as a basic service and will not want to give it up - that perception will make a lot of people uncomfortable.

- Less with a regional PSAP if each entity has a “POD”. We will still need to provide the level of services the citizens need and expect. Radio systems – how will this be handled?
- I don’t know if Northampton County uses EMD which is required for billing. With Medcom we are supposed to go through eastern pa medcom. Five dollars per cost. Currently going directly to in-city hospitals through base stations at the hospitals. If we need to use medcom our budget will go up. The medical command needs to be recorded. Using med channel 4 for call- in, then assigned a channel.
- If we had pods (colocation), less challenges, but all together – issue with departmental policies, etc.
- Politics, personalities.
- Loss of jobs.
- Territorial issues, loss of resources.
- Loss of good lead people – we have good leadership.

7. From your perspective, do you believe there are any negative effects that will result in considering any regionalization or consolidation efforts?

- Potential for degraded services. Maintain the cameras. Loss of jobs, displacement. Can we take advantage of attrition?
- Level service loss. Monitoring of the cameras must be maintained. Nervous feeling from people about the losing something that has worked for a long time. Currently the county gives a tax deduction to city residents that use the cities PSAP. Will that tax go up? People that have used the system will have an emotional connection to the staff members and will be concerned about them losing their jobs.
- Hard to say what the drop off will be. We know what we’re used to, we don’t want that to drop off (Level of service).
- Lack of knowledge of other areas – learning curve for learning other municipalities.
- I don’t really see technology issues. If we are absorbed by the county I don’t know how we would it would work, we do so many things differently procedure wise. I think many employees might leave. Right now we have issues with how the county operates (big file of complaints), calls transferred and not dispatched, put on hold for five minutes with recording.
- Potential loss of service, loss of center and loss of focus.
- Quality of service, cost, loss of jobs, union consideration.
- Loss of customized service
- Personality issues.
- Union issues.

8. Does consolidation make sense for your area from a service level, political, technological and financial perspective?

- Financially it does – cost savings for capital and ongoing cost. Technical – must keep record management.
- Politically – I think there will be political challenges to it (people will be concerned about change – resident, fire, LE, and EMS staff also). If only a move, I think it's hard to prove that the level of service will stay the same. I think people will be willing to pay more in taxes to keep the PSAP within the city and providing the same level of service.
- Technological, financial and political yes – service level is the big unknown.
- From technological yes – the bigger they are the more power they will have to get bigger better things – regional center.
- We run efficiently – but I can see it from an area perspective. Customer service is very high in the city. We send the police to everything. I worry that we will lose some really good people.
- Yes.
- We must keep the public educated as to what is happening.
- Yes.

9. What do you see as the goals for any regionalization or consolidation? (reduce costs, improve efficiency, etc.)

- Has to be improved efficiency. That efficiency is going to benefit the state and municipalities as long as service level is maintained.
- No loss of service.
- Cost savings.
- Cost savings and improving technology and keeping the same degree of service that we have now.
- They do time checks now – don't know if other PSAPs do that. The can patch us through to police or fire units if needed. We can monitor other channels.
- Goal – continue current level of service and improve services.
- Effective service and cost savings.
- Keep the same level of service.
- Reduce costs.
- Interoperability.
- Control over communications.

10. In your opinion, does your PSAP have the resources available to effectively operate into the future?
- Yes.
  - Through no fault of the city, I think there are necessary changes needed to make the 9-1-1 system sustainable (financially).
  - Yes.
  - They could use more dispatchers in there – some days they are overwhelmed. Festivals, snow days, big fires, etc.
  - Yes.
  - Yes, but would require a tax increase.
  - It will be very difficult – probably require a tax increase.
  - Stagnant – it is limping along.
11. Is the current infrastructure (equipment, technology, connectivity) able to be maintained long term?
- Yes. New CAD, going on Allentown's switch. Northampton going on our radio system.
  - Yes.
12. Does your PSAP have room for expansion and possess the capability of assuming higher call volumes and dispatching services?
- May be a square footage constraint in its present location. We may be able to find room in city hall. Financial constraints if the funding level doesn't increase.
  - Can't answer.
  - Not in this building - 7 consoles currently – work 5 per shift in the summer hours on days and 4 at night. Winter hours 4 days and middles and 3 after 3:30 in the morning.
  - No.
13. Are calls frequently being transferred among or between agencies?
- Transferred more to us than us to them. Mainly for EMS response to fill boxes.
  - We have emergency line to transfer calls (seven digit) with ANI/ALI transfer. Direct ringdown without ANI/ALI. They have had calls transferred from the county that were in the county and were sent right back to the county for dispatch.

- Yes.
14. Would consolidation reduce or eliminate the transfer of 911 calls between agencies and improve response times and lower liability?
- Not so much on our end.
  - Marginally.
15. Do multiple agency responses that are coordinated between and among multiple dispatch centers?
- Not really.
  - We can patch state police and fire department into our radios – done through the center.
  - Yes, comm center will coordinate. They will patch us through common frequencies.
  - There are some common channels
  - Some.
  - Occasionally for EMS.
  - 95% are in-house.
16. Would consolidation improve incident coordination and interoperability?
- If done properly.
  - Yes – it is fragmented now and consolidation would help.
  - It depends – if we are as one big group it don't know if that would solve the problem.
  - Yes.
  - Yes.
17. In considering of a regionalization or consolidation of services, do you have any strong reservations or concerns?
- Level of service, records management. We have to have one eye on the governance.
  - Key to the whole thing is an education component as to why there would be a change, this the situation, this is what we can't change, these are the options, this is what they cost. This is what we are going to do and why.
  - Level of service to the citizens and maintaining what we have now – nothing to a lesser degree.
  - I hope that we will continue to do things the way we are doing them now. Open to change, but don't want to change just because the county operates one way.
  - Loss of staff.

- Concerned with different procedures.
  - Loss of service and loss of voice in operations.
18. What in your opinion are the most important considerations that need to be made when considering either regionalization or consolidation?
- Governance, efficiency, service.
  - Level of service, cost saving
  - Citizens are serviced the way they expect to be and are not put in jeopardy. Maintain level of service or improve.
  - How the citizens get their calls – want to maintain the high level of service that we offer.
  - What is best for 9-1-1?
  - Planning for a regional center.
19. Other than call taking and dispatching, what other services do your telecommunicators provide?
- Researching calls, pulling camera data, scene control, control point for crime scenes, a dedicated resources for the emergency services.
20. If consolidation occurs, do you think that one of existing PSAP can fill the facility needs or is construction required?
- Unsure.
  - Don't know but I am skeptical based on information that I have received.
  - No.
21. Is there government land available if a new facility is necessary?
- Other than Wilson Kramer – can't think of any other space.
  - Wilson Kramer facility
  - The Wilson Kramer facility.

22. Does your PSAP take non-emergency seven-digit calls for other agencies? Are there services offered for other governmental operations and not-for-profit agencies?
- Moravian College police and Lehigh University police – we handle their calls. We monitor and dispatch for the school district (school security), parking authority. Public works calls transferred to public works dispatcher (24 hour dispatcher).
  - For the Department of Public Works.
  - Snow Emergency Lines.
23. If a consolidation occurs, how do you foresee governance and funding of the consolidated PSAP operating?
- I would see an authority being set up for governance of a regional PSAP by the four municipal governments. Inter-municipal agreements for cost sharing of resources that are turned over to the consolidated authority.
  - No idea – I think it will be challenging.
  - Most important thing to me is the price tags for the different options.
  - The creation of an authority with the funding being disbursed from there.
  - An Executive Board.
24. What impact do you believe a consolidation/regionalization will have on the services provided to the citizens?
- I do – I know that it will be evaluated robustly, I think that some of the things that we do in order to provide the service will be no starters as far as a regional facility. There may be outliers that will not get considered in a regionalization.
  - No loss of service.
  - I hope none. No delay in dispatching now. Hope that that would not change if the calls go to the county.
  - Worry about the knowledge of the area. Knowledge of the procedures, worried that that would result in delays in dispatching. Don't see it running as smoothly as it does now.
  - None – there must be the same level of service.
  - Must stay the same.
  - Improved services.

25. Have you considered how your organization would provide services and responsibilities currently managed by your 9-1-1 Center that may not be provided in a consolidated or regional environment?

- Yes – we would have to maintain the cameras here. We are more of a command center.
- Not sure
- I think the only way to do it is that we would have to maintain a crew here to handle the services, along with special everts and warrants, cameras, and anything else. Non-emergency number currently rings into PSAP.
- No idea what will be done. If they don't take our cameras, we will still have to pay someone to monitor them.
- 

26. Any other comments?

- Other than I would be very interested in seeing the financial review when it is complete. The dedicated city tax millage amount for 9-1-1 cannot be higher.
- Whatever are the theoretical options for not only the city council but for the residents?
- We are attached to our system and want to make sure that we don't have any drop off. The level of service must stay the same for our citizens.
- Want to have the city have equal representation on governance of any consolidated or regional center. Don't want to lose the level of service currently provided.
- I like the idea of a regional 4 (PSAP) PSAP.
- We must have the same level of service that we have today.
- Clear operational guidelines are imperative.
- Need to use the best employees.
- Use of the Wilson Kramer Facility.
- The four executives from the cities and the counties must make the decisions.
- We can't cut back on services.
- 9-1-1 and EMA together.

## **Lehigh County Compiled Interview Responses**

1. Do you have any experience with any type or form of regionalization or consolidation practices?
  - Previously in 1992 township/borough PSAPs were brought into the county PSAP.
  - Within the county we have downsized the number of employees through attrition, eliminating positions or outsourcing.
  - Not 911 but in private sector.
  - We've consolidated townships and boroughs in the county everyone thought it wouldn't work, but it has worked well and our relationship with the township and borough is better. The biggest mistake that could possibly be made, if you take an area this big and combine all four into one, you're asking for trouble.
  - The only one basic involvement when the county took over a township and a borough. Over time we absorbed them. It was a political hotbed – the locals had a lot of outcry on the county taking this over. Was some animosity at first with first responders – a lot of accusations and complaints initially.
  - Very little.
  - At Berks, the city of Reading, we took the calls and transferred to the city. The city then contracted with the county for fire dispatch for 18 hours a day. The sops were different for the city fire dispatching than the county dispatching and reported to the fire officers.
  - Expenses that are lateral to 9-1-1 centers need to be captured – light duty officers working at the PSAP but being paid by police department but not the PSAP need to capture that.
  - We are at the forefront – joint airport authority, joint transportation authority. I would love to see even more regionalization. Even if the counties joined we would have even more political power.
  
2. Have you thought about the future of your organization and how a regionalization or consolidation of services could benefit your community?
  - Staffing – we are currently maxed out – if we don't have sufficient staffing it won't benefit anyone
  - We have given a lot of thought to this over the past two years, we recognize that something was going to be done. I very interested in making sure that we develop an effective plan that serves the citizens of the county. Funding is a very big concern on protecting the taxpayers of the county. Who will fund what?

- I don't think that there is going to be a great benefit to it. What you are talking about is the politicians trying to force the cities to close. The cities are more command and control centers, while we are more call centers and dispatch.
- There is definitely a lot of thought put into it. The mind focused on the unknown. From the public/responder perspective there could be an advantage on cutting down on some time from inter-PSAP processing.
- I think it would be a positive for the community. They are more of a command center we are a dispatch center.
- My thoughts on how I would like to see this – move forward with the CAD and CPE regionalization of technology. My preferred scenario – we handle the calls and enter into CAD and transfer to Allentown for dispatch. They are a command center we are not. We would be responsible for the equipment. We could handle more people here but would be tight on space. This needs to made clear to the elected officials what we are talking about.
- I think when you have regionalization you have an economy of scale which is important. If we have one system covering the whole valley we could offer better service.

4. Do you believe regionalization or consolidation should be considered?

- It has to be – we are getting some calls for both cities now.
- Not really in my purview.
- The reality is the cities can continue doing what they are doing. We do not want to fund the city as a pass through. If they elect to go along we can create a memorandum of understanding. We have a concern for doing the right thing for the taxpayers. Regionalization (equipment) – is an opportunity to create regional plans to provide backups and overflows. That would be shepherded by PEMA. That would support all of the equipment sectors. We could work with other surrounding counties on equipment sharing to create a seamless backup.
- We know we are responsible for Allentown and west Bethlehem. But we need to see financials before we can decide anything.
- I think it's going to happen eventually. I think the best solutions is we will have the cities incorporated into the counties and have the counties mirror each other.
- Consolidation should be considered but not regionalization into one 4 PSAP center. I do not support a regional concept.
- Yes, I think financially we can make gains there saving tax payer dollars and stand to do better in contracts as a group.
- Definitely.

5. From your perspective, do you feel there are benefits of regionalization and/or consolidation?
- Yes – sharing of information, we listen to the city scanner and will call them or they will call us. Less of a delay in sharing information, we share info a lot, especially with EMS. Our systems could be upgraded.
  - I hope that is what this study will show us. My previous experience is that it was born out of need. It is unclear whether anything will be improved in terms of service. We hope that there is an improvement in funding that will help pay for this.
  - There may be opportunities to save money - those are unclear to me at this time.
  - Putting everything under one umbrella, we are an urban area and should be operating in terms of our services as a region.
6. What obstacles and challenges to a regionalization or consolidation effort can be expected?
- Knowledge of the geography. Dispatching procedures are different. Numbering of units – some police cars numbers are overlapping now between the county and city.
  - Different radio and CAD system. Number of Spanish speaking calls that are for Allentown, language line use and costs will go up.
  - Schedules – how will different schedules be worked out? Seniority – how will that be worked out?
  - We would be able to accommodate what direction is ultimately determined. All the issues would need to be addressed as how we would approach it and integrate it.
  - The feeling by some of loss of control. Having the four PSAPs merge - ensuring that we have the support of the merged PSAPs for the project to be successful. Funding is a concern. If PEMA doesn't fund the expectations, will that fall on the current PSAPs/counties? Can we divide the responsibilities of funding on PEMA and the counties?
  - Lots – four entities that do things completely different, how services respond, what they do and don't do vary greatly. The cities are command entities – we are service entities. A tremendous hurdle to get over the operational differences as they currently stand. Cannot happen overnight – that change does not come easy – it will take time to get over the human element. Can introduce chance for error.
  - Change – people don't like change. From the customer side, first responders in the city and the county are used to doing things a certain way. There will need to be compromises.
  - I don't know that there is concern on our side (personnel) but probably on the city side. Concerns on training.

- Radio will be the biggest issue. How do we integrate a union shop? We are not a Union and don't want to be a Union shop. We are able to have a lot of flexibilities with our employees and may lose that with a Union.
- The biggest problem have been people trying to hold onto their local identity. The unions have been an issues in the past also.

7. From your perspective, do you believe there are any negative effects that will result in considering any regionalization or consolidation efforts?

- Being overworked, over stressed if we don't have the staffing. We will lose good people if we regionalize. Should be ok if we just take over the city.
- Scheduling could be an issue – concern over changing type of shifts.
- Space concerns here at the county – do we have enough space – just with putting the city here – where are we going to put all the people. Occasionally we will have 8, 9 or more people working.
- We would need to look at all the options and see how we are going to deal with them.
- We understand that there are certain mandates that we will have to take on. We need to let go of how we did things in order for this to work.
- Consolidation means job loss and employees knowing that there is a plan in place that may not include them.
- Union and non-union shops.
- Undefined expectation from PEMA. We need to have clear expectations identified early in the project from PEMA and all for entities.
- The initial responsibility is to take on the cities – regionalization would be down the road and explored with a larger web with other counties in the area.
- Our metrics and service levels are high in the counties and it is clear that we have to address that first and then look down the road.
- I think there will be negative effects longer term if everything is turned into one regional center. Regardless of what happens there will be negative effects short term. I see that happening longer in a regional center. We would need a board of governance like in Monroe County. The counties fights yearly on funding. It will be long term issues for the employees.
- These decisions should not be made lightly – decision should not be made based on dollars and cents but on what is best decision that can be made from an operational perspective.
- Political barriers – strengths and weaknesses within all four entities. Will the approach change with different players in the future?
- Employees will be cautious about change.

- Learning curve in the city learning the county and the county learning the city. Where do the employees fall into the hierarchy if the city employees come here? How about salaries? Levels and integration.
- We will taking on more debt from the cities to the counties – I'm not sure that is the case.
- Response times – if it is operated efficiently that should not be a problem.

8. Does consolidation make sense for your area from a service level, political, technological and financial perspective?

- Service level – yes – sharing resources and information.
- Political level - funding decisions – what are the salary considerations and benefits going to be?
- Technological perspective – county would benefit from upgraded equipment. Even the numbering scheme on fire and ems would be better if it was all one numbering system.
- Financial perspective – wages benefits? What will the impact be?
- N/A – my work will all be on the back end after the decision is made.
- We need to be considerate in the consideration and approach that we take with the citizenry on how we roll this out.
- Service level – I don't know if we will have service improvement.
- Political level – communications must be clear – there will be challenges – we need to be considerate to all of the other municipalities and maintain that level of service that we currently provide.
- It needs to be thought out very well before we roll it out to elected officials and citizens. What are the other municipalities going to think - are there concerns maintained in their confidence in our system?
- Technological – no issues, cost money, but if we have a good comprehensive plan so that we have a system that works.
- Financial – don't know – I don't have a clear knowledge of the cities' budgets, not sure about the functions that are will be continued. Where does the mission start and end? Who is funding it? Future – we have an expectation today that there needs to be clear direction from PEMA and the PSAPs on what the future might be. If we continue to add, is it a PEMA /county issue, or a county /municipality issue?
- Political – I'm not a politician – can't really give input
- Technologically – there are some things that do make sense and don't make sense.
- Financial – over time there could be financial advantage, up front there will be cost in taking disparate systems and combining.
- Yes, especially from a financial sense.

- I don't know if it will be better fiscally. Allentown has a large call volume. We will need to absorb that – increase staff.
- Service level – yes
- Political level – there will be squabbles but it makes sense to me.
- Technological – yes – all being on the same footprint.
- Financial perspective – to be seen – but we are looking at service that we have to provide no matter what the cost. If it cost a few more dollars for regional service it is worth it to have a better service

9. What do you see as the goals for any regionalization or consolidation? (Reduce costs, improve efficiency, etc.)

- Cost savings and efficiencies for the taxpayers and maintaining the high level of service that we currently have.
- Equipment regionalization is important - it makes a lot of sense. We need to have to make sure that we have our equipment thoroughly identified and supported by PEMA and funding. Redundancies for overflow and backup. This is very important. Cost savings – there might be opportunities. The building has been built for the future.
- I think this is something that is needed. I think cost savings is the ultimate goal. All four PSAPs are very professional. I think it is sad that they are in this position. But I do think that there are cost savings that could be had.
- In the long run there will be some fiscal savings. Benefit to sharing equipment, with two centers we can back each other up.
- Get it done quickly – we've designed the facility to cover the whole county. Have the legislators force it to be done – make the decision and go forward with it.

10. In your opinion, does your PSAP have the resources available to effectively operate into the future?

- Yes.
- As an individual PSAP. It is unclear to me what the equipment responsibilities will be going into the future. PEMA has indicated they will support the equipment.
- As long as we keep moving forward as we are. I don't want a Cadillac but we don't want a Yugo. I think the equipment is robust as long as we keep moving forward.
- Out technology works currently, for future, we can always improve if you have the money to throw at it. We do have some end of life issues – CAD, CPE.

- Yes. Good personnel. Very professional, very good equipment, not sure if it is scalable. Will need more manpower. Our personality is good, we can work with other people. I think this could be a model project.
- Not at this point. We would need to get the state on board to get what we need – CAD and equipment. I don't think this space will be good if we need to combine spaces – juvenile center as a possibility?
- As we are going along right now we do not have the resources – we will need funding. Raising property tax will be a problem.

11. Is the current infrastructure (equipment, technology, connectivity) able to be maintained long term?

- No. They need to be upgraded. CAD and Radio.
- Out technology works currently, for future, we can always improve if you have the money to throw at it. We do have some end of life issues – CAD, CPE.

12. Does your PSAP have room for expansion and possess the capability of assuming higher call volumes and dispatching services?

- No expansion – not with current staffing.
- Absolutely - the reality is we can expand today. From an equipment perspective. We will need a plan for staffing as we move forward. Learning new, we will need to develop training and hiring plan to meet those demands. We knew this day would come and we started preparing early.
- No room for expansion here. We have the capacity (in equipment) for a year or two.
- I think from the physical perspective we can but not from the staffing perspective.
- Yes – I don't like this location. I think that we are in a high hazard area and should be looking at relocation to a lower hazard area.
- I had been told that we could cover the city if the need will arise. I don't know that we could cover both counties. We own the building and we can move people around if needed.

13. Are calls frequently being transferred among or between agencies?

- Yes.
- Fair amount. County to city and city to county, as well as Northampton and Bethlehem.

- I would think that transfer happen about the same frequency as other PSAPs.
  - There are some – don't know the percentages.
  - Yes.
14. Would consolidation reduce or eliminate the transfer of 911 calls between agencies and improve response times and lower liability?
- Absolutely – We have lots of transfers for Allentown and Northampton.
  - The only way it would eliminate those transfers is if there is one regional center. Transfers would still be necessary to surrounding counties. As far as improving responses no, when we get a call, the other centers are getting calls on the same incidents.
  - Its inherent that transferred will be reduced and improve response times and improve liability since you are eliminating transfers. A benefit to the public.
  - Would be more effective if we can remove the transfers. We could improve response times and liability would go down.
15. Do multiple agency responses that are coordinated between and among multiple dispatch centers?
- Yes – fire especially (will even go to berks and bucks) most from Northampton and then Berks.
  - Only for mutual aid on second alarms – the request would come from the city.
  - Not a big issue. Some mutual aid frequently amongst EMS.
  - Yes – but they are handled smoothly. Hazmat – there are coordinated. Work well together on incidents like that.
  - Not a lot but it works well when it happens.
16. Would consolidation improve incident coordination and interoperability?
- Yes.
  - No. The city is its own animal. It's a city not a township. It might improve interoperability.
  - Most is coming from the scene. From the interoperability perspective, there may still be issues with interoperability using different radio systems.
  - Streamlining would show a cost saving. If we go to one center – what is the backup? We don't want to have to ask for a backup facility.

17. In considering of a regionalization or consolidation of services, do you have any strong reservations or concerns?

- All of the people are worried about what the future holds – are we going to have to relearn how to dispatch for different areas? Will staff from the city learn our positions or will they just do the city, and vice versa? For regionalization – staff are concerned about being a large call center (we are cross trained and our people don't want to be just call takers) – we will lose good people if they are forced to do that. This could become a scheduling nightmare. Will we have separate scheduling, staffing? This could be a scheduling nightmare. Are we going to be truly together or just co-locating?
- No.
- Developing an effective plan, communication with the public, supporting the employees. Our biggest concern/unknown is what will PEMA support what will be the expectations of the PSAPs, now and into the future.
- We understand the mandate, we just don't know what the expectations of the mandate are. Any personal agendas or personal agenda - those would be disingenuous to this process.
- I think the whole thing is a mistake. I think it should remain as it is. The system isn't broke, why change it. My biggest fear it going into one center for a metropolitan center of this size with one point of failure.
- Concerns about the job. Scared to death as to what might happen. Politicians are putting their noses would they shouldn't be. I've dedicated my entire life to this and I'm concerned about what might happen to my job, what is my future going to be? I'm here to serve the county population and I don't want to be pigeon-holed into a job created just because I'm here.
- Operationally – I'm not a bigger is better person. When you become larger the consolidation perspective, you are going to delay things, when you aren't familiar from where a call is coming from you are going to take longer. That can be resolved over time, but you lose that less personal service.
- No – I think we have smart heads on board for the technology to figure how to get it down. Those same heads would prevail on setting up a training system. Issues will be resolved. Union shop – how will that be handled. This could be stickler for Allentown's staff coming over.
- The biggest concern I have is that they want to go with one center consolidation for all four PSAPs. I think that is a mistake. As far as the consolidation of the cities into the counties and making it so that we can back each other up is the way to go.
- None at all.

18. What in your opinion are the most important considerations that need to be made when considering either regionalization or consolidation?
- Adequate staffing. Space - if you put 16 people into that space it will be loud and claustrophobic.
  - The continuity of service, integration of personnel and training.
  - Location – easy access for everyone and who will be the governing body? What will the makeup be?
  - There is a huge risk from the human perspective – this is instilling fear. I fear that we will lose good people.
  - Four disparate radio networks that will need to be consolidated. Operationally, everything is done differently. From training and operationally – there will be a huge learning curve.
  - I value their experience – I think we might lose a little of that in the crossover. I think that if we do this right we can go into other areas and expand to increase cost saving in the future. We would be streamlining and I see a lot of positive in that. One of the shortfalls is that there will be lull in the action while people are being trained.
  - There's equipment but the people are the most important. We need to keep them up to date and assure them. There is no way with the staff that we have to double our call volume. There will be a learning curve, especially with city staff learning the rest of the county, plus the county staff learning the city.
  - Locally – to bring the city in without having to bring the union in.
  - Valley wide – location of the facility. Still a little bit of jealousy between the two counties as to who gets what has been an issue in the past.
19. Other than call taking and dispatching, what other services do your telecommunicators provide?
- They do so much: after hour's notifications - coroners, sheriffs, alarms – hospital and bank. Tower alarms. Scheduling, TAC officer, JNET.
  -
20. If consolidation occurs, do you think that one of existing PSAP can fill the facility needs or is construction required?
- Yes. We have space available – waiting on the plan.
  - This would be able to work for a city/county consolidation, but probably not for all four. There is another floor here with office space.
  - Locally – yes, ours.

- Regionally – we would have to look hard at this facility to see if it would be able to accommodate it.

21. Is there government land available if a new facility is necessary?

- Lehigh County has land – the Cedarbrook facility – development there is possible on the land, current facilities could also be renovated there.
- Allentown is 30 % of population – it central, we have space and systems that are ready here. We have floors below that are vacant and could be used. The 7th floor is purposely vacant at this time. We have out clauses with all tenants in case we would need the space.
- There is a facility – the juvenile facility (370 South Cedarbrook) could be a possibility outside of the city on the cedarbrook campus, near the new JOC.
- We have plenty of government land – cedar brook campus - large nursing home, two juvenile detention facilities in mothballs would need to be torn down. EMA vehicles and DA lab vehicles are stored there (78 and 222 – 78 at Hamilton avenue).

22. Does your PSAP take non-emergency seven-digit calls for other agencies? Are there services offered for other governmental operations and not-for-profit agencies?

- Coroner's office, probation, Children and Youth, sheriff, municipalities' public works (snow removal, trees down, etc.) - this has doubled in that last couple of years. After hours contact for all county departments and all police departments.
- Primarily police fire ems, children and youth - courts DA's , magistrates, sheriffs - after hours. Very little with constables.
- After hours for all county agencies.
- 

23. If a consolidation occurs, how do you foresee governance and funding of the consolidated PSAP operating?

- Cities coming to the counties - the county would manage the center – a passing of the baton to the county.
- Regional – there may be an opportunity to create something between the two counties – we need to be cognizant of all the people we serve (possibly an authority).
- This is where PEMA's input is important. PEMA has a large responsibility in this. PEMA has got to become more deliberate in how they are explaining and supporting the individual PSAP – what they are going to be responsible for and what

- the PSAPs are responsible for. Subscriber based system should cover all costs completely. PEMA and legislators need to have a plan to support PSAPs into the future.
- What is truly 911? Leaving messages for an officer is something that counties and cities may have to pay for. It very important to understand that your expenses for capital equipment, maintenance, etc.
  - We want to make sure that we are accurate in our numbers. Call volumes, etc. what is 9-1-1?
  - The county would be responsible for management. They could come here or they could operate out of their own facility. Funding would come to the county and then the county would have the responsibility to maintain the system and services.
  - It will depend upon how it looks like. If we are split, we would be responsible to CAD and phone equipment they would take care of the building or some of the funding could go to them for the building.
  - What is the makeup going to look like? Initially city staff will probably doing city stuff and then at some point have cross training.
  - Governance just the city – it is just dumped into the county’s lap
  - Regional – would like to see what the models are around the state.
  - We could set up a governing board with people from both counties.

24. What impact do you believe a consolidation/regionalization will have on the services provided to the citizens?

- Good impact – quicker response times, no delay in transferring the call. We gain a lot of resources. City of Bethlehem fire doesn’t like to work well with the volunteer department. Could be a big impact on the fire and police – bringing in new people you will lose the rapport that has been currently built up with the field units. Field units will have to adjust to new ways of dispatching and responding – they don’t like change. Big changes to SOPs for field units.
- Undefined at right now – I don’t know what all of the services that are being provided by the cities. I would hope that we can advance the product that we are providing today and reduce the cost if at all possible.
- Our center is capable of serving the municipalities right now. We have different services that are offered that are different then the cities. Our staff and our training and our SOPs can maintain the service, if not improve the service in a cost efficient way.
- Best case scenario there will be no impact – should be seamless. However, if I take a call in Nazareth, I will not know the area and be unsure of the location. There will be learning curve in this and may have delay in the beginning until familiarization is

learned by the dispatchers. We currently verify location, and if the equipment is working well, there shouldn't be an impact.

- Having to work with a lot of field units. More delay, more potential for error, more learning for the staff. Radio operations is different, numbering schemes are different, duplicate numbering systems, etc. How will this all be handled? How will it be integrated?
- County and city staff will do a phenomenal job. It depends on how it is presented.
- I believe it can be more efficient and seamless.

25. Have you considered how your organization would provide services and responsibilities currently performed by another 9-1-1 center that may not be provided by your 9-1-1 center today in a consolidated or regional environment?

- New learning curve for new technologies. Cameras – we could do them if we have the people.
- Cameras – good opportunity to take on those tools. We have to develop our sops to incorporate what we agree to do. I'd love to see a map of a typical day – what is it that they are doing. If we are talking about 911 or communications center - what will PEMA fund – just 911 or other ancillary duties? We need a clear decision on what is funding from PEMA. Will the cities continue to fund ancillary services if PEMA will not? The county cannot take on additional ancillary services if they are not paid for.
- As long as we are able to accommodate the merger, bring everything on that they currently do here with extra staff, yes it should not be an issue. What about union vs. non-union employees how would that work. Service wise we could accommodate and do a good job, I think that the city employees that come over would do the same thing – we want to do our jobs and so do they and provide good service to the citizens.
- How would the camera system be handled, how would the parking authority be handled, etc. Don't know if we have the space for all of that, possibly but we will be filled. 16 positions – mostly have 9 or ten on duty on regular shifts. Union concerns? How would a union be incorporated?
- Cameras – that is not in our business. The dispatching that we could handle. Do we compromise? The calls for Allentown might go up because we dispatch calls that they don't. The city police have an encrypted 800 system.
- These would have to be political decisions. Whatever is cost effective as far how it is done operationally, city staying put or bringing their staff here. I don't there should be one center. We should have at least two centers.
- If all four go together – I think the counties would need to decide how it is operated, public safety commissioner or something along those lines. I don't see that happening

- right away. We need to take baby steps. Things could change as leadership changes. One facility – the counties will need to decide how that is operated.
- I don't know that our facility would be able to handle that. That's why I like the idea of the city maintain their facility for dispatching and we take the calls and do CAD entries.
  - That has been the cities major issue publicly – if we get our heads together and figure things out, anything can be done. We should be able to solve the minor problems.

26. Any other comments?

- What about dress code? Uniforms. We pay for parking whether you park or not? RMS? Parking, accessibility (we've had cars vandalized).
- We don't want it (consolidation) to happen. We are happy with what we have now. We would like to have new equipment, but we don't want to consolidate. We can take the city but don't want to go to a regional center. Our break room isn't big enough for more people.
- Regionalization – I'm worried about interviewing again – am I going to be a supervisor or will I be a dispatcher, will we have more supervisors, or will I have more people under me to monitor.
- Scheduling will be an issue – we don't want our shifts to change.
- Will we have enough room to keep more people here overnight during bad weather? Some people may have longer commutes. If we took the city, we will be maxed out, and some things we will not have enough of (breakrooms, bathrooms, etc.)
- We would be bulging at the max even if we just take on the city. More people and no parking. Lockers are used up.
- We don't like being here – can we move (one benefit of regionalization)? Staff would like a different location outside of the city.
- Joint training center at Lehigh County Community College could be used – Schnecksville. As long as it is out of the city.
- Everyone on the staff would like to move. Safety is an issue when going to and from our cars at night.
- I certainly think based on when and how the decision is made we will work with EMA and 911 to implement whatever decisions are made. We have good HR in place and can support whatever direction this takes. Staff do a really good. We will have whatever is needed that we have to bring to the table to handle any new training or anything else. You have to be sensitive to whatever is taking place. This is an important public safety issue and will we support whatever is needed.
- We need to continue to focus on all of our citizens in the county. Ancillary services if not funded by PEMA, will the city do it or pay us to do it?

- We need to continue communications with our local legislators (the city and county and Northampton) we can make it work but there needs to be a good communications plan with PEMA and the legislators so that they can had a good plan for the future.
- Cameras – do other municipalities in the counties have cameras – we need to check – quick outreach to the police departments?
- Will the other municipalities now want the county to do other services for them if the county takes on ancillary services for the city? The scope of what 911 is is of utmost importance from the PEMA perspective. Funding – I represent the county, the whole county.
- If we are to do something different in the SOPs, we need to know that and agree to that right up front.
- This concept does hit a nerve – fear of the unknown – people are concerned about their jobs nobody likes change. Nobody wants to go into one center. People are concerned about their jobs. They know this area and want to work in this area, not dispatch for other counties or cities.
- I think for whatever reason is driving this is a mistake. The greater mistake would be merging every one into one center (all four), in my opinion. The county has an opportunity to do the right thing – get us into a secure center outside of the city. Build a new facility and do it right. Technology is changing and we need to keep up with it. We need administrative help here now. We are short staffed here currently.
- Discussion outside of the agency – citizens of the community? – Unless you're involved in the industry it would be hard to have a meaningful discussion.
- I hope that those that are charged with making these decisions truly consider everything involved and remove any political overtones – elected officials needs to consider all of the impacts not just dollars and cents. We need to consider what will the system do for my family, residents, not just are we saving money. I don't think that regionalization always save you money, some could cost more, especially upfront and ongoing maintenance.
- There could be an issue with the loss of institutional knowledge by the loss of staff with a lot of tenure.
- The radio piece will be an issue – we would have to identify a dispatch position or more for Allentown dispatching. All of our positions are redundant but I don't think we can do that with the radio system.
- Concerned about the employees. I want to make sure that they are taken care of. Equipment is neutral, the employees are the most important ones.
- I think regionalization is the way to go. The state has been anti regionalization and we have to get over that. We're getting there.

## **Northampton County Compiled Interview Responses**

1. Do you have any experience with any type or form of regionalization or consolidation practices?
  - Yes – government local level regional police force 3 - communities in Northampton County. Initial economic programs at the county level anywhere we can get 2 or more municipalities together is a positive.
  - Yes in private sector.
  - Just thinking about the previous consolidation and what a headache it was. Lehigh valley economic development.
  - Yes – Allentown water authority consolidation. People were nervous about the consolidation.
  - Yes. With the seven PSAPs into one – was a dispatch supervisor with the county and part time with a municipal PSAP when it happened in 1998.
  - No.
  - No.
  - No.
  - No, but I came in when the county took over from MCI and saw the challenges that came with that.
  - Personally no.
2. Have you thought about the future of your organization and how a regionalization or consolidation of services could benefit your community?
  - My impression we are working regional already today – not 100 percent, not formalized. I think regionalization will benefit the taxpayers in terms of dollars and service.
  - Yes – I think it could help redundancy and lower operational costs and maintain services.
  - I think it's always good to combine resources, streamline the organization structure.
  - Yes – were are actively working on it. Initiative through the Lehigh Valley first net we have started sharing CPE and have hoot and holler radio channels.
  - Yes – I'm for consolidation but not regionalization. Taking on the city will better serve the community. We do a lot of back and forth and bringing them here would reduce that.
  - Yes – I think consolidation could benefit the community.
  - I think it would benefit – I think there would be quicker responses, less confusion, less transfers. Regionalization – haven't really thought about that.
  - Yes I think the overall long term goal is justified in bringing the cities in line with the counties (similar to Allegheny County). Our answering for the whole county is a

more beneficial way of doing business. I think it will eliminate calls being transferred. With our combining EM and 911 the same would be true when the city comes on board.

- Regionalization no, consolidation of services with the city give more training ability. I don't see any benefits to regionalization, possibly a cost savings but there is not guarantee in that either.

4. Do you believe regionalization or consolidation should be considered?

- I think so.
- Yes
- Yes absolutely. It should certainly be studied and looked at.
- No – I think that – the number of population and the fire and police departments – I don't think that it's a bad idea globally, for Allentown specifically because of the expectation of the emergency responders they may not be getting the same level of service. They blindly know the areas – familiarity of the area, concerned that the quality of service to the responders would diminish.
- I think both should be considered at different levels and stages. I think there should be consolidation and then a regionalization of systems. Maybe a regionalization of PSAPs within 10 years? Would be a lot of politics involved.
- Yes.
- Yes.
- I think it should be considered. I think it would benefit the community.
- Yes. I'm much more for the city coming to the county for the sole purpose of where we would have to go for a backup, and the same for Lehigh County. Cost will be lower, if we have a large center we will have to have a similarly large back up.
- Consolidation yes. Regionalization of systems to be able to fall back on each other. Regionalization – no.

5. From your perspective, do you feel there are benefits of regionalization and/or consolidation?

- I think there are. If we look at the limitations of operating individually we are somewhat limited - there is another a bar that we can aspire to. ROI - we can leverage the dollars far greater even beyond duplication of costs, people assets, money invested can we get a good return.
- Yes.
- Yes.
- Sure – cost perspective. Overhead, Northampton's space is much more user friendly.

- Yes – one PSAP for the entire county - resource management done in one spot. We already do a lot of things for the city already – warrants, etc. Regionalization of systems = one system.
- Consolidation – we do a lot of the cities stuff, you would alleviate a lot of those calls and better serve our community. Would remove delays in dispatching and calls back and forth.
- Looking at all the interfaces between us and the city, we could make it a one stop shop. That could benefit us and the field responders.
- Yes.
- Benefits – to the residents, no call delay – coming into a central point. Same for services that are being dispatched. Lower duplication of resources (dispatched units), less responders responding and being put in harm. Cost savings overall. We can probably cut down on call takers, serving the population in a more efficient way.
- Consolidation yes, EM-wise there is a benefit – we could help each other on EM. Added employees, job security. Regionalization – as a resident and taxpayer I don't see any benefits.

6. What obstacles and challenges to a regionalization or consolidation effort can be expected?

- Human – political, self-interest, geographic self-interest. Getting the taxpayers to understand the benefit of the regionalization.
- Conceptually it will be a much better product when we are done. Gives the team greater career track and opportunities. You can create more opportunity in a larger organization.
- I think its political, cultural – new ways of thinking and achieving an objective – going about the same thing in different ways.
- Parochialism and the unwillingness to give in, to cede control.
- The volume of calls that Allentown gets, because they provide services to paid firefighters and police – it could be bumpy in the beginning. There are also transition concerns there would need to be a good transition plan to avoid problems for both citizens and staff. Based on the call volume, could it lead to a delay in services? Staff leaving, for tenure. Change may scare them a little.
- One of the obstacles to consolidation, it is easy for us but it will be personal for them. They believe that their service is better which is not true. We will be painted as the bad guy forcing the consolidation. They provide services beyond what is required for 9-1-1. I think for regionalization – there would be issues with dispatching for such a large area and population. For an area that big, we would need backup anyway, so why not have the two counties remain as it. County leaders will not want to give up control of 911 service. Four years may not be enough time to build a regional center.
- Field responders will believe that the “local touch” will be lost in a regional center.
- Staffing – the unknown, concern over job loss. How do we handle new people, training, etc.?

- In my position – union questions, staffing questions, seniority questions, how differently does the city dispatch, training issues, scheduling.
- Change - and people have a hard time with change, public perspective, people don't want to see change. Considering that people could lose their jobs is a concern.
- Pushback from the employees, administration, politicals, fear of the unknown, fear of loss of jobs. Change is not always a happy thing.
- Training, time of training, we could absorb them tomorrow. We know the city and have employees that live in the city. Regionalization – very large area, doubled coverage area, learning the area and the increased population. How would you train someone and still have coverage at the current centers.

7. From your perspective, do you believe there are any negative effects that will result in considering any regionalization or consolidation efforts?

- I be naive if I said there wasn't. I'm not clear what that is. From the counties perspective I don't believe that we lose, I think we gain. The department has reached across barriers historically. There will always be a few bumps. Take away personalities I think it's a very positive for the county.
- I don't think there will be negative, but I do think with proper planning we can reduce challenges but not eliminate them.
- My biggest worry would be do the dispatchers know the area, steep learning curve in learning the area.
- I think that until the level of familiarity is there, a delay on services until the learning curve is overcome. Knowledge of the area.
- The city's perspective from responders and the public will believe that they will receive lowered service which will not be true.
- Consolidation – job loss.
- Regionalization – I'm not a fan of regionalization – steep learning curve for geographic knowledge.
- I don't believe that if it's done correctly there would be for consolidation.
- Regionalization – crossing county boundaries, logistics of combining, governance, staffing.
- Consolidation – job loss, depending on which way it goes.
- Tough to foresee any actual negative impacts. We been discussing this for a while.
- Consolidation – no. We dispatch for 220,000 resident – we could absorb them and we work with them (the city). It would be a lot of negatives in training and being able to learn an area double in size. Our union jobs can't just be eliminated. It will be easier to bring one union's contract into another.

8. Does consolidation make sense for your area from a service level, political, technological and financial perspective?

- Service – I absolutely believe it does, we are supporting the other municipalities and do support the city in some areas. My understanding is that we work regionally anyway and even a larger area today.
- Political – I think it does. The county was already working on regionalizing were we could. If egos don't get in the way I don't see much of a political downside. With the mandate from Harrisburg and PEMA's support we can hopefully move forward and get bogged down.
- Technological perspective – yes we've already invested heavily to have regional backup with the city. Having a regional plan with the commitments in place we can spread the unit cost over a larger group. Cost savings increased. We should get a good ROI. There's probably a tipping point as to how many units is the point where you lose when creating a regional system.
- Financial – same as above.
- Service – I think it does, think that the county can operate more effectively than Bethlehem. The city tends to co-mingle their services – their center is doing more than it should be – making their 911 dollar work for more than 911 services
- Political – with the city the leadership at the local level and the state level are open to a consolidated approach. It a fine line between politics and culture. Change is always hard. Culturally it will be different and shock them economically.
- Technological – it makes sense for the county we have technology that's scalable. It makes sense for the city if they have money for capital improvements.
- Financial – I believe there can be cost savings for the county.
- I really don't know without seeing a plan.
- Service level - all calls go to one central location. Knowing that you have specific areas of knowledge. One point entry is a good thing – no transferring. Specialized piece of knowing the area is a good thing for the city but is a concern in consolidation or regionalization. Challenging – what happens to the other staff – (Allentown) radio shop, etc.?
- Political – I not a political "hack" but I think it would be potentially difficult for some of the politicians. I could be good because it sterilize it because it is together.
- Technological perspective – it absolutely makes sense. You provide consistency on approach. You're probably getting better technology as a region as opposed to multiple entities.
- Financial – yes it makes more sense because it's all in one place. Its centralized you can do more with less depending on the staffing - that is always the biggest challenge.
- As you increase the size of your population the amount of switches (and paybacks) grows and the challenge there is the moral.
- Service level – yes. It's a one stop shop for Northampton County. Especially for field responders.
- Political – it makes more sense to keep it not political.

- Technological – yes. Regionalized systems makes sense for automatic backup and overflow.
- Financial – consolidation – we will have to incur costs that the city may not have to. System-wise we will save costs. We can dismantle our backup center.
- Yes.
- Service level – yes – one stop shop, opens up doors to have us all on the same page.
- Political – not a political person.
- Technological – not my purview but it seems to make sense to link everything together.
- Financial perspective – more a director level issue.
- Service level – it absolutely does make sense – there are a lot of transferring of calls. We do a lot of things for the city that causes delays since they have to call us. Being together would make things quicker for the community and field units.
- Technological perspective – yes, absolutely. I don't need to maintain as many trunks. Cutting down on facilities and maintenance costs. We could possibly cut down on number of positions.
- Financial – cost savings through cutting contractual obligations (cutting maintenance), not maintaining as much equipment.
- Service level - yes, from the customer service level will go up if we can provide it from a single point.
- Political level – yes from the perspective of providing a single point of service, providing a better widget, can maintain or improve what is being provided.
- Service level – with the city, it would help further build what the county has already started, they can have a stronger emergency management by combining. 911 center, added employees bringing their knowledge would be beneficial.
- Political perspective – I don't know how much politics would play into it.
- Technological – if we consolidate them I'm sure we would keep what we have. Different systems will need to be upgraded. Our technology is more advanced, it would be a boost for the city residents.
- Financial – is it a wash? That I'm unsure of.

9. What do you see as the goals for any regionalization or consolidation? (reduce costs, improve efficiency, etc.)

- Investment – are we going to be better off in total than we are today – and most importantly is it sustainable? Improve service, take care of the employees and create a sustainable model is absolutely critical.
- Improve costs and efficiency.
- Efficiency, streamline upper management, cost savings, less duplication of service.
- I think that there would have to be a good communication plan and a presence of some sort of transition team in place so that you don't lose good people during the

transition. Staff needs to understand that someone cares in order to keep good employees on the job.

- Ultimately the political goal is financial savings.
- Consistent service across the valley.

10. In your opinion, does your PSAP have the resources available to effectively operate into the future?

- I have to defer to Todd and team. From the limited understating that I have I will say no because the region is growing and we (as government) tend not to invest early but catch up. We don't want to build a Taj Mahal but we don't want to be lacking. I think we are on our way. The area is growing rapidly, are we prepared to deal with that? I think the county, but under the county are 38 communities – they have some level of emergency services my opinion on that level of continuing is that it is eroding. Fund raising is going down and costs are going up. As that erosion continues, services migrate to the county. Volunteers are disappearing – I don't know how that will impact the county – as that goes away my concern is that the county will get tagged with the responsibility. I rather be in front of it and be strategic about it and plan for it.
- In the short run yes – can't see beyond three to 5 years, you constantly have to be planning. We have to constantly evaluate our position. If there is an incentive for us to consolidate, to help improve our infrastructure.
- Yes.
- Yes.
- Yes.
- Yes, I believe we do and if we need more we are able to obtain them.
- Yes. Absolutely. We've been doing things better than any center we've visited.
- Yes.

11. Is the current infrastructure (equipment, technology, connectivity) able to be maintained long term?

- CPE yes. CAD yes. Radio – no. We have no choice but to be off of T-Band by 2020. Will the state pay for a trunked system? Connectivity – we are light years ahead of the others on connectivity. We have a fairly robust fiber network/ring around the county which also reaches out (Service Electric).
- Yes.
- I would say yes. We update and deal with end of life issues before the end of life arrives. I think we're way ahead in technology.

- Yes I believe so.
- Yes.
- I believe so.

12. Does your PSAP have room for expansion and possess the capability of assuming higher call volumes and dispatching services?

- Yes we can expand if we needed to.
- From what I understand yes.
- The total cost of Bethlehem is not all 911 services, we asked them to break that down. The cost in the city are higher due to the city maximizing 911 costs.
- I don't think so- I think they would have to expand.
- Yes. Easily with city we don't even need to change the layout of the room. For regionalization we can expand the center.
- Yes for both.
- Yes.
- Yes absolutely.
- Expansion – we normally staff 10 which leaves 4 extra positions, we will fill them out during incidents (storms, hurricanes, etc.). Consoles could be moved/reconfigured to add more positions. Higher volumes and dispatching – Yes. Average 18-24 active calls at any given point. 150 per hour during hurricane Ivan.
- Yes from what I' was told. The far wall can be removed and expanded. We have 14 positions with only 7 filled currently.

13. Are calls frequently being transferred among or between agencies?

- Yes, on a daily basis.
- Yes.
- Yes.
- Yes.
- Tough for me to say.
- Often with the city, in a 12 hour shift – minimum of 3-5 calls go to the city. Hardly any to Allentown. A couple per day to Lehigh. We get calls to send our resources into the city at least 5 times a day (mostly EMS). Police assist here and there.

14. Would consolidation reduce or eliminate the transfer of 911 calls between agencies and improve response times and lower liability?
- Yes.
  - Yes to all with the city, we would still have to deal with Lehigh County but we do A LOT with the city.
  - Yes.
  - There are plenty things that they call us for, sheriff, magistrates, dui center - those calls would be eliminated if we were together.
  - Transfer of calls would be reduced and reduce times for calls and dispatch.
  - Yes. Just the requests themselves – if they call us we need to find an ambulance for them because they have no second due. They call us for warrants, 20-30 calls a day for warrants. That would be eliminated. Magistrates, coroners, etc.
15. Do multiple agency responses that are coordinated between and among multiple dispatch centers?
- Yes. More with Lehigh County than the city. A lot of mutual aid up a down the river valley. We also deal with Bucks, Monroe and New Jersey. A lot of transfers with Jersey (cell calls). Some response into and from Jersey.
  - Yes.
  - It happens but not frequently.
  - We have had some large incidents, we have a regional comm channel and PA/NJ interop channel that we can use. Our units do response into the city, and back and forth, we do send EMS into the city, and the city EMS will come out of the city but not the fire department. This process creates a delay and it could be eliminated if we were together.
  - Those events do occur.
  - EMS wise, outside of that mostly Lehigh and Northampton county mutual aid for fire calls. But not a lot, we get more calls from Bucks County.
16. Would consolidation improve incident coordination and interoperability?
- It would improve interoperability. Incident coordination would be dependent on the incident coordination and where. Lehigh is learning from us. A lot of incident management happens within the task force and works well.
  - Yes all combined.
  - Yes. More on a regional level (county to county) than with consolidation.
  - Yes.

- To a degree, with two centers (county) you'll still get cross dispatches.
- Probably more on the emergency management side. Sometimes we are left in the dark on what's going on in the city. It would be more fluent if we were all under one umbrella.

17. In considering of a regionalization or consolidation of services, do you have any strong reservations or concerns?

- No, other than the concern of not getting it done in the near future. Don't let it string along.
- No necessarily on consolidating – have to be mindful of political and cultural aspects.
- Same thing regionally. We have light integration now. We share resources. The Lehigh Valley is already moving in that direction from a high level.
- No – the only concern is are the people going to be willing to work together. Are concessions going to be made to effect the efficiency and cost savings?
- It can be worked through. Doesn't mean that there will not be issues. If the public is opposed to the regionalization and then something goes wrong politically it could be an issue. Sometimes you get an upgrade when you do that (consolidation). No strong reservations but you would get resistance from managers and police and fire (they could dig their heels in and create problems). But you could get good people that can expand their abilities.
- Consolidation – my only reservation is having enough time to do it the right way. Holdups would be political, funding, and legal. Regionalization – my strongest reservation is that the valley is too large to have one comm center serve it. I think it would be better to have two centers that can back up each other.
- How will it be run – the cities believe that they will have a say – they won't have a say. It's between the counties, that's what the law says.
- Jobs is the big concern. Training is a concern. How do we get on the same page with SOPs, etc.? How will the field units adapt?
- No, I really don't. We will be moving forward and it makes sense to bring in the city. Concern about logistics for regionalization.
- Just the job security, and how things will fall after the fact. How will things work after combining, will we need to reapply, will supervisors still be supervisors?
- No reservations. Concerns – personnel. We don't want to consolidate and lose individuals that are experienced. Performance moral could be impacted.
- As a taxpayer, I believe regionalization – it can be done, but the training aspect and governance there are many issues. I think we can do consolidation easily. Regionalization – our job security, questions about knowledge of area. What happens to my health care and my pension? Consolidation is exciting, regionalization is scary to talk about as an employee and resident. Where would a building be built, we have the space here, but what about a snow storm, travel from around the larger area would

be an issue. Consolidation we would only be adding one department and we already do a lot of work for them. But if you bring in such a large area and all the field departments it would be much harder. Lehigh county same thing with Allentown.

18. What in your opinion are the most important considerations that need to be made when considering either regionalization or consolidation?

- Cost savings, level of service – are we able to meet or exceed the needs of the citizens. Can we find a way to meet that needs of the city?
- Being able to offer the same or higher level of service to the public.
- To make sure that we are responsible stewards of tax dollars.
- It makes sense due to technological improvements to centralize operations regionally.
- It worries me that the systems are up to date and the dispatchers are trained and know the area.
- I think ultimately the impact on the taxpayers, and union consolidations. How do you fold all of that together? Who do they report to, who's in charge, how do you handle the financials. Reporting structure and decision authority would have to be carefully considered.
- The biggest consideration is consolidating without a lapse of service. Seamless transition. Employee sensitivity. Making sure that who is the one being consolidated.
- It doesn't affect us that much – it really effects the city. How will they deal with the changes? How will the public learn/know who to call since they currently call 911 and would have to call a different number?
- Regionalization – ensuring that everyone gets a say and the level of service stays the same.
- Wilson/Kramer – is good for either emergency management or 911 but not both. Will work well for EM, and is still in consideration for a regional EM center.
- With regionalization – personnel and dispatcher assets – you need to take into account how you would meld them in, unions, benefits, etc. How will the governance work? I think the counties will be the management per the state law.
- Maintaining the level of customer service currently being provided.
- Maintaining the level of service to the public. Staffing and happy employees – and that comes full circle back to the service provided to the residents.
- I think the most important thing is level of service to the community and maintaining the high level of service that is currently provided.
- Something that is well thought out. I think were on the right path with equipment sharing. The steps taken need to be carefully taken. We don't want to go back and change something that has already been done. Making sure nothing is forgotten.
- Cost is an issue, operating cost will go up. If its' cost effective anything can pass, but who will oversee the whole operations. I want to see the most qualified person in

charge. Hierarchy. How they go about training personnel? Training, Hierarchy, Costs.

19. Other than call taking and dispatching, what other services do your telecommunicators provide?
  - Warrants, public works, coroner, all of the county human resources, dui centers, we do non-emergency calls for the entire county. A lot of state agency interfaces – a lot of it is notification (DEP, etc). we integrate 911 and EM well and do a lot of situational awareness and notifications. PIERS. We do all of the local EM notification for the entire county. We do more resource management than the cities understand. A lot of referrals to local and county agencies. We keep a listing of dog licenses.
20. If consolidation occurs, do you think that one of existing PSAP can fill the facility needs or is construction required?
  - I think if we had to absorb it tomorrow we could I think we could absorb all four tomorrow. Down the road we would have to do some expansion.
  - I don't know the answer to that question.
  - I don't think we could.
21. Is there government land available if a new facility is necessary?
  - Yes – either the current footprint or looking at other locations. Room where we are now or in other places we own around the county.
  - I don't know off top of my head. I think we could expand our 911 center. 250 acres at grace hill complex. Expanding the current building is possible.
  - We have acres and acres of land.
  - We are for consolidation. For regionalization we are with construction.
  - Yes, here.
22. Does your PSAP take non-emergency seven-digit calls for other agencies? Are there services offered for other governmental operations and not-for-profit agencies?

- Yes the entire county any municipality that we serve we take non-emergency calls.
- Non-profit – CART, RACES, Blockwatch, school districts – we do a lot of notifications for schools – lockdowns, secondary notifications, school district and college police departments.
- SPCA, CART, Blockwatch, county government services, police departments’ after-hours admin phones. Animal shelter has the county’s number on their voice system.
- Crisis, DUI centers, magistrates.
- After hours children and Youth, probations, sheriff’s deputy, etc. We also do a lot during the day for the city with warrants, animal control, coroner. SPCA, CART through RSAN.
- Yes. Local police departments forward their phones at night (administrative lines).
- We do take calls for Bethlehem after hours, magistrate, juvenile probation, adult probation.
- Municipalities after hours – road crews, pennDOT, utilities, traffic lights. Probably 40-50% of our work is calling other agencies. We also call out Easton fire department for more staff if needed (call at home) for a large incident. Same for Easton police department.
- Block watch for Easton City – seven digit number. Some of the other larger population areas have the same thing.

23. If a consolidation occurs, how do you foresee governance and funding of the consolidated PSAP operating?

- I would assume like a regional police model – each entity having member on a board – we are happy to take it on if they would like. I assume that they would want to have an advisory board or an operational board.
- Governance – I think it will fall back to the county at the end of the day – the county has a history of managing all of the other municipalities. It will be more of a learning curve for the city in letting go of 911.
- Regionalization – not sure I don’t have an answer right now – depends on how the state will provide guidance and funding
- I would hope that the city would come up with a financial structure that would be fair to everyone. Whatever the city puts in today now, they should continue to contribute.
- Consolidation – governance and funding through the counties - same with regionalization.

24. What impact do you believe a consolidation/regionalization will have on the services provided to the citizens?

- The goal would be to enhance the serviceability. However that is defined. We would want to look at hard metrics on how we are measuring success.
- I hope there is no negative impact we have to maintain services or enhance them.
- I hope it would be more efficient.
- On the front end increased hold times potentially and increased call times until dispatchers become familiar with the area, or until you train new people. Turnover, frustrated callers dealing with dispatchers that don't have the local knowledge. Dissatisfaction on the part of employees in working in a new model. On the positive end technology will be enhanced and that could help with the learning curve on employees coming over. Good call flow could enhance the service to the employees instead of cherry picking calls (that Allentown does). Being able to provide that information to the public that the metrics are tracked and the data shows improvement would be a positive.
- Consolidation – improvement of services (equal or better) speed of answering calls will be quicker. Less busied out calls for 911 service. We can queue the calls, we do ACD, not sure if the others do. I believe it will be a change perceived by the city they may have to wait their turn to get what they need. Without knowing their operation it may be equal or better. Having the volume of personnel it will be a huge asset. We are serving a larger population. We staff to possible levels not to actuals, while the city probably staffs to actuals due to financial restraints. I think the fire department dispatching level will go up. We do city of Easton, so we already do a city/career department. I believe there will be a longer training period for dispatchers. Right now probation is a year – it will have to possibly expand with a larger learning area to have. You could go to divided call taker /dispatcher scenario.
- Less call transfers, less delays, enhanced response times.
- A positive impact. Some concerns about knowledge of the areas, but it can be overcome through training and with tools.
- I think it will improve the services I think it will make response times better. At first it will be change that people will need to get used to. I think in the end its going to be better.
- Same as above, a positive.
- Consolidation – hopefully the services will improve. 911-wise will give us more staffing but I don't see any other benefit. Regionalization – I don't see any benefit. What about cost? I don't see much good.

25. Have you considered how your organization would provide services and responsibilities currently managed by your 9-1-1 Center that may not be provided in a consolidated or regional environment?

- That's the crux of the discussions with the city. Can we do that better - they are leveraging their 911 money for some other duties not necessarily 911.
- No.
- We would take that service and determine if it is related to public safety communications and makes sense to have at the comm center. We could do cameras, we choose not to. Labor issues, stress related issues (reasons why we didn't). We are not under the umbrella of law enforcement while the cities are. That is an issue, there could be legalities involved. Cameras how they are using them is law enforcement. Our system is capable of doing it and we could. We made sure that our phone system is compatible. We are looking at regionalizing CAD. We use a form of regionalization in RSAN since it doesn't reside here. We put in pathways for regionalization and information sharing through the task force. We always look for ways to regionalize if possible.
- Absolutely – an issue of training, we'll have learn what they do and they'll have to learn to do what we do.
- I think one example is the cameras, I think it's something that is important to the safety of the citizens and I think we can handle it with bringing more staff on board. We can learn to do any services that we may not provide now.
- I don't think that there is a lot that they handle that we don't handle already. The cameras, I don't see that as being an issue. We have the technology, we just need to make sure that we have the staffing. We also have ongoing training so that would just be a part of the ongoing training.
- Cameras – is a level of service that needs to be maintained. What is the expectation from the constituency for monitoring that service and how many people would we need to dedicate to that service? What are the legalities involved with the cameras?
- I don't think there would be a change – they would still get professional services. I'm not administration but I believe some of these calls should go directly to public works etc, but I think we could do whatever they need – they will need to change their radios, but we will offer the same professional level of services.

26. Any other comments?

- I think we covered most of them. From the counties perspective we approached it from a regional perspective.
- No. I'll be interested to see what comes of the study.

- I think we've covered it. Structure will be the hardest part. How do you find something that works?
- My only final comment is that I am all for consolidation, Im not sure if we have the time to do it properly. We have less to lose, the city will be apprehensive. It should be a hybrid approach. We should be developing a regional system at the same time with CPE, CAD, Logging. With the counties backing each other up. With over a long term (ten Years or so) sharing of personnel, Q/A, training person, etc. a true regional center will take a lot more time, not going to do it in 3 and ½ years. If you choose to do it all at one time you will be biting off a big political nightmare dealing with the counties, cities, municipalities, etc.
- Perhaps down the road the counties could consolidate or keep separate but like facilities. The counties want to keep a say in what they are doing. Administrations could change.
- The city can't initiate an EAS message but we can – they don't have SEVAN access.
- Main concern is job security, training and maintaining the level of service.
- No.
- I don't think so. I really think (consolidation) it will better the community – I think that's the priority.
- Nothing we haven't touched on.
- I think I've covered everything. Consolidation with regionalization of services I'm for. It only makes sense – it can happen cost efficiently and be run efficiently. I wish all four could be left alone. Regionalization will have too many issues.

# **Lehigh Valley 9-1-1 Analysis & Strategic Plan**

## **Appendix B**

### **Best Practices for Change Mangement for Personnel**

Instinctively, we as human beings are not programmed to handle change. Research suggests that with any change and organization should plan for a minimum of six (6) months for the staff to accept a change.

Anytime a change occurs, anxiety among staff increases, productivity may be affected as well as the likelihood of errors and or omissions. How do we avoid such pitfalls? The answer is simple, through ongoing training initiatives, quality assurance reviews, constant internal communications and a focus on providing a quality work environment.

### Internal Communications.

We pride ourselves on being “communications professionals” while this is expected for a 9-1-1 telecommunicators it is sadly not the case with many organizations in any business that is dependent on a staff of employees to perform a job function. Through job descriptions and policies and procedures it is expected that an employee will know how to perform a job function. This is not enough.

As we look at the basic human needs each of us possess, it is a known fact through the study of evolution, psychology and sociology that individuals need to feel as though they are a part of something. All human beings are a part of something and become advocates for the things that make them most comfortable, a few examples being affiliations with religion, sports, clubs, political parties, sororities, fraternities, charities and associations. In order to feel a part of something unique an individual must be accepted.

In the PSAP environment, there are many opportunities to be advocates for our community as a whole. To simply feel a part of the organization one must be acknowledged, one must be praised and one must be provided with an environment that is consistent with their own individual needs and interests.

By suggesting that the previous reference to psychology is significant in our environment creates an opportunity to illustrate a significant issue, perception. If you were to ask an individual what the first thing that comes to mind is when he thinks of the word psychology, we would hear a majority of unique references such as: medications, depression, anxiety, mental health, 302 commitments, crime, drugs, etc. If one was to simply place the word “positive” in front of the word, it changes the perception. What is positive psychology in the workplace? Let’s allow the leadership and employees of the organization to define it, our human capital.

Positive psychology in the workplace often includes praise and acknowledgement for a job well done. Within our society, we have been conditioned to focus on the negative, simply re-focusing

our efforts on the positives creates a brand new approach and overall a new environment. Open communication with the staff is imperative in creating a culture change.

A simple “thank you” is one of the best ways to provide a staff with encouragement by recognizing them for the work that they do.

MCM Recommends the following tasks to create more synergy among management and the PSAP staff

- At the start of any meeting, begin by going around the room and asking each employee to: “Tell me something good”. Begin on time and end on time.
- Send feedback to employees each time they do something good, carbon copy all the leadership within the organization, and encourage others to follow up with them individually.
- Instill a new mission within the leadership to lead and inspire, which should be the primary focus of any leader. In fact, think of all of those that you would consider a quality leader. It is likely that they are leaders by your view because they have lead and inspired. Indications within the satisfaction survey indicate that the leadership may not have lead and inspired to the level that they are capable.
- Provide the employees with the opportunities to be successful. Do they need more training?
- Hold the managers accountable first, then the subordinates. After all, if an employee fails, so has the supervisor. A supervisor should be accountable for the success of their subordinates.
- Send frequent e-mail messages to all members of the staff suggesting monthly reports of call volumes, compare to previous years and months and conclude each message with a positive commend such as: Thank you for you continued efforts and constant contributions to each and every resident of our community.
- Hold impromptu meetings with employees. If the PSAP is experiencing a slow call volume, invite an employee to meet individually with a supervisor. Ask them open questions such as: What do you believe we do well as an organization? What do you believe we can do better? How can I make this a better place to work? Then, allow your actions to speak louder than words.

While many of the recommendations may seem simplistic they are legitimate. Globoforce, a company that continues to capitalize and grow by deploying numerous initiatives that “make work human” and by celebrating the positive moments of every employee encounter, has got it right. Boasting success by partnering with some of the biggest, best and most influential organizations in the world suggests their business works. So why not unlock each and every employee’s potential. If they win, we all win.

### Turnover

Turnover within a PSAP environment has many implications. With the increase in demand for employees within the Commonwealth of Pennsylvania to pursue new opportunities in a growing job market we’ve witnessed many separations due to the demand within the market. Often times, an employee will leave for more money to which MCM attributes the most cause for telecommunicator turnover.

Research suggests that the number one reason employees leave an organization is due to the lack of a quality working relationship with their supervisors.

Another reason is the fact that change often has a negative impact on employees if not managed properly.

With the impending changes that this project has focused on, MCM anticipates there will be an increase in turnover. With this projection stated, MCM recommends that each PSAP should diligently manage their staffing to assure the minimum staffing levels are maintained at all times with no exceptions.

Above all, the best way to avoid turnover is to focus on retention.

### Recruiting and Retention

**Planning for turnover makes sense** - Some centers are very stable. For those that are not, monitoring the retention rate over time makes sense. An adjustment for predictable turnover, based on historical data that has been used to establish an average turnover rate, should be part of an estimate of the number of employees needed for adequate staffing. Centers that experience predictable turnover every year need to take a proactive approach, assuring that applicants and new recruits are in the pipeline, rather than waiting for resignations before initiating the lengthy process of finding and preparing replacements.

Some managers in large centers “over-hire” to accommodate routine turnover and/or unexpected employee absence due to disability, maternity leave, etc. Centers that “over-hired” were twice as

likely to report they were able to “comfortably handle the workload.” The term “over-hire” is actually part of the problem. It is not “over hiring” so much as it is hiring proactively.

**Make recruiting a priority** - Initiate a recruiting drive focused on filling all authorized positions. It is a big deal so make it a big deal. Get employees involved, work with the city or county human resources office and make sure they take your request seriously. Educate them (in their language) and enlist their support. They can't help you if they don't know why they should, and they won't give you more resources just because you ask for them.

**Staff to authorized levels** - Staffing to authorized levels is the best thing a manager can do to improve retention rates. Being fully staffed and having all authorized positions filled is the most effective strategy you can use to increase your retention rate. Centers that are not fully staffed have more difficulty keeping employees and use more overtime to fill the gaps in the schedule; productivity goes down as new employees are being prepared to fill the vacant positions, and the quality of service is compromised. The best strategy for positive media coverage is to provide high quality service. Every authorized position should be filled as quickly as possible.

**Keep the center fully staffed** - The safety of the human capital in the field and the well-being of citizens depend on your ability to assure adequate staffing levels and keep all authorized positions filled. Positions that go unfilled for a period of time are viewed as expendable, especially when budgets are tight (“If you aren't staffing to authorized levels, then you obviously don't really need that many staff”). Even if the currently authorized full-time employees do not meet your needs, hire to authorized levels before asking for additional staffing. Build a case for appropriate staffing levels using detailed estimates and center performance on quality indicators.

**Hire so employees can comfortably handle the work load** - Staffing that doesn't include room for a sudden influx of calls leaves the center vulnerable. Build a case to hire proactively so the communications center isn't always playing “catch up.”

**Keep the staff you have** - Use effective management practices to provide direction and support for employees. If salaries are not competitive, or not aligned with other public safety human capital, do something about it. Collect relevant data and use solid evidence to prepare your request. Don't give up if decision-makers don't give you what you request the first time you ask.

**Hire to accommodate predictable turnover** - Do a historical study of the turnover and retention rates in your center. Include turnover as a factor when determining hiring needs and build a case for hiring to accommodate predictable separations.

**Consistently staff necessary positions** - Assure that all necessary positions are staffed. Don't put the PSAP or agencies served in a situation that makes them legally vulnerable or undermines public

confidence in the services provided. Consistently and adequately staffing necessary positions sends a powerful message to employees, field human capital and client agencies about the importance of the work and dedication to providing high quality services to the community.

| <b>Effective Practices: Keeping the Center Fully Staffed</b>   |   |

|  | <p>Employees who gave high performance ratings to their center's ability to consistently staff necessary positions were more satisfied and were from centers with higher retention rates.</p>   |

*APCO Project Retains, Staffing and Retention in Public Safety Communications Centers, Table 3: 2005*

## Working Conditions

A clear focus must be maintained to promote a respectful workplace free of hostility and discrimination. A constant analysis must provide a work environment where the distribution of work is fair. Tasks must be manageable with constant effort to reduce the stress levels within the PSAP. In addition, co-workers must strive to maintain a positive approach to their work while maintaining a positive relationship with their peers.

**Build a sense of community** - Promoting a positive culture and work environment for those that are expected to work long hours in a small workspace is expected in our society. As stated previously, everyone wants to be a part of something. 9-1-1 telecommunicators are professional and advocates for their entire community. In order to thrive, telecommunicators must feel they are not only an important part of the extended community but also the community contained within the environment they work.

## Quality Assurance

The role of a telecommunicator continues to grow every year. Telecommunicators are challenged daily by the type and nature of the calls they receive and process. The many factors that prompt change within the environment they work are related to technology by both the telecommunicator and the communities we serve. As an example, the use of wireless devices had prompted an increase in many call volumes. Next Generation 9-1-1 (NG911) has taken root and created even newer challenges.

Quality Assurance (QA) provides an opportunity to ensure for a high standard of performance and serves as a means to evaluate the high level of performance needed to protect and serve our communities. Arguably, a consistent program will assure call taking and radio dispatch actions are delivered at the highest possible standard.

APCO has released the APCO/NENA ANS 1.107.1.2015 Standard for the Establishment of a Quality Assurance and Quality Improvement Program for Public Safety Answering Points. The standard was written by the NENA Development Standards Committee Quality Assurance Workgroup with the Assistance of the APCO Communications Center Standards Committee on July 14, 2014 with a final approval and release on April 2, 2015. This standard contains invaluable information for establishing and administering a QA Program. It is highly recommended that all PSAP's utilize this information to enhance their existing QA programs.

## Ongoing training

**Expect and support continuous learning for all employees.** - In addition to the local basic training classes specifically related to the job, develop ongoing training opportunities. Develop a learning approach for formal training and adapting it by inviting the agencies you serve to provide guest presentations for your PSAP's telecommunicator staff.

Research tells us that one of the characteristics of a "good boss" is one who pays attention to the fit between an employee's skills and personal interests and the job, and who encourages employee growth and career development. Effective managers embrace the fact that if their employees win they win.

**Remember that learning is not just about classes and schools** - Participation in local and regional training opportunities and active involvement in a professional organization is an excellent way to upgrade your own skills and find out about other centers while making a contribution to the field. This provides opportunities to talk with other managers to learn how they handle some of the routine tasks of training, mentoring and monitoring the progress of new recruits. You might be surprised at some of the unique solutions and approaches that are used elsewhere.

## Report Description

**Report Definition:** Provides the total number of calls processed each hour (00-01 through 23-24) for the specified date range and filter criteria. The peak hour of the reporting period is also presented in the Summary Information section.

This report displays the call count, percentage of total, and average per hour. The data element (item being counted) is calls. Users select the row detail or member for the call count report. Typically they may count calls for agents, consoles, trunks, and so on. The users may also choose to include up to two grouping levels. So, for example, the report could count calls received by Agents, grouped by Site and Class of Service (COS).

### Note:

A grey-colored figure on the report indicates a partial count was reported for the time period (hour, day, week, and so on). *Examples: The total count was for only half the hour rather than the entire hour. The average per year was extrapolated from ¼ year's data rather than from a full year's data.*

### Report Notes:

## Glossary of Terms

| Field  | Description   |
|--|---|
| <b>Report Heading Information (no field title)</b> | The information that applies to the entire report.  |
| <b>For (row detail)</b>                            | <p>The lowest level (row detail) of the report. This is the focus or lowest granularity on the report. For example, if reporting on the calls processed for each speed dial, each speed dial button would be shown on a row in the detail section of the report.</p> <p>When defining the contents of the report on Aurora's Report Criteria page, it is the last group selected. (It can also be the only group selected.)</p> |
| <b>Creation Date</b>                               | Date and time the report was produced.  |

## Report Description Glossary of Terms

| Field   | Description   |
|---|---|
| <b>Grouping</b>   | <p>Selected hierarchical level and classifications of the requested data (for example, Level 1: Site; Members: Agent Group).</p> <p>Level 1 is the top level of grouping on the report. Level 2 is the mid-level group, and Members is the bottom or row level. The bottom level defines the lowest level of information on the report.</p> |
| <b>Date Range</b>   | Specified beginning and ending dates and times for the requested data.  |
| <b>Filter Criteria</b>                                    | Selected criteria that determine what data is included or excluded from the report.   |
| <b>Summary Information</b>                                | The report data summarized by the highest grouping level (first selected group). Lower grouping levels and detail information are not shown in the summary section.   |
| <b>Highest grouping level (no field titles on report)</b> | Top level group (column heading) and its members (line items) to which the displayed data applies, for example, "Sites" (column heading) and "ABC Call Center" (line item).   |
| <b>All</b>  | Grand total or summarization of the three types of information represented in the reporting period (Peak Hour, Total Call Count, and Average Call Count per Hour).  |
| <b>Peak Hour</b>  | The hour of the day when the largest count (greatest activity) occurred.  |
| <b>Peak Hour Count</b>                                    | Total quantity for the hour where the greatest activity took place for the line item. When the reporting period includes more than one hour of data, the individual hours are added together and the highest total is displayed here. That is, all Hour 00-01s are added together, all Hour 01-02s are added together, and so forth.        |
| <b>Total Count</b>  | Total quantity for the line item.   |
| <b>% Total</b>  | <p>Percent of the total count for the line item.</p> <p><i>(Total Count of Line Item ÷ Total Calls) x 100 = Percentage of Total Calls</i></p>   |

Filter Criteria:

## Report Description Glossary of Terms

| Field  | Description   |
|--|---|
| <b>Groups (no field title on the report)</b> | <p>Group names or classifications and the members included within the groups. Members not included in the selected groups are merged in the "Other" groups so that the total call volume includes all calls except those removed by filtering.</p> <p>So, for example, if an Agent group was created that did not include all possible agents, some calls would potentially not be included within the Agent group. These calls would then be assigned to the Other group (all agents that were not included in the Agent group) so that the report totals reflected on the report would represent the total calls received for the date range and filter criteria applied.</p> <p>Events that do not contain a target member will be displayed in a row labeled "None" when the lowest level of items is included. However, if the report does not include the lowest tier of the group, the events with missing members will be shown in the group called "Other."</p> <p>If the Event contains a grouping/row member, but the member was not included in a tier when the group was created, the event will be counted and displayed in the "Other" row and, if the report has additional groups, it will be included in the Other group.</p> <p><i>To reduce the number of events in the Other row, Cassidian Communications recommends that all members be assigned to one of the grouping elements included in the grouping tier.</i></p> <p>An example of "None" can be best seen by using a Call Count report where the lowest grouping level = Speed Dial buttons. The calls that were not transferred will be shown in the "None" row, since no speed dial was used (for the transfer).</p> <p><i>To reduce the number of events categorized as None, Cassidian Communications recommends that you include a filter to exclude these items when requesting the report.</i></p> |

# Call Count by Hour

## Report Description Glossary of Terms

| Field                                    | Description   |
|--|---|
| <b>00-01, 01-02, 02-03, and so forth</b> | Column heading for each hour under which the number of occurrences, total call count, percentage of the line item's total count for the reporting period, and average calls per hour for the line item are presented.   |
| <b>Total</b>                             | Column heading for the total quantity, percentage, and average for the line item.   |
| <b>Occurrences</b>                       | Displays the number of times the designated hour occurred during the specified date range and time of the report. If the requested time range includes a partial hour, the number of occurrences for that hour will be displayed to the nearest tenth. For example, if the date and time range of the report is from December 3, 8:00 a.m. to December 4, 8:15 a.m., the number of occurrences for hour number 08-09 (8:00 a.m.) will be 1.3. |
| <b>Call Count</b>                        | Total call count for the designated hour. If the specified date range spans more than a day, some or all the hours could have more than one hour's data in the field. In that case, the displayed data will be the total of the covered hours. For example, if the date range includes the first hour (hour 00-01) of December 3 and the first hour of December 4, the Hour 00-01 column will contain the sum of both hours of data.          |
| <b>% of Total</b>                        | Percent of the total of the line item.<br><br><i><math>(Total\ Count\ for\ the\ Hour^* \div Total\ Count\ for\ Line\ Item) \times 100 = Percentage\ of\ Total</math></i><br><br><i>* (or hours, for example, the reporting period covers two days)</i>  |

# Call Count by Hour

Filter Criteria:

## Report Description Glossary of Terms

| Field             | Description   |
|-------------------|---|
| <b>Avg / Hour</b> | <p>Sum total of the hour for the line item divided by the number of hours (occurrences) reported in the column. If the specified date range spans more than a day, some or all the hours could have more than one hour's data in the field. In that case, the displayed data will be the average of the covered hours. For example, if the date range includes the first hour of December 3 and the first hour of December 4, the Hour 00-01 column will contain the average of both hours of data.</p> <p>Aurora will automatically extrapolate for values when the selected time period does not match the time increments included in the report. For example, if the selected time period starts in the middle of the hour (6:30), the call count for that hour (06-07) will reflect only a half an hour's data. Aurora will then extrapolate the ½ hour's count to a total hour by dividing the total count by ½ hour rather than by 1 hour. The resultant Avg / Hour will then be a bigger number than the total. For example, if calls were processed by your site for only ½ an hour and the total call count for the hour was 25, Aurora would divide 25 by ½. The average per hour for that hour would then be 50.</p> <p>This field will be color-coded when extrapolated due to partial data. Aurora does not adjust or extrapolate in cases where data does not exist, such as a case when the call-taking application was not in service.</p> <p><i>Total Count for the Specified Hour ÷ Number of Hours = Average Count for the Hour</i></p> |

## Report Description Glossary of Terms

| Field        | Description   |
|--------------|---|
| <b>Total</b> | <p>For each grouping level, the total hourly call count, the percentage of the total processed calls for the reporting period, and the average number of calls processed per member within the groups and sub-groups. They are color-coded for readability.</p> <p>Note that the Avg / Group statistic factors in the number of occurrences [<math>Call\ Count \div (Number\ of\ Groups \times Number\ of\ Occurrences)</math>]. It also includes all of the groups and sub-groups above it (if any). For example, if there are three grouping levels consisting of 2 Sites (top level), 4 Agents per site, and 3 Consoles per agent, the average per group for the Site grouping (grand total) would be the total calls processed divided by 24 (the total number of group members listed on the report <math>[2 \times 4 \times 3]</math>) times the number of occurrences. It would not be the total calls processed divided by 2 (2 sites) times the number of occurrences.</p> |

## CALLS FOR SERVICE

The Communications Center is responsible for providing services for the Allentown Police Department, Emergency Medical Services (EMS), Fire Department, Allentown Parking Authority, and Animal Control. This responsibility includes answering and dispatching calls for service for these City agencies.

The following table indicates calls dispatched\*

|                   |                |
|-------------------|----------------|
| POLICE            | 119,647        |
| EMS               | 15,542         |
| FIRE              | 12,036         |
| ANIMAL CONTROL    | 706            |
| PARKING AUTHORITY | 6,789          |
| PUBLIC WORKS      | 1,960          |
| <b>TOTAL</b>      | <b>156,680</b> |

\*Dispatched calls are the number of incidents assigned an agency complaint number through the Computer Aided Dispatch system. This does not reflect the total number of calls received into the Communications Center. The actual number of calls into the Communications Center in 2015 was XXXXX.

**Total Calls Dispatched vs Total Calls Taken**

### Report Description

**Report Definition:** Provides the total number of calls processed each month for the specified date range and filter criteria. The peak month of the year is also presented in the Summary Information section.

This report displays the call count, percentage of total, and average by month. The data element (item being counted) is calls. Users select the row detail or member for the call count report. Typically they may count calls for agents, consoles, trunks, and so on. The users may also choose to include up to two grouping levels. So, for example, the report could count calls received by Agents, grouped by Site and Class of Service (COS).

**Note:**

A grey-colored figure on the report indicates a partial count was reported for the time period (hour, day, week, and so on). *Examples: The total count was for only half the hour rather than the entire hour. The average per year was extrapolated from ¼ year's data rather than from a full year's data.*

### Report Notes:

### Glossary of Terms

| Field  | Description   |
|--|---|
| <b>Report Heading Information (no field title)</b> | The information that applies to the entire report.  |
| <b>For (row detail)</b>                            | <p>The lowest level (row detail) of the report. This is the focus or lowest granularity on the report. For example, if reporting on the calls processed for each speed dial, each speed dial button would be shown on a row in the detail section of the report.</p> <p>When defining the contents of the report on Aurora's Report Criteria page, it is the last group selected. (It can also be the only group selected.)</p> |
| <b>Creation Date</b>                               | Date and time the report was produced.  |

Filter Criteria: Call Classifications.Call Category = Non-Emergency

### Report Description

#### Glossary of Terms

| Field   | Description   |
|---|---|
| <b>Grouping</b>   | <p>Selected hierarchical level and classifications of the requested data (for example, Level 1: Site; Members: Agent Group).</p> <p>Level 1 is the top level of grouping on the report. Level 2 is the mid-level group, and Members is the bottom or row level. The bottom level defines the lowest level of information on the report.</p> |
| <b>Date Range</b>   | Specified beginning and ending dates and times for the requested data.  |
| <b>Filter Criteria</b>                                    | Selected criteria that determine what data is included or excluded from the report.   |
| <b>Summary Information</b>                                | The report data summarized by the highest grouping level (first selected group). Lower grouping levels and detail information are not shown in the summary section.   |
| <b>Highest grouping level (no field titles on report)</b> | Top level group (column heading) and its members (line items) to which the displayed data applies, for example, "Sites" (column heading) and "ABC Call Center" (line item).   |
| <b>All</b>  | Grand total or summarization of the three types of information represented in the reporting period (Peak Month, Total Call Count, and Average Call Count per Month).  |
| <b>Peak Month</b>   | The month when the largest count (greatest activity) occurred.  |
| <b>Peak Month Count</b>                                   | Total quantity for the month where the greatest activity took place for the line item. When the reporting period includes more than one year of data, the individual months are added together and the highest total is displayed here. That is, all Januarys are added together, all Februarys are added together, and so forth.           |
| <b>Total Count</b>  | Total quantity for the line item.   |
| <b>% Total</b>  | <p>Percent of the total count for the line item.</p> <p><i>(Total Count of Line Item ÷ Total Calls) x 100 = Percentage of Total Calls</i></p>   |

### Report Description

#### Glossary of Terms

| Field  | Description   |
|--|---|
| <b>Groups (no field title on the report)</b> | <p>Group names or classifications and the members included within the groups. Members not included in the selected groups are merged in the "Other" groups so that the total call volume includes all calls except those removed by filtering.</p> <p>So, for example, if an Agent group was created that did not include all possible agents, some calls would potentially not be included within the Agent group. These calls would then be assigned to the Other group (all agents that were not included in the Agent group) so that the report totals reflected on the report would represent the total calls received for the date range and filter criteria applied.</p> <p>Events that do not contain a target member will be displayed in a row labeled "None" when the lowest level of items is included. However, if the report does not include the lowest tier of the group, the events with missing members will be shown in the group called "Other."</p> <p>If the Event contains a grouping/row member, but the member was not included in a tier when the group was created, the event will be counted and displayed in the "Other" row and, if the report has additional groups, it will be included in the Other group.</p> <p><i>To reduce the number of events in the Other row, Cassidian Communications recommends that all members be assigned to one of the grouping elements included in the grouping tier.</i></p> <p>An example of "None" can be best seen by using a Call Count report where the lowest grouping level = Speed Dial buttons. The calls that were not transferred will be shown in the "None" row, since no speed dial was used (for the transfer).</p> <p><i>To reduce the number of events categorized as None, Cassidian Communications recommends that you include a filter to exclude these items when requesting the report.</i></p> |

### Report Description

#### Glossary of Terms

| Field                              | Description   |
|------------------------------------|---|
| <b>Jan, Feb, Mar, and so forth</b> | Column heading for each month under which the total number of occurrences, total call count, percentage of the total count for the reporting period, and average calls per month for the line item are presented.   |
| <b>Total</b>                       | Column heading for the total quantity, percentage, and average for the line item.   |
| <b>Occurrences</b>                 | Displays the number of times the designated month occurred during the specified date range of the report. If the requested date range includes a partial month, the number of occurrences for that month will be displayed to the nearest tenth. For example, if the date range of the report is January 1, 2008 to January 12, 2009, the number of occurrences for January will be 1.4 (.4 for the 12 days in January 2009). |
| <b>Call Count</b>                  | Total call count for the designated month. If the specified date range spans more than a year, some or all the months could have more than one month's data in the field. In that case, the displayed data will be the total of the covered months. For example, if the date range includes January of 2007 and January of 2008, the Jan column will contain the sum of both months of data.                                  |
| <b>% of Total</b>                  | Percent of the total of the line item.<br><br><i><math>(Total\ Count\ for\ the\ Month^* \div Total\ Count\ for\ Line\ Item) \times 100 = Percentage\ of\ Total</math></i><br><br><i>* (or months, for example, the reporting period covers two Januaries)</i>   |

### Report Description

#### Glossary of Terms

| Field       | Description   |
|-------------|---|
| Avg / Month | <p>Sum total of the month for the line item divided by the number of months reported in the column. If the specified date range spans more than a year, some or all the months could have more than one month's data in the field. In that case, the displayed data will be the average of the covered months. For example, if the date range includes January 2007 and January 2008, the January column will contain the average for both months of data.</p> <p>Aurora will automatically extrapolate for values when the selected date range does not match the time increments included in the report. For example, if the selected date range starts in the middle of the month, the call count for that month will reflect only a half a month's data. Aurora will then extrapolate the ½ month's count to a total month by dividing the total count by ½ month rather than 1 month. The resultant Avg / Month will be a bigger number than the total. For example, if calls were processed by your site for only ½ a month and the total count for the month was 250, Aurora would divide 250 by ½. The average per month for that month would then be 500.</p> <p>This field will be color-coded when extrapolated due to partial data. Aurora does not adjust or extrapolate in cases where data does not exist, such as a case when the call taking application is not in service.</p> <p><i>Total Count for the Specified Month ÷ Number of Months = Average Count for the Month</i></p> |

Filter Criteria: Call Classifications.Call Category = Non-Emergency

### Report Description

#### Glossary of Terms

| Field        | Description  |
|--------------|--|
| <b>Total</b> | <p>For each grouping level, the total monthly call count, the percentage of the total processed calls for the reporting period, and the average number of calls processed per member within the groups and sub-groups. They are color-coded for readability.</p> <p>Note that the Avg / Group statistic factors in the number of occurrences [<math>Call\ Count \div (Number\ of\ Groups \times Number\ of\ Occurrences)</math>]. It also includes all of the groups and sub-groups above it (if any). For example, if there are three grouping levels consisting of 2 Sites (top level), 4 Agents per site, and 3 Consoles per agent, the average per group for the Site grouping (grand total) would be the total calls processed divided by 24 (the total number of group members listed on the report <math>[2 \times 4 \times 3]</math>) times the number of occurrences. It would not be the total calls processed divided by 2 (2 sites) times the number of occurrences.</p> |

☐ YES☐ NO**SUMMARY:**

The Department of Emergency Services requests authorization to ENTER INTO AN AGREEMENT WITH THE CITY OF PITTSBURGH TO MERGER THE CITY OF PITTSBURGH'S 9-1-1 CENTER WITH ALLEGHENY COUNTY'S 9-1-1 CENTER.

**EXPLANATION:**

The Department of Emergency Services is requesting authorization to enter into an agreement with the City of Pittsburgh to merger the City of Pittsburgh's 9-1-1 Center located at Railroad Street with Allegheny County's 9-1-1 Center located at N. Lexington Street as per the attached agreement. The period in which the relocation and merger will occur of the City of Pittsburgh's 9-1-1 Center to the Allegheny County's 9-1-1 Center is March 10, 2004 through January 1, 2005.

County Manager

**Pennsylvania  
The City of Pittsburgh, Pennsylvania  
and the County of Allegheny, Pennsylvania**

This agreement made and entered into between the City of Pittsburgh, a municipal corporation of the Commonwealth of Pennsylvania (hereinafter "the City"), and Allegheny County, a political subdivision of the Commonwealth of Pennsylvania (hereinafter "the County").

**WITNESSETH:**

**WHEREAS**, The City and the County have independent 9-1-1 systems established under the provisions of Act 78; and

**WHEREAS**, the City and the County have agreed that the provision of 9-1-1 services can be more effectively and efficiently provided to residents of the City and the County as part of a consolidated countywide 9-1-1 system; and

**WHEREAS**, the City will cease operating its independent 9-1-1 system effective January 1, 2005; and

**WHEREAS**, the County will therefore accept full responsibility for providing 9-1-1 services to City residents on January 1, 2005, pursuant to Act of 1990, P.L. 340, No. 78 (hereinafter "Act 78"); and

**WHEREAS**, the City and the County hereby agree to consolidate the two separate 9-1-1 systems into a single 9-1-1 response system as further outlined in this Agreement; and

**WHEREAS**, the City and the County hereby agree to jointly develop a Transition Plan, which shall address the operational and logistical needs of both the City and the County during the three phases of this transition; and

**WHEREAS**, the City and the County agree that the goal of consolidation is to provide the residents of the County and the City with the best possible 9-1-1 service in the most cost-effective and efficient manner possible; and

**WHEREAS**, the City and the County agree to work cooperatively during the Transition Period to integrate City and County operations and personnel; and

**WHEREAS**, the County, at no cost to the City, has purchased and installed telephone equipment to be used by the City prior to consolidation, and

**WHEREAS**, the City and the County recognize that the transition to a consolidated 9-1-1 system requires the prior approval of the Pennsylvania Emergency Management Agency (hereinafter "PEMA") and the Pennsylvania Public Utility Commission (hereinafter "PUC").

**NOW, THEREFORE**, in consideration of the mutual premises and covenants contained herein, and intending to be legally bound hereby, the parties agree to the following.

## I. DEFINITIONS

"9-1-1 Account" shall mean the restricted fund or trust established by the City in accordance with Act 78, for the receipt and distribution of the 9-1-1 subscription fee.

"9-1-1 emergency communications system" or "9-1-1 system" shall be defined as provided in Act 78, §2, which is a "...system which permits a person dialing 911 by telephone to be connected to a public safety answering point, via normal telephone facilities, for the reporting of police, fire, medical or other emergency situations...."

"AVL" shall mean Automatic Vehicle Location.

"CAD" shall mean Computer Aided Dispatch.

"City Assets" shall mean equipment, systems, and software, currently owned or which may be purchased by the City, that are identified as necessary elements to facilitate the relocation the City 9-1-1 system from the City location to the County location and for the operation of the City 9-1-1 system from the County location.

"City Emergency Management Assets" shall mean equipment, systems and software purchased by the City for the purpose of managing disaster or catastrophe events within the City of Pittsburgh.

"The City" shall mean the City of Pittsburgh, a municipal corporation of the Commonwealth of Pennsylvania.

"City Location" shall mean the current location of the City's Emergency Operations Center for the provision of 9-1-1 service, which is currently located at 2925 Railroad Street, Pittsburgh, PA 15201.

"County Assets" shall mean equipment, systems, software, and all other necessary elements currently owned or which may be purchased by the County to provide 9-1-1 service as part of the County 9-1-1 system.

"The County" shall mean the County of Allegheny, a political subdivision of the Commonwealth of Pennsylvania, or its duly appointed representative.

"County Location" shall mean the County's location for the provision of 9-1-1 services, which is currently located at 400 North Lexington Avenue, Pittsburgh, PA 15208.

"County Telephone System" shall mean the Sprint/CML 9-1-1 telephony equipment, purchased and installed at the City Location by the County (at no cost to the City), which does consist of fourteen (14) PC-based 9-1-1 telephony consoles including fourteen (14) 17-inch LCD flat panel monitors, 1 SMART Terminal for records management, CAT-5 (certified) cabling, CAD interface, and a system printer.

"Dispatch Services" shall include all communications and support services provided to support police, fire, EMS, and other emergency response services.

"Employees deemed to be in good standing" shall be defined as any City 9-1-1 telecommunications employee who has made application to the County and is available for duty in the 24hr / 7 day environment of the dispatch center including, shift work, weekends, holidays and overtime.

"Employees deemed to NOT be in good standing" shall be defined as any employee who has not filed application for employment with the County as prescribed in this agreement, is not available for duty in the 24hr / 7 day environment of the dispatch center, including shift work, weekends, holidays and overtime or who may be on medical leave as of December 31, 2004 or who has received more than one suspension from duty in the two years prior to December 31, 2004.

"MDC" shall mean Mobile Data Computer.

"Operation Costs" shall include those defined as eligible and ineligible as provided in Act 78, §8, which may be incurred in the day-to-day operation of a 9-1-1 System.

"Phase 1" shall be defined as the period of the planning and reconstruction of the County Location, in preparation for the physical move of the City's 9-1-1 system to the County Location. Phase 1 shall begin upon the effective date of this Agreement and shall end when the City physically relocates its 9-1-1 system from the City Location to the County Location.

"Phase 2" shall be defined as the period wherein the City's 9-1-1 system is relocated to the County Location, and the City operates its 9-1-1 system from the County Location. Phase 2 shall end no later than December 31, 2004.

"Phase 3" shall be defined as the period wherein the City ceases operating its own independent 9-1-1 system and transfers ownership of its 9-1-1 system to the County. The County shall commence operation of a consolidated 9-1-1 system under the direct control of the County. Phase 3 shall begin immediately after the end of Phase 2, or by January 1, 2005, at the latest.

"Public Safety Answering Point" or "PSAP" shall be defined as provided in Act 78, §2, which is "the first point, at which calls for emergency assistance from individuals are answered, 24 hours a day.

"Transition Date" shall be defined as January 1, 2005, the date upon which the City ceases operating its own separate and independent 9-1-1 system and the County begins providing consolidated 9-1-1 services from the County Location.

"Transition Period" shall be defined as the time period beginning on the effective date of this Agreement and ending on December 31, 2004.

"Transition Plan" shall be defined as a jointly-developed working document that addresses the operational and logistical needs of both the City and the County during the three Phases of the Transition Period.

## **II. SCOPE OF THE AGREEMENT**

As of the effective date of this Agreement, the City shall begin the three phases of transitioning the provisioning of 9-1-1 services for City residents from the City to the County. The City and County agree hereby to the process for (a) transferring City Assets, equipment, and contracts; (b) redeploying City employees; (c) the hiring of eligible City employees by the County; (d) assigning revenues and expenses associated with the City's current provision of 9-1-1 service; (e) assigning costs associated with the provision of 9-1-1 service during the Transition Period; and (f) ensuring optimal service levels. The City will discontinue providing 9-1-1 services to City residents on January 1, 2005; however this date may be contingent upon prior approval of the County's consolidated 9-1-1 plan by the PEMA and the PUC.

## **III. TRANSITION PLAN**

A. Subsequent to this Agreement, a Transition Plan, as defined in Section I of this agreement, shall be jointly developed by the City and the County.

B. The Mayor of the City will appoint a liaison to coordinate a Transition Plan, on behalf of City public safety bureaus. The liaison will ensure that current levels of 9-1-1 service are maintained during the Transition Period and subsequent consolidation.

C. The County Executive will appoint a liaison to coordinate a Transition Plan, on behalf of County public safety agencies. The liaison will ensure that current levels of 9-1-1 service are maintained during the Transition Period and subsequent consolidation.

D. The liaisons will jointly develop the Transition Plan, which shall be developed with the expert advice of Law Enforcement, EMS, Fire, Emergency Management, and 9-1-1 officials. The Transition Plan will meet or exceed the current operational needs of the City's police, fire, and EMS agencies, as well as the County's law enforcement, fire, and EMS agencies. The Transition Plan shall include, but not be limited to:

- 1) ensuring that the citizens of the County and City are provided with the best possible 9-1-1 service in the most cost effective and efficient manner possible;
- 2) identifying City and County assets that will be needed or required for provisioning or reconfiguring the consolidation of the two separate 9-1-1 systems ultimately into one system;
- 3) relocation of employees of the City;
- 4) hiring of eligible City employees by the County;
- 5) assigning of revenues and costs associated with consolidating the 9-1-1 systems;
- 6) developing policies and procedures to ensure optimal levels of service, for both the County and the City, during each Phase of the transition; and
- 7) identifying equipment and systems required to provide current levels of services from the County Location.

#### **IV. TRANSITION PERIOD**

To accomplish the merger of City 9-1-1 services into the County's system during the Transition Period, the parties agree to a three-Phase approach, designated as Phase 1, Phase 2, and Phase 3.

#### **V. PHASE 1**

##### **A. General**

1. Phase 1 shall begin upon the effective date of this Agreement, and shall end when the City relocates its 9-1-1 system to the County Location.
2. Phase 1 shall consist of the preparation for and relocation of the City 9-1-1 System to the County Location.
3. Phase 1 shall include the development of the Transition Plan, as described in Section III.
4. The County, at no cost to the City, shall prepare the County Location for the transition of the City's 9-1-1 system from the City Location to the County Location.
5. The City, at no cost to the County, shall prepare a relocation plan. Such plan shall include the purchase and installation of dispatch console equipment needed to dispatch City emergency services from the County Location and those costs related to physical relocation unless otherwise noted in this agreement.

##### **B. Equipment and Operations**

1. The City will retain ownership of 9-1-1 equipment and systems through December 31, 2004. Such equipment includes, but is not limited to, the hardware and software for the following systems: Microwave system and radio infrastructure; Tiburon CAD and CARS; MDC message switch; EAS; CRIMES (Police RMS); Towing Dispatch and Management System; and logger/recorders.
2. All portions and aspects of the City's current 9-1-1 system will remain at the City Location under the direction and control of the City.
3. The City, at its own cost, shall purchase eleven (11) Motorola Gold Elite radio consoles necessary for the provision of dispatch services. The City, at no cost to the County, shall install these radio consoles at the County Location. The consoles shall remain the property of the City through December 31, 2004; at such point, the City shall transfer ownership of these radio consoles, where they will become the property and assets of the County. After installation, nothing in this section shall be construed so as to prohibit the County, at no cost to the City, from upgrading and integrating its radio system to these consoles.

4. The City, at no cost to the County, shall continue to provide 9-1-1 service to City residents/citizens. The City shall be responsible for managing services and employees necessary for the provision of 9-1-1 service for the City from the City Location.
5. The City, at no cost to the County, shall be responsible for all operation costs associated with the provision of 9-1-1 service from the City location.
6. The County owned, Sprint CML telephone system and related equipment currently being used by the City for the provision of 9-1-1 service shall, at all times, remain the property of the County, whether at the City Location or at the County Location. In the event that this agreement is terminated such that the City continues to provide 9-1-1 service after December 31, 2004, the City shall compensate the County for the full cost of the installation, expansion, maintenance, and use of the County's telephone system. Cost shall be retroactive to installation and include equipment, installation, operation and maintenance.
7. The County, at no cost to the City, agrees to provide connectivity between the City Location and the County Location for the purpose of remote operation of the City's public safety radio, microwave, and related dispatch equipment from the County Location. The City, at no cost to the County, agrees to provide any connectivity for the City's administrative needs deemed ineligible in accordance with Act 78.
8. The County, at no cost to the City, shall undertake construction, reconstruction, and modification of space at the County Location so that the City will be able to provide 9-1-1 service from the County Location during Phase 2 of the Transition Period.
9. The County shall provide the City access to the County facility, for planning and inspection purposes during Phase 1.
10. The City shall assist the County in evaluating the City's 9-1-1 system for compatibility with and planning for the relocation of the City 9-1-1 system to the County Location.
11. The City and the County shall mutually agree that Phase 1 is complete prior to the City deploying its workforce.

#### **C. Personnel**

1. Employees of the City covered by the collective bargaining agreement between the City and the American Federation of State, County and Municipal Employees (hereinafter "AFSCME"), Local 2719 shall remain City employees for the duration of Phase 1.

2. For City employees who are not covered by a collective bargaining agreement currently and who will not be covered by a collective bargaining agreement if they become County employees, the County may make employment offers to these employees at any time during Phase 1.
3. The City and County shall develop a formal process to be used to resolve disputes and conflicts between City and County personnel during Phase 2. Such process shall be in place upon commencement of Phase 2.

#### **D. Operating Expenses and Revenues**

1. The City shall be responsible for all City 9-1-1 operating expenses and personnel costs. The City will continue to collect the monthly 9-1-1 contribution rate on all telephone subscribers identified in the City's 9-1-1 Plan, as provided for in Act 78, accrued through December 31, 2004. The City shall use the monthly 9-1-1 surcharge to pay for any costs associated with the provision of 9-1-1 service in a manner consistent with Act 78.

#### **E. Emergency Management**

1. Both the County and City shall retain their autonomy and authority in their respective Emergency Management Systems, including the receipt of funds from the PEMA.
2. The County shall provide space in its Situation Room for the City's Emergency Operations Center. This will include the eventual relocation of certain City Emergency Management Assets to the County Location. Any City Emergency Management Assets that are relocated to the County shall remain the property of the City at all times.
3. The County, at no cost to the City, shall provide space, as deemed appropriate by the County, in the County's Situation Room. This space may include, but not be limited to, operational space for City emergency management staff during times of City emergencies and may include integrated space for larger, cross-jurisdictional emergencies.

### **VI. PHASE 2**

#### **A. General**

1. Phase 2 shall begin when the City's 9-1-1 System is relocated to the County Location. Phase 2 shall end on December 31, 2004.
2. The City, at its own expense, shall provide the full operational and support staff required to operate the City's 9-1-1 services from the County Location during Phase 2 in order to provide 9-1-1 service to the City from the County Location. The City shall be responsible for managing the City resources and employees

necessary for the provision of 9-1-1 services to the City from the County Location. The City shall be responsible for any operations costs associated with the operation and maintenance of its 9-1-1 system from the County Location.

3. The County, at its own expense, shall provide sufficient space for the City at the County Location.

#### **B. Equipment and Operations**

1. The City shall retain ownership of 9-1-1 equipment and systems relocated to the County Location through December 31, 2004. This includes, but is not limited to, the hardware and software for the following systems: Microwave system and radio infrastructure; Tiburon CAD and CARS; MDC message switch; EAS; CRIMES (Police RMS); Towing Dispatch and Management System; and logger/recorders. The City shall retain legal and financial responsibility for the maintenance and repair of these systems and shall maintain hardware and software throughout Phase 2.
2. The City shall continue to maintain the City Location, including, but not limited to, climate control, security, a back-up generator, and UPS to facilitate remote access to the City and County equipment needed to support the City 9-1-1 system from the County Location. The City shall permit the County to use the City Location as a back-up PSAP in case of emergency.
3. The transition plan shall include City CAD capability through December 31, 2004. The goal of a seamless relocation of CAD from the City to the County has been established.
4. The County shall provide its County telephone system and work stations for City use at the County Location.
5. The County shall use its logger recorder equipment to record City 9-1-1 calls and related radio transmissions. The County shall archive tapes of all City 9-1-1 calls and radio activity for a period of at least one hundred eighty (180) days. The County shall provide copies of tapes of City 9-1-1 calls and radio activity, or CAD printouts, upon request by authorized City employees. The transition plan shall provision for the re-recording of City 9-1-1 calls and related radio traffic which may be required by City public safety agencies.
6. The City and County will develop protocols for incident and records requests from public safety bureaus, which shall be implemented January 1, 2005.

#### **C. Personnel**

1. City employees covered by the collective bargaining agreement between the City and the American Federation of State, County and Municipal Employees (hereinafter "AFSCME"), Local 2719, shall remain City employees for the duration of Phase 2.

2. The County may hire any City employees who currently are not covered by a collective bargaining agreement and who will not be covered by a collective bargaining agreement as County employees at any point during Phase 2.
3. The City shall designate a Manager, who will be responsible for supervising City personnel deployed to the County Location. The Manager shall be responsible for supervising all City personnel, interpreting City policy for City personnel, and taking any remedial action, including, but not limited to, issuing disciplinary action to City personnel deployed to the County Location. The Manager shall represent the City in all disciplinary hearings as outlined by the collective bargaining agreement between the City and AFSCME, Local 2719.
4. Notwithstanding any other provision in this Agreement to the contrary, the County shall not at any time be required to offer employment to or accept any City employee for employment as a County employee unless such employee is "in good standing," as defined in Section I of this Agreement.
5. The County reserves the right, on a case-by-case basis, to extend an offer of employment to any employee deemed "not in good standing."
6. The City agrees to identify employees who are "in good standing" no later than June 1, 2004.
7. Effective June 2, 2004, the County may begin to tender conditional offers of employment to any City employee that is "in good standing," as defined in Section I of this Agreement, for the purpose of determining projected staffing levels. Any City employee who accepts the County's conditional offer of employment in writing within 14 calendar days of such offer is eligible for employment by the County effective January 1, 2005.
  - a. Any City employee who does not accept the County's conditional employment offer within such 14-day period, may submit an application of employment with the County; provided, however, that the County shall not be required to offer employment to any such employee. The decision whether to offer employment to any such employee shall lie solely with the County.
8. Any City employee who accepts the County's offer of conditional employment as provided in subsection (a) above, shall remain an employee of the City through December 31, 2004.
9. If a City employee accepts the County's conditional offer of employment, and is subsequently determined not to be "in good standing" at any point between June 1, 2004 and December 31, 2004, then the County shall not be required to make a formal offer of employment to such employee.
10. Nothing in this agreement shall prohibit a City employee from voluntarily becoming a County employee; provided, however, such employee shall not be permitted to work in the City operation, until after the transition date.

11. The City and the County mutually agree to operate under the same policies regarding employee workplace conduct to ensure a consistent standard of conduct in the County Location. The City and County agree that such uniformity will assist employees and management in adjusting to the transition.

#### **D. Operating Expenses and Revenues**

1. The City shall continue to collect and accrue through December 31, 2004, the monthly contribution rate for telephone subscribers identified in the City's 9-1-1 Plan and in a manner consistent with Act 78.
2. The City shall be responsible for eligible and ineligible 9-1-1 operating expenses and personnel costs accrued through December 31, 2004 unless otherwise noted in this agreement.
3. The City shall use the revenue from the monthly contribution rate to pay for recurring and nonrecurring expenses associated with its 9-1-1 system, in a manner consistent with Act 78.
4. The County shall not charge the City rent or any costs associated with the operation and maintenance of the County Facility through December 31, 2004.

### **VII. PHASE 3**

#### **A. General**

1. Phase 3, for the purpose of this agreement, shall begin at 00:00:01 hours on January 1, 2005.
2. Effective January 1, 2005, the City shall cease operations of its separate and independent 9-1-1 System, and shall transfer ownership to the County of the City's 9-1-1 System, and City assets and components required to support dispatch operations for the City's dispatch services.
3. Effective January 1, 2005, the County shall begin collecting the monthly contribution rate from applicable telephone subscribers as provided for in the County's amended 9-1-1 Plan, and in a manner consistent with Act 78; provided, however, that prior approval of the County 9-1-1 Plan and contribution rate has been obtained by the PEMA and the PUC, or as provided by Act 78.

## **B. Equipment and Operations**

1. Effective January 1, 2005, the City shall transfer to the County all of the City's rights and interest in the City Assets and as identified in Exhibit B hereto. The City shall identify all equipment and systems that have maintenance agreements in force on the Transition Date. The City shall make every reasonable effort to contact service providers to have such maintenance agreements transferred to the County. For any maintenance agreement that is not transferable, the City will cancel it after giving the County written notice 30 days in advance of the City's intent to cancel such agreement. The City, at no cost to the County, shall continue to house County 9-1-1 Assets at the City Location; provided, however, such County 9-1-1 Assets are used as part of the 9-1-1 system infrastructure serving City residents.
2. The County will assume responsibility for the continued operation and maintenance of transferred 9-1-1 hardware, software, and related equipment.
3. The City will continue to provide utilities, climate control, security, generator, and UPS at the City Location to house all equipment transferred to the County and which supports the consolidated 9-1-1 system.
4. The City, at no cost to the County, shall continue to house all County Assets remaining at the City Location. If the City deems it necessary to use the City Location for an alternate use, it shall provide the County with a written notice of one year to vacate the City Location.
5. If the City sells the City Location to a private entity, the City shall include in the terms of the sale as a cost to buyer(s) the relocation, transfer, replacement, or reconfiguration of all assets housed or controlled in or from the City Location that are deemed essential to the provisioning of 9-1-1 and dispatch services. Any cost not passed to the buyer(s) shall be evenly shared by the County and City.
6. The operation of the consolidated 9-1-1 system shall be under the direction and control of the Chief of the Department of Emergency Services of Allegheny County.
7. The County shall operate the consolidated 9-1-1 system in accordance with the operational standards set forth in Act 78, along with 16 Pennsylvania Code, Section 36a, Public Safety Emergency Telephone Program, Chapter 120c Training and Certification Standards for 9-1-1 Emergency Communications Personnel; and Chapter 120d, Performance Review and Quality Assurance Review Standards.
8. The County shall provide the City public safety bureaus with the same services that are currently provided by the City, including, but not limited to: call-taking, dispatching, notifications, NCIC/CLEAN inquiries and entries, pre-arrival instructions, quality control procedures, police ordered tow dispatching, and other index services.

9. The City shall designate a representative who shall continue to meet with the County, for the purpose of reviewing operational issues to ensure compliance with all quality standards as they relate to dispatch services.
10. The County shall make available, permit access, and provide work space and technology to City Police, Fire, and EMS employees, provided that space is available at the County Location, and as determined by the County.
11. The County shall archive tapes of all City calls and radio activity for a period of at least one hundred eighty (180) days. The City reserves the right to obtain copies of radio transmissions, 9-1-1 calls, or CAD printouts free of any charge in accordance with applicable County policies for making such calls available to a municipality. The County shall not provide records or information about City 9-1-1 calls, CAD records, tapes, etc. to third parties without the approval of the City except as otherwise required by law.
12. The County shall assume the responsibility and cost of managing the public safety radio infrastructure (such as base radios and tower antennas and receivers owned by the City) used by the County's 9-1-1 system for communicating with emergency response units. Effective January 1, 2005, the County will assume all lease and maintenance agreements for the public safety radio infrastructure including, but not limited to, towers and microwave equipment.
13. The County shall provide to the City, free of cost, space on any previously City owned towers for antennas and receivers and ancillary equipment that is determined by the City to be necessary for operation of the City's non-public safety radio system. The County shall not move, modify, or render inoperable in any manner any City technology used for the City's non-public safety radio system located on any previously owned City tower or on non-City property, without the City's prior written approval.
14. Effective January 1, 2005, the City shall assign to the County all rights possessed by the City to place antennas, receivers and ancillary equipment on or about communication towers owned by others; provided, however, that the City reserves its right to place antennas, receivers, and ancillary equipment on non-City owned communication towers for the purpose of maintaining the City's non-public safety radio system.
15. The County shall provide real time data entry into City systems for stolen/recovered vehicles, stolen/recovered guns, missing/runaway juveniles and adults, and police ordered tows. The City shall provide computer equipment and connectivity to its systems for this data entry.
16. The City shall make every reasonable effort to transfer, in a timely manner, to the County all FCC licenses presently owned by the City and used for public safety radio communications. The County agrees to pay for the cost of transferring such licenses from the City to the County.

17. The County agrees to pursue countywide consolidated technological advances, such as 800 MHz radio system, AVL, and MDC systems built to or exceeding Public Safety Performance Standards. The County further agrees that, if purchased, such systems will be equally available to support City Public Safety Agencies once such systems are fully implemented. The City agrees to cooperate in the development and use of these consolidated systems to avoid duplication of systems required for dispatch services.

### C. Personnel

1. To the extent required and provided by State law, the City shall be responsible for negotiating the effects to City employees covered by the collective bargaining agreement between the City and the AFSCME, Local 2719.
2. Effective January 1, 2005, any employee "in good standing" as defined in Section I, Definitions, of this agreement, as of December 31, 2004, and who has accepted an offer of employment from the County shall become a County employee. The County reserves the right to withhold any offer of employment to any employee deemed "not in good standing."

The City shall, upon receipt of the employee approval, provide a complete copy of the personnel file for each City employee that becomes a County employee as provided above and in Phase 2, Section C. The personnel file shall include all disciplinary records and any other records in any manner relating to their employment.

3. The City and the County have determined that some City employees covered by the City's collective bargaining agreement with AFSCME, Local 2719, currently receive a salary that is lower than County employees in the same classification. Effective January 1, 2005, any such City employee who becomes a County employee shall receive the same salary as other County employees in the same classification. Provided, however, that any City employee covered by the City's collective bargaining agreement with AFSCME, Local 2719, who currently receives a salary that is higher than County employees in the same classification, shall be "red circled" as defined and provided by the County's policies and past practices.
4. Any City employee not currently covered by a collective bargaining agreement with the City

**AND** who becomes a County

**AND** who will be covered by a collective bargaining agreement as a County employee, such employee shall receive the same salary as other County employees in the same classification.

5. Any City employee not covered by a collective bargaining agreement with the City

AND who becomes a County employee

AND who will not be covered by a collective bargaining agreement as a County employee, such employee shall receive a salary consistent with the County's Personnel Policies.

6. All City union employees hired by the County shall be considered new County employees for the purposes of any and all fringe benefits afforded to them. However, to the extent that the eligibility for any benefit is subject to a probationary or exclusionary period, including, but not limited to those generally required by insurance carriers, the County agrees to waive the applicable probationary period.
7. The County agrees to make every reasonable effort to assign former City employees to job tasks to perform 9-1-1 functions for calls received from within the City, until such time as other employees are properly trained for such job tasks. Provided, however, that nothing in this section shall be construed as to prohibit the County from training and assigning employees as the County deems appropriate.
8. The County will agree to consider applications for employment in the County 9-1-1 System, from those City 9-1-1 System employees who may be on medical leave as of December 31, 2004, at the time said employee has been released for full duty by the attending physician, provided an opening in the County 9-1-1 System exists.

#### **D. Revenues and Expenditures**

1. Effective January 1, 2005, no expenditures shall be made from the City's 9-1-1 Account except those legitimate 9-1-1 expenses that were incurred prior to December 31, 2004.
2. The City shall not use revenue from the 9-1-1 Account to pay debt service for any capital expenditures on or after January 1, 2005.
3. The City shall continue to receive and deposit revenue from the monthly contribution rate into the City's 9-1-1 Account for charges to telephone subscribers accrued through December 31, 2004.
4. Upon the City closing out its books with respect to the City's 9-1-1 Account, the City shall cause an audit to be made of the City's collection and disbursement of contribution rate funds and expenditures for the nonrecurring costs, training, costs for mobile communications equipment, maintenance and operation of the City's 9-1-1 system. The expenditure for such audit shall be paid from revenues received from the contribution rate. The audit shall be conducted in the manner prescribed in Act 78. The audit period shall begin at the closing date of the most

recent independent audit up to and including close out expenditures and revenues. The audit shall be completed by September 30, 2005.

5. Upon completion of the close out audit on or before September 30, 2005, the City shall transfer the final fund balance from the City's 9-1-1 Account to the County. The County shall deposit such funds into its 9-1-1 Account in a manner consistent with Act 78.
6. Effective January 1, 2005, the County shall begin levying telephone subscribers in the City a monthly contribution rate as provided for in the County's 9-1-1 Plan; provided however, that the County has submitted a revised or amended 9-1-1 plan to PEMA and the PUC. The City agrees to support the County with its efforts to collect the monthly contribution rate from telephone subscribers subject to the City's rate.

#### **VIII. CONTINUING OBLIGATIONS**

- A. The County shall submit a revised or amended 9-1-1 plan to PEMA as required by Act 78. Such plan shall include the proposed consolidation of 9-1-1 services between the City and the County, the discontinuance of the City's 9-1-1 system, the City's discontinuance of levying the contribution rate in the City effective December 31, 2004, and the County's initiation of levying the contribution rate for applicable telephone subscribers. Any costs associated with preparing such 9-1-1 plan shall be incurred by the County.
- B. Effective January 1, 2005, the County shall not charge the City for the performance of 9-1-1 services from that date forward.

#### **IX. GOVERNING LAW**

This Agreement shall, in all respects, be governed by the laws of the Commonwealth of Pennsylvania.

#### **X. TERMINATION**

- A. The City and County shall each have the right to terminate this Agreement at any time prior to January 1, 2005, upon thirty (30) days written notice to the other party.
- B. Should the City terminate this agreement prior to December 31, 2004, the City shall reimburse all costs incurred by the County associated with this transition to the County.
- C. Should the County terminate this agreement prior to December 31, 2004, the County shall reimburse all costs incurred by the City, other than the purchase of City Assets, to the City.

## **XI. AMENDMENT**

This Agreement contains all terms and conditions agreed to by the parties hereto, and no other agreement, oral or otherwise, regarding the subject matter of this Agreement, shall be deemed to exist or to bind any of the parties hereto. This Agreement may not be changed, modified, discharged, or extended except by written amendment, duly executed by the parties.

## **XII. SEVERABILITY**

If any provisions of this Agreement or the application thereof to any person, entity, government, or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this Agreement that can be given effect without the invalid provision or application, and to that end the provisions of this Agreement are declared to be severable.

## **XIII. CONFIDENTIALITY**

The County agrees not to divulge or release any City information or data developed or obtained in conjunction with any aspect of its performance under this Agreement, except to authorized, City personnel or upon prior written approval of the City Solicitor.

## **XIV. COMPLIANCE WITH LAWS**

The County agrees to fully obey and comply with all laws, ordinances, resolutions, and administrative regulations which are applicable to this Agreement.

## **XV. ANTI DISCRIMINATION**

The County shall not discriminate in its employment on the basis of race, color, religion, ancestry, national origin, place of birth, sex, age, disability, non job-related handicap, or sexual orientation. The County shall comply with the applicable provisions of the Pittsburgh Code, Title Six Conduct, Article V Discrimination, and any amendments thereto. The County shall also comply with the applicable provisions of Title I and Title II of the Americans with Disabilities Act, any amendments thereto and any regulations issued thereunder.

## **XVI. HOME RULE CHARTER: LIABILITY OF CITY**

This agreement is subject to the provisions of the Pittsburgh Home Rule Charter; and the liability of City thereunder is limited to amounts which have been or may be, from time to time, appropriated therefore by Resolution of Pittsburgh City Council.

## **XVII. WORKER'S COMPENSATION**

The County of Allegheny hereby certifies that it has accepted the provisions of the Worker's Compensation and Occupational Disease Acts, as amended and supplemented, insofar as the work covered by this Agreement is concerned, and that it has insured its liability thereunder in accordance with the terms of the said Acts, as evidenced by the certification of insurance it has caused to be attached hereto, or that it has duly filed a proper certificate of exemption from insurance with the Pennsylvania Department of Labor and Industry.

## **XVIII. AUTHORIZING RESOLUTION**

This Agreement is entered into by the City of Pittsburgh pursuant to Resolution No.

90 effective March 19, 2004.

## **XIX. NOTICES**

All notices, requests and communications to the parties shall be in writing (including fax or similar writing) and shall be given to the parties at their respective address identified below or to such other address or fax number as either party may hereafter specify by notice to the other party. Each such notice, request or communication shall be effective upon receipt, provided that if the day of receipt is not a business day, then the notice shall be deemed to have been received on the next succeeding business day.

**XX. THIRD PARTY BENEFICIARIES**

The parties agree that no persons, corporations, associations or other organizations or entities shall be considered third party beneficiaries of this Agreement.

**XXI. INTERPRETATION**

This Agreement shall not be construed for or against either party hereto but rather shall be given a fair and reasonable interpretation based upon the plain language of this Agreement and the expressed intent of the parties.

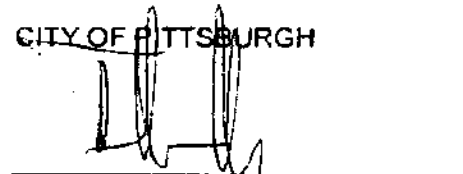

**[THE REMAINDER OF THIS PAGE HAS BEEN INTENTIONALLY LEFT BLANK]**

IN WITNESS WHEREOF, intending to be legally bound, the parties have hereto affixed their signatures below.
