Barb,

There is a fiber drop that was installed at the 10th St Police Station to backhaul all of the information from our Traffic Adaptive Signals that are being installed on the 15th St Corridor. We need the transfer to purchase so we can install the equipment necessary to retrieve the information and hook to the fiber line.

Ohhh, that makes sense, Once you confirm that I will add that to the explanation so the same question is not asked again.

Thanks

I believe the 10<sup>th</sup> st station is being used as a relay site to get the information from 15<sup>th</sup> to the hub at City Hall for the Traffic Management Control, but I want Nelson to elaborate so I do not provide the wrong information.

**Subject:** Transfer Request

On Tuesday I received a transfer request for Traffic Engineering in the amount of \$10,000 for Capital Project 2024 – 15<sup>th</sup> Street Traffic Signal Improvements. The reason for the transfer is listed as equipment needed for the 10<sup>th</sup> Street Police Station. I am confused on how the 10<sup>th</sup> Street Police Station is part of the 15<sup>th</sup> Street signal improvements. Can you please help me understand?

Thanks

Barb
